

Ph.D., instructor in speech and drama; and John A. Ricks, III, M.A., instructor in history.

West Georgia College

PROFESSOR—Donald Lloyd Crawford, Ph.D., associate professor of business education; Thomas J. Crawford, M.S., associate professor of geology; Edna Earl Edwards, Ph.D., associate professor of education and English; Arthur Wendel Gardner, Ph.D., associate professor of biology; Lewis H. Larson, Jr., Ph.D., associate professor of anthropology; and Georgia M. Martin, Ed.D., associate professor of counseling.

ASSOCIATE PROFESSOR—John Sydney Cook, Jr., LL.M., assistant professor of business administration; Mary B. Creamer, Ph.D., assistant professor of education; Winslow Cope Goodwin, Ph.D., assistant professor of history; Jack Laverne Grogan, Ph.D., assistant professor of chemistry; Alan David Hecht, Ph.D., assistant professor of geology;

Kathleen S. Hunt, M.A., assistant professor of library; John Wilton Key, Ed.D., assistant professor of education; Alfred Roy Owen, Ph.D., assistant professor of education; Theodore Norman Van Cott, Ph.D., assistant professor of economics; and David Charles Weaver, Ph.D., assistant professor of geography.

ASSISTANT PROFESSOR—Buell Etheridge Cobb, Jr., M.A., instructor in English; Charles L. Faires, M.Ed., instructor in instructional media; Tiparat Schumrum Galvin, M.A., instructor in psychology; Carole Rupe Kennedy, M.A., instructor in foreign languages; Hugh C. Maxwell, M.Ed., instructor in education; Arthur Earl Riedel, M.M., instructor in music; Martