Junior college comptroller is named by Board of Regents

The Board of Regents of the University System of Georgia Wednesday afternoon named Walter Thomas Melton Jr. of Atlanta to the post of comptroller of Floyd Junior College. Melton is presently the Board of Regents' internal auditor, a position he has held since 1968. Born in Bibb County Nov. 17, 1942, Melton received the bachelor of business administration degree in accounting from the University of Georgia in 1964. From 1964-66, he was an auditor with the firm of Norris, Hansford, Butler and Co. Certified Public Accountants in Atlanta. From 1966-68 he served with the U.S. Army. Melton is a member of the Georgia Society of Certified Public Accountants.

He will assume the new position Monday.

Earlier Wednesday the Board of Regents approved an additional expenditure of $70,000 for expansion of the physical facilities of Floyd Junior College. The money will be used to add a connecting area between the academic building. These items were included in the original plans for the school, but were deleted when the project was designed to keep it within the amount of funds available to construct the college's initial facilities.

The project budget remains within the funds available after approval of the additional expenditure.

J. D. Maddox Jr., chairman of the junior college committee which played an important part in obtaining a junior college for Floyd County; Dr. David McCorkle, president of the new school; and Horace Cline, chairman of the Floyd County Board of Commissioners broke ground Wednesday for actual construction of the initial facilities. Van Winkle and Co. of Atlanta is in charge of construction.

The school is expected to be occupied by the beginning of the fall semester in January 1971.

In the meantime, plans call for the school to open in temporary quarters.

(See Page 5, Col. 5)

Most Floyd families well insured, statistics show

(Special to the News-Tribune)

Most Floyd County families are comparatively well-protected against the financial hazards of daily living.

They have unemployment insurance, health insurance, car insurance and household insurance as well as burglary, fire and life insurance, to mention the principal ones.

On the long range side are such other safeguards as social security and private pension plans.

Of particular note, however, is the extent to which they have been adding to their life insurance holdings in recent years. Rising incomes have made it possible for them to do so.

As a result, ownership of life insurance has reached an all-time high in Floyd County. The total amount in force in the area is now approximately $466,000,000.

The basic statistics, for the country as a whole and for each state, are from the current Life Insurance Fact Book.

Putting their money into this form of family security is but one of the steps that people have been taking to protect themselves. They have also been putting money away into savings and investments of various kinds.

The bulwark that American families have set up in the form of life insurance has reached $1.3 trillion.

Of this total, according to the life insurance statistics, some $27,945,000,000 is in force in the State of Georgia. It compares with $107,747,000,000 in 1960.

As for the average family in the state, the amount of insurance carried is equivalent to 1.3 times net earnings, after taxes, over a period of 30.7 months.

In Floyd County, based on this yardstick and on the level of earnings locally per family, life insurance in the area now averages $25,000 per family.

Ten years ago, by way of comparison, their coverage was only half that much.

Elsewhere in the United States the average is $19,900 per family, and, in the State of Georgia, $23,300.

Although ordinary life insurance continues to be the principal type held by most people there has been a rapid rise in group insurance, which is usually job-connected insurance.

Not included in the figures for the substantial amount of insurance issued to veterans through the Federal government.

Ground broken for junior college construction

D. Maddox Jr., who served as chairman of the Floyd Junior College Committee which was instrumental in obtaining a junior college for Floyd County, is shown reaking ground for the actual construction of the school. Van Winkle and Co. of Atlanta is in charge of construction. Participating in groundbreaking ceremonies Wednesday afternoon were (left to right) Dr. David McCorkle, president of the school; Maddox; Horace Cline, chairman of the Floyd County Board of Commissioners; and Paul Roach, superintendent in charge of construction.
ATLANTA—Sen. William Searcy of Savannah (left) is shown on his bill which would have abolished the death penalty before the Senate voted it down. The bill's strongest opponent was Miller of Dekalb County (right).

Chicago Seven trial nearing end

CHICAGO (AP) — Defense attorneys in the Chicago conspirators trial are expected to complete their closing arguments today, paving the way for a U.S. District Court jury to begin deliberations by the weekend.

A two-hour rebuttal by the chief prosecutor, probably on Friday, one of the last main steps remaining before Judge Julius J. Hoffman gives his instructions to the jury which has been hearing the case since Sept. 24.

The seven defendants are charged with conspiring to incite rioting at the time of the 1968 Democratic National Convention. Leonard I. Weinglass, one of two defense lawyers, said the jury, Wednesday the prosecution could not find "a single decent human being" to support its case.

With three exceptions, he said, the government based its case solely on the testimony of policemen, city officials, and FBI and intelligence agents.

"They don't understand the obligation to present the whole truth," Weinglass asked. "We brought before you the facts of this case and we have shown you that they are not true."

Communists fall in Laos strike

VIETNAM (AP) — Three companies of North Vietnamese troops attacked the Plain of Jars airport early today and were beaten back with the loss of 75 men killed, a Laotian government spokesman said.

The three-hour attack came one day after U.S. transport planes flown by the Air America charter company completed the evacuation of 12,000 refugees from the airport.

The government spokesman claimed the battle was a "great victory" for the forces. He said one government battalion beat back an estimated 600 North Vietnamese without the use of tactical air support.

Government casualties were not announced.

Councilman's son arrested on drug counts

NORTH MIAMI BEACH, Fla. (AP) — Hours after his father emotionally pleaded for help in creating a youth center to combat drug abuses, the son of a city councilman was arrested on a charge of selling heroin.

The 19-year-old, who was taken to custody Wednesday night a short time after his father, Robert Gerardo, had used the youth as an example of how he wanted to create a coffee-house youth center for drug problems.

The Elder Gerardo had appealed to the governing Metro Commission to provide $5,000 to create the center, and said his son had been involved with marijuana stockholders.

The son of Gerardo was arrested, said, "We hardly recognized him. We had pneumonia, but we were able to get him on his feet."

We brought him back, but it was a heart-breaking experience."

The commission declined to grant the funds.

Officers who arrested the younger Gerardo said they had seized 11 bags of heroin valued at $50 apiece. The youth was charged with possession of heroin and conspiracy to sell narcotics to minors.

Dalton native named
Junior College dean

Temporary office facilities rented; faculty search opens

The Board of Regents of the University System of Georgia today appointed Dr. Wesley C. Walraven to the second highest post at Floyd Junior College.

Dr. Walraven, presently associate professor of biology and chairman of the division of natural science and mathematics at Kennesaw Junior College in Marietta, was named academic dean of the Floyd school. The appointment is effective Mar. 16.

The Board of Regents also approved a lease agreement with Oostanaula Lodge 113 F&AM for use of the basement and second floor of the Metro Building formerly Harbin Clinic, on East Third Avenue for temporary administrative offices for the college. The lease was made for April 1 through Dec. 31. Temporary offices are now located in the Rome Area Chamber of Commerce building.

McCorkle, president of the school, said that plans are being made to obtain temporary classroom facilities until the school building, located on U.S. Highway 27 South, is completed. The building, now under construction, is not expected to be completed by September, but college officials have stressed that classes will begin in September in temporary quarters.

Seeks Faculty
Following today's Board action, Dr. McCorkle said that he is now ready to start "full force" obtaining faculty to staff the junior college.

The new academic dean has held his position at Kennesaw Junior College since 1966 when the school opened. From 1964-65 he was instructor in botany at the University of Georgia and from 1965-66 he was teacher of biology and general science at Valley Point High School in Dalton.

Dr. Walraven earned the B.S. degree in science education from the University of Chattanooga; the master of education degree in science education from the University of Georgia, and the Ph. D. in botany from the University of Georgia.

A native of Dalton, Dr. Walraven was born Dec. 26, 1936. He is a graduate of Valley Point High School. He is married to the former Linda Swanson of Dalton and they have two

Maddox kills GBI statute, eye exam bill

ATLANTA (UPI) — Gov. Lester Maddox has killed two bills that would have placed the Georgia Bureau of Investigation under the authority of the state attorney general and required periodic eye examinations for Georgia drivers.

"To me it would be a serious mistake," Maddox said, to sign the bill transferring the GBI and to "weaken the governor's responsibility as conservator of the peace. There could be a time when the governor needed those agents to preserve the peace and he would not have the authority to use them."

Sponsors of the bill to transfer the GBI from the Public Safety Department argued it would have improved the efficiency of the investigative unit and allowed it from politics.
Junior College progresses; student enrollment begins

Temporary quarters for opening in September not yet decided

Progress on construction and development of Floyd Junior College is continuing steadily as officials prepare for the school's September opening.

Construction of facilities, selection of an administrative and instructional staff, and acceptance of the student body are all well underway, according to Dr. David Bostin, president.

Temporary offices have been located from an above-the-Rome Area Chamber of Commerce to the Metro Building, formerly the Harbin Clinic, and the office of the third avenue. Floyd Junior College offices occupy the entire second floor of the Metro Building. Offices will remain in this location until construction of the school plant on U.S. Highway 27 South is completed.

At the college site, the administration building's structural concrete has been erected and workmen are now preparing to pour floors and raise walls. Erection of structural concrete for the administrative building is partially completed. According to Harold Pressly, resident engineer, the work is about a week behind schedule because of rainy weather, but he added that it is "shaping up very nicely." Pressly said that plans call for all work to be completed by December, but he added that some buildings probably will be ready sooner.

Phase Construction

The school's site is a 233-acre tract. Facilities included in the first phase of construction are a classroom building housing classrooms, laboratories, faculty offices, and a library, in addition to office space and a maintenance office, student lounge, complete food service, and bookstore, a physical education service building, with locker and shower rooms, equipment rooms and offices, and a boiler room. Buildings to be included in the second phase of construction include a library building and a physical education building.

Floyd County provided the initial build and initial buildings, but the Board of Regents of the University System of Georgia will operate the college and provide additional physical facilities required by and for expansion of the institution.

Until the administrative facilities are complete, the college will operate from temporary offices in the Metro Building. Details are being worked out now for acquisition of temporary classrooms. College officials stress that the school will begin its first academic year the latter part of September. Registration and orientation probably will begin the last week of September, according to Harold Boyd, director of student affairs.

Meanwhile, recommendations for key faculty positions will be made to the Board of Regents for its May meeting.

Students Accepted

Letters of acceptance have already been sent to the school's first students and applications for admission are being processed. Boyd said: "Rome High School leads the list of area schools whose students have been accepted, followed by Model and Pepperell High Schools. Students from East Rome, Catoosa, Cave Spring, Rockmart, Armuchee, and Chastina High Schools have also been accepted, as well as students from (See Page 2-B, Col. 3).

Advanced first aid classes scheduled

An advanced first aid class will be offered by the Rome-Floyd County chapter of the American Red Cross beginning...
News-Tribune staffer joins Junior College

News-Tribune staff writer Karen Supon has been named to the position of public information officer at Floyd Junior College.

Mrs. Supon's appointment becomes effective Monday.

As public information officer, she will have charge of news activities, publications and public relations at the new school, which will open in September.

Presently, applications for admissions to Floyd Junior College are being accepted. The school is a unit of the University System of Georgia.

Mrs. Supon, the former Karen Jenkins, is a native of Rome and a graduate of Thornwood School. She attended Tift and Shorter Colleges. She has been employed as a staff writer for the News-Tribune since 1966.

A member of the First Presbyterian Church, Mrs. Supon is a Sunday school teacher and member of the choir. She serves on the board of directors of Rebecca Lawn Cemetery and the Rome-Floyd County chapter of the National Foundation March of Dimes. This year she has been theгрестриковуемая member of the Rome Junior Service League.

Mrs. Supon also has served on the board of directors of the Rome Community Concert Assn.; served as president of the Thornwood School Alumni Assn., and been a member of the Rome Little Theatre.

Her husband, William, is a teacher at Darlington School, where they reside.
University System officials visit Floyd Junior College

Dr. Harold F. Robinson, vice chancellor of the University System of Georgia and Dr. Haskin R. Pounds, assistant vice chancellor, were in Rome Friday to meet with officials of Floyd Junior College, to visit the college's temporary facilities in the Metro Building and to tour the campus site on U.S. Highway 27 South. Dr. David McCorkle, (right) president of Floyd Junior College, is shown greeting Dr. Robinson while Dr. Pounds looks on. Floyd Junior College is a part of the University System of Georgia.
A Roman and a former Roman are among the seven persons approved by the State Board of Regents as members of the faculty at Floyd Junior College, which will begin its first academic year in September.

They are Mrs. Elsie Washington of 27 Conway Place, and Jerry Wayne Shelton of Gainesville, formerly associated with the Berry Schools.

Shelton, a former athlete director at Berry Academy, was named assistant professor and director of physical education. A native of Fayetteville, Tenn., he received the B.A. in physical education from Berry College and the M.A. in physical education from Middle Tennessee State College. He has since completed two years work toward his doctorate at the University of Georgia.

A member of the Bike Sports Trial Club in recognition of his 140 basketball victories, the new athletic director was Region 3-A "Coach of the Year" for three years and was named "Coach of the Year" in 1966 by the Georgia Intercolligate Athletic Conference and National AIA. The National Junior Chamber of Commerce has also named him an "Outstanding Young Man in America."

Mrs. Washington, a teacher at West Rome High School, has been named assistant professor in mathematics. She obtained the A.B. in mathematics from Shorter College and the M.S. in mathematics from the University of Tennessee at Chattanooga. She has also attended Washington State College. A high school honor graduate, Mrs. Washington was one of 15 persons selected from 400 applicants to participate in the 1966-1969 National Science Foundation Institute.

Other faculty appointments include: Milton L. Ready of Bogart, Tex., as assistant professor (See Page 5-A, Col. 4)

Presentations ready

The May term Floyd County grand jury is scheduled to make its presentations at 9:30 a.m. on Friday.

During its deliberations the grand jury has considered 75 criminal matters and returned bills of indictment in 61 cases. There were 14 "no" bills.

Civil cases have been tried in Floyd Superior Court during the past two weeks and two weeks of criminal trials are slated to begin Monday.
Floyd Junior College students register; broad program seen

Floyd Junior College, with administrative offices temporarily located in the Metro Building on East Third Avenue, in continuing to accept applications for admission to the fall quarter, which will begin in September.

Admission to the college is based on two requirements—high school graduation or the equivalent and completion of the Scholastic Aptitude Test of the College Entrance Examination Board. The Scholastic Aptitude Test is offered several times a year in the Rome area by the College Entrance Examination Board through local high schools and colleges. The next test will be offered July 11. Persons interested in taking it can obtain application forms through high school counselors or by writing the College Entrance Examination Board, Box 592, Princeton, New Jersey, 08540.

Persons who have not graduated from high school can be admitted to Floyd Junior College by satisfactory completion of examinations administered or prescribed by the college. Applicants wishing to transfer from another college should arrange to have an official transcript of their work from each college previously attended sent to Floyd Junior College. Students attending other colleges can take courses applicable to their major at Floyd on a transient basis.

Three Program Areas

As a junior college, Floyd will offer programs in three areas—transfer, career and continuing education. All three programs will be offered both during the day and during the evening.

The transfer program is designed for students who plan to continue their education at a senior college or university. Students will be able to complete the first two years of most degree programs in the arts, sciences, humanities, social sciences, in teacher education, business administration and in programs leading to professional degrees such as law, medicine, pharmacy, dentistry and veterinary medicine. At the successful conclusion of the two-year program, students will receive an Associate degree and be able to transfer their credits to any other institution in the University System of Georgia. These schools include the University of Georgia, Georgia Tech, Georgia State University, Medical College of Georgia, West Georgia College, Fort Valley State College, Georgia College, Savannah State College, Georgia Southern College, Valdosta State College, Albany State College, Georgia Southern College, Augusta College, Columbus College, North Georgia College and Armstrong State College.

Students who take the career program will be able to complete their requirements in one or two years. Career program courses, which will be announced later, will be designed to permit the student to enter the employment field immediately upon successful completion of the program. Courses of study will be developed later.

Establish Goals

Developmental courses to assist students in determining their educational goals are also planned. Special studies in reading comprehension, English grammar and composition, mathematics and science will be offered. These courses will be designed for students whose previous level of achievement indicates that they may have difficulty in doing college level work. Students will be permitted to make up their deficiencies before taking regular college courses. Students taking the developmental courses will be allowed to move at their own pace. Because instruction will be individualized and the program flexible, they will leave it when they have attained a reasonable level of proficiency and are considered capable of successful completion of either the transfer or career program.

A continuing education, or community service program, will be developed during the coming year. Non-credit courses of special interest to the people of the Rome area will be offered. All degree programs at Floyd Junior College are based on a "core curriculum." In 1947, the Board of Regents of the University System implemented a "core curriculum" for all its member institutions to facilitate the transfer of credits for fundamental courses and programs among the various schools. The "core curriculum" consists of 90 quarter hours. A student at Floyd Junior College will take 20 hours from each of three general education areas and 30 hours in the major field of his choice. The areas include: Humanities, Natural Science and Math, Social Science, and courses appropriate to the student's major field of study.

Area I, Humanities, will include four English courses—two courses of English composition and two of world literature; Area II, Natural Science and Mathematics—college algebra and pre-calculus mathematics plus an additional course to be chosen from among courses in biology, chemistry, physics, trigonometry, elementary statistics, finite mathematics and analytical geometry and calculus; Area III, Social Science—Western Civilization, American History and American Government.

Courses in Area IV will be appropriate to the student's major field. This area will include courses in art, biology, business administration, chemistry, economics, education, English, French, mathematics, history, music, physics, psychology, science, sociology, and Spanish.

In addition to these 90 quarter hours, a student will take courses of physical education.

The Associate in Science and the Associate in Arts degrees will be offered in the fields of agriculture, agriculture engineering, art, biology, business administration, business education, journalism, language and literature, social science, speech and drama, chemistry, elementary education, forestry, mathematics, physics, pre-dental hygiene, pre-engineering, pre-medical technology, pre-medicine, pre-dentistry, pre-pharmacy, pre-physical therapy, pre-veterinary medicine and secondary education.

Prior to registration in September, a series of orientation programs will be conducted at the college. Each student will be assigned a faculty advisor and together they will plan the student's program of study for the first year.

The orientation program will be planned for various days during the summer and students will be able to choose times convenient to their summer schedules.

College officials have already worked toward accreditation from the Southern Association of Schools and Colleges and full accreditation is expected by 1972, retroactive to the first graduating class. In the meantime, all credits will be accepted by all units of the University System and by most other colleges and universities.

(Continued From Page 3)

"core curriculum" for all its member institutions to facilitate the transfer of credits for fundamental courses and programs among the various schools. The "core curriculum" consists of 90 quarter hours. A student at Floyd Junior College will take 20 hours from each of three general education areas and 30 hours in the major field of his choice. The areas include: Humanities, Natural Science and Math, Social Science, and courses appropriate to the student's major field of study.

In addition to these 90 quarter hours, a student will take
New faculty members selected for Junior College in Floyd

The Board of Regents of the University System of Georgia has named six persons to the faculty of Floyd Junior College and approved the college to grant two degrees.

The college was approved to grant associate degrees in Science and Arts. The Associate in Science degree will be offered in the fields of agriculture, agricultural engineering, biology, business administration, business education, chemistry, elementary education, forestry, mathematics, physics, pre-dental hygiene, pre-engineering, pre-medical technology, pre-medicine, pre-dentistry, pre-pharmacy, pre-physical therapy, pre-veterinary medicine, and secondary education. The Associate in Arts will be offered in art, journalism, language and literature, social science and speech and drama.

Three of the new faculty appointees are from Rome—Mrs. Ruth O. Corlew, appointed instructor in physical education; Mrs. Myrtle J. Jones, assistant professor of English; and Mrs. Susan Ann Howell, part-time instructor in education. Other new faculty members include David Cook, named assistant professor of biology and acting division chairman of natural science and mathematics; Joe Bill Campbell, assistant professor of biology; and James F. Cook Jr., assistant professor of history.

Virginia Native

A native of Norton, Va., Mrs. Corlew received the B.S. degree in physical education from Milligan College and the M.S. degree in health, physical education and recreation from the University of Tennessee. Additionally, Mrs. Corlew has studied at Berry College, the University of Georgia (Extension) and West Georgia College. A teacher at West Rome Junior High School, she is a member of local, state and national associations of health, physical education and recreation, and National, State and local education associations. She resides at 2 Westlyn Court.

Mrs. Jones graduated from Main High School. She received the A.B. degree in English from Clark College and the M.A. degree in education from New York University. She has also studied at Colorado College, the NDEA Institute and Atlanta University. From 1967-69, Mrs. Jones was associated with the Linguistic Research and Demonstration Project of the Rome City School System. From 1969-70, she was a teacher of English at East Rome High School. She also served as chairman of the English department at Main High School.

In 1965 Mrs. Jones was named "Teacher of the Year," the only teacher from Georgia so honored. Mrs. Jones has been a recipient of a John Hay Fellowship and was selected a member of the Committee on Comparative and World Literature in recognition of her work in a humanities program conducted at Main. She resides at 414 Brannham Avenue.

Mrs. Howell attended Shorter and Tift Colleges, receiving the B.S. degree in home economics from Georgia State College for Women. She will receive the Master of Education degree in reading from the University of Georgia in August. During the past year, Mrs. Howell was a reading teacher at West Rome High School. She has also taught in the Floyd County School System, at the Georgia School for the Deaf and at Aragon Elementary School. She is a member of National and state and local education associations and the International Reading Association.

David Cook is presently assistant professor of science and mathematics and has taught at Berry College. From 1949-50, he was stationed in the Army Air Corps. At present, he is working toward a doctorate degree in physics at Georgia Institute of Technology in Atlanta.

NEW FACULTY

(Continued from page 2-A)

Joe Bill Campbell will receive the Ph.D. degree in botany from the University of Georgia in August. He was a System STAR Student at Pike County High School. He received the B.S. degree in agriculture and the M.S. degree in plant genetics from the University of Georgia. He is a native of Chattanooga, Tenn.

James F. Cook will receive the Ph.D. degree in June 1971 from the University of Georgia. He received the A.A. degree from Young Harris College; the B.A. degree in history from Emory University; and the M.A. degree in history from Georgia State University. Presently, he is instructor in history at Georgia State. He has published several articles on the subject of history.

Rome Jaycettes complete plans for Trade Day

More than 25 participants have pre-registered for the Rome Jaycettes Ole Fashioned Trade Day to be held Saturday on the Gaia Shopping Center Parking Lot. According to Mrs. Linda Baird, chairman of the event, the group includes a coin collector, a member of church groups, an imported jewelry dealer, ceramics artist, a hinged dealer, several food concessions and a number of political candidates.

Mrs. Baird reminded those planning to place a booth at the Trade Day that the event is open to anyone desiring to sell, swap or buy. Advance registration may be made by calling 235-2633 or 232-2624. Booth spaces may also be rented on Saturday at col. 4.

JUNIOR COLLEGE
(Cont. from page 3A)
property and casualty insurance, real estate and economic history.
Other courses will include mathematics, political science, accounting, economics and physical education, speech, statistics, and business communications.

Many of the courses in the business curriculum will transfer to other colleges. Dr. Waltravon pointed out:
The business career program will be administered as a part of the Social Science Division, of which Dr. Milton L. Ready is chairman. Dr. Ready, who is also assistant professor of history, will teach the economic history course.

Michael L. Holland, an instructor in business administration, will teach general and cost accounting, data process. Dr. Holland has a B.S. degree in business administration from the University of Houston and an A.B. degree in accounting from the University of Georgia.

He is the author of several articles on Georgia history and his book, "The Malcontents in Trust," is scheduled to be published soon. Dr. Ready has taught at the University of Houston and the University of Georgia.

He is a member of the Southern Historical Association, the American Historical Association, and the Organization of American Historians.

Prior to joining the Floyd Faculty, Holland was an accountant for the University of Georgia Agricultural Experiment Station. He received the B.S. degree in mathematics from Auburn University and the Master of Accounting degree from the University of Georgia.

The human skeleton is said to be made up of about 200 separate bones.

Floyd College OKs Core Curriculum

ROMA, Ga. — The core curriculum subcommittee of the University System Advisory Committee has approved a core curriculum for Floyd Junior College.

The advisory committee is composed of the presidents of all institutions within the university system of Georgia. The subcommittee is headed by Dr. George Christenberry, president of Augusta College. Floyd Junior College is a member of the university system.

According to Dr. David McCrorie, Floyd president, the subcommittee's action insures that all courses offered by the college within the core curriculum will be transferable to any other college or university within the University System.

"For example," he explained, "a student majoring in elementary education who completes requirements for the associated degree in degree at Floyd will now be able to transfer to any other university system school as a junior without losing any credit he earned at Floyd.

The board of regents of the university system implemented the core curriculum in 1967 to help students as they work for baccalaureate degrees within and among the system schools. The core curriculum was designed to facilitate the transfer of credit for functional mental courses and programs among the system's 27 institutions.

- AT FLOYD, the core curriculum is composed of 90 quarter hours. According to Dean Wesley Walraven, students will take courses totaling 20 quarter hours from each of three general education areas and 30 quarter hours within their major areas of study, such as biology, elementary education or physical education.

The three general education areas are humanities, natural science and mathematics and social science. Courses in these areas include English, mathematics, biology, chemistry, physics, history and political science. The remaining 30 quarter-hour courses must be specifically related to the student's major field, the dean said.

Classes at Floyd begin Sept. 30, but applications for admission to the fall quarter continue to be accepted.

Persons interested in applying should submit an application form, high school transcript, and scores from the scholastic aptitude test of the College Entrance Examination Board to the Office of Admissions.

Floyd College slates meetings on mental health

Meetings concerning Floyd Junior College's new mental health program, to be instituted at the college in September, will be held next Thursday, Aug. 9 at 3:30 p.m. and 7:30 p.m. and Saturday, Aug. 11 at 9:30 a.m. All persons interested in learning more about the program are asked to attend one of these sessions in room B-34 in FJC's Academic Building.

Although the meeting is primarily intended for persons interested in enrolling in the program or in taking specific courses, those with a general interest are invited to attend. Topics to be discussed include program objectives and goals, specific course requirements, a general overview of the work for which graduates will be trained, admission requirements and other related subjects.

Coordinated by James McKeel, assistant professor of psychology at FJC, the two meetings will be held in room B-34. See page 3B, Col. 3.

FLOYD COLLEGE

Floyd College OKs Core Curriculum

ROME, Ga. — The core curriculum subcommittee of the University System Advisory Committee has approved a core curriculum for Floyd Junior College.

The advisory committee is composed of the presidents of all institutions within the university system of Georgia. The subcommittee is headed by Dr. George Christenberry, president of Augusta College. Floyd Junior College is a member of the university system.

According to Dr. David McCrobie, Floyd president, the subcommittee's action insures that all courses offered by the college within the core curriculum will be transferable to any other college or university within the University System.

"For example," he explained, "a student majoring in elementary education who completes requirements for the associate in science degree at Floyd will now be able to transfer to any other university system school as a junior without losing any credit he earned at Floyd."

The board of regents of the university system implemented the core curriculum in 1967 to help students as they work for baccalaureate degrees within and among the system schools. The core curriculum was designed to facilitate the transfer of credit for fundamental courses and programs among the system's 27 institutions.

AT FLOYD, the core curriculum is composed of 90 quarter hours. According to Dean Wesley Walraven, students will take courses totaling 20 quarter hours from each of three general education areas and 30 quarter hours within their major areas of study, such as biology, elementary education or physical education.

The three general education areas are humanities, natural science and mathematics and social science. Courses in these areas include English, mathematics, biology, chemistry, physics, history and political science. The remaining 30 quarter-hour courses must be specifically related to the student's major field, the dean said.

Classes at Floyd begin Sept. 30, but applications for admission to the fall quarter continue to be accepted.

Persons interested in applying should submit an application form, high school transcript, and scores from the scholastic aptitude test of the College Entrance Examination Board to the Office of Admissions.

Carroll Sees Heavy Vote Today

TON, Ga. — About 50,000 registered voters in the county and the number who will vote is expected to reach that of the 1968 presidential election, when more than 12,000 cast their ballots.

Running in the Democratic primary for the Post 1 seat of the Georgia Legislature are J. K. Patterson, the incumbent, and Frank Carroll. No Republican candidate has entered the race for the seat.

In the Post 2 race, Democratic incumbent Elmer Bohannon will be opposed by Felix Garrett and Ruffin Harrod. The only Republican seeking the seat is Aubrey Guffey.

Five men, all of whom are Democrats, are running for the office of coroner. They include Carl Chandler, Robert J. Green, Jimmie Jones, Jelp Robinson, and J. W. Warren.

State Sen. Lamar R. Plankett of Bowdon is unopposed in the 30th Senatorial District contest.

Also in Wednesday's primary, members of the Carroll County Democratic Executive Committee will be elected.

Guards in Sick-Out

NEW YORK (UPI) — More than half the guards at two city prisons staged a sick-out to protest long overtime hours and the lack of manpower.

Junior college to offer unique approach to physical education

EDITOR'S NOTE: Later this month, the doors will open at Floyd County's newest institution of higher learning, Floyd Junior College. Beginning today, the News-Tribune is offering a series on the physical education and athletic programs at the college. The first article deals with the college's unique approach to physical education.

The physical education program at Floyd Junior College, which opens for classes on September 20, will differ almost as much from traditional physical education programs as English differs from mathematics.

At Floyd, physical education will involve more than just "free play" or physical conditioning. As Jerry Shelton, Floyd's director of Health, Physical Education and Recreation, has defined it, the program will emphasize physical skills and knowledge. It will be an academic program in which all students will participate.

"Often, physical education on the college level is nothing more than a repetition of high school physical education programs," Shelton said. "The traditional approach has involved primarily physical conditioning activities. Consequently, a large segment of the student body has been eliminated from participation by physical handicaps or limitations. Military veterans, married students, and older students have been exempted from participation. On some college and university campuses, those exempted total 40 to 50 percent of the total student population."

"We have no objection to physical conditioning," he inserted. "It is important. However, due to the structure of physical education-programs in most colleges, we (physical educators) don't accomplish what we want to accomplish; that is, physically educate an individual so that he can more fully participate in physical activities throughout his life."

Shelton said that the most commonly accepted objectives of physical education include development of motor skills; physical development; enhancement of social attributes; development of constructive approaches to the use of leisure time; and development of mental faculties.

"During the various phases of our program, we hope to be able to fulfill these objectives," he said.

Shelton believes that an academic approach to the study of physical education will more completely fulfill these goals.

"Making physical education more academic conforms to the views of modern educators," he said. "It is believed that a physical education class should be instructive in nature, not totally for free play, although a time for free play is provided during intramural athletic activities and leisure time."

Shelton puts down those persons who claim there is no body of knowledge about physical education. "There is a great deal of knowledge pertaining to the field," he declared. "Textbooks on the subject are available and will be required for most physical education classes at Floyd. There also will be written examinations."

Most college physical education classes meet only twice a week, but classes at Floyd will meet three times a week. Two hours credit, rather than one, will be given those successfully completing courses.

Normally, all full-time and part-time students who are under 40 years of age and working toward degrees will be required to complete the requirements. This includes those students who have been exempt, such as veterans, married students and students with physical limitations or disabilities.

Physical education classes will be offered both during the day and evening.

"In some education circles, the physical education profession has come under attack," Shelton commented. "People have been dissatisfied with the traditional program because they feel it doesn't meet the needs of modern society."

"We're trying to institute the kind of program that students, as well as educators at many colleges, have been saying is needed on the college campus," he concluded. "We believe the program will accommodate the needs of all students."

Shelton and Mrs. Ruth Corlew, former health and physical education teacher at West Rome Junior High School, will be the instructors during the coming year. As the program expands and enrollment increases, the staff also will be increased, Shelton explained.

An honor graduate of Berry College and Middle Tennessee State University, Mr. Corlew has received the Master of Arts degree in health and physical education. Shelton is working toward the Doctor of Education degree in health and physical education at the University of Georgia.
Academic touch to physical education

Floyd Junior College’s temporary location during the coming fall quarter, which begins Sept. 27, will not greatly handicap the college’s physical education program. Jerry Shelton, Floyd’s director of Health, Physical Education and Recreation, believes "in our approach to physical education," Shelton explained. We plan to emphasize the academic nature of the subject to a certain extent. Therefore, the only courses which are the winter quarters, will not involve any physical activity. In fact, this approach is virtually a necessity during this coming year. Physical education classes will begin during the spring quarter when the college will have settled on its permanent campus on U.S. 27 South about six miles from downtown Rome. The college will hold classes in the Metro Buildings on East Third Avenue while construction of permanent facilities is underway on the campus. Most construction work is expected to be completed by the beginning of the winter quarter.

All full-time and part-time students will take six courses in physical education, Shelton said. This is similar to the requirement at all junior colleges and universities throughout the country and of all units of the University System of Georgia, he explained. Floyd is a unit of the University System.

To accommodate students who will be unable to attend classes during the day, physical education courses also will be offered at night. Of the six courses to be taken by all students, two will be required and four will be elective. The two required courses, which Shelton said should be taken during the first and second quarters of enrollment at Floyd Junior College, are entitled "Concepts in Physical Education" and "Concepts in Health Education," Shelton said. Floyd will select the remaining four courses from the Physical Education Service Program which is organized into three separate but closely related programs. The Service Program includes the Health Education Program, designed primarily for students who plan to major in Health; the Physical Education Program, designed for physical education majors; and the Personal Health Program, designed for students in other majors. Courses enrolled during the evening schedule and students who have difficulty adjusting physical education classes during the day schedule because of regular work will be offered programs leading to a major or minor in Physical Education as well as in Recreation. These programs are designed for students who plan to transfer after the first two years at Floyd to a four-year college or university and continue their study in the selected area. Professional courses required for the Associate degree in Health and Physical Education include Human Anatomy, Human Physiology, Introduction to Education, Foundations of Physical Education, Foundations of Health Education, and General Psychology.

Principles of Sociology

Professional courses required for the Associate degree in General Education include Human Anatomy, Human Physiology, Human Physiology, Introduction to Education, Principles of Physical Education, Foundations of Physical Education, Foundations of Health Education, and General Psychology.

This degree program was formulated for students who will terminate their college education at the end of two years. A total of nine professional courses in Recreation and Physical Education are required for this degree.

The second required course, "Concepts in Physical Education," will be offered. It is designed to stress concepts, principles, and values of physical education, Shelton explained.

Activity courses will be offered for the first time during the spring quarter. Courses will include basketball, baseball, volleyball, archery, frisbee, bowling, golf, tennis, soccer, and square dance.

Shelton said a wide range of activities will be offered in the intramural program but he added, "The comprehensiveness of the program will be determined by the quality of facilities and student interest."
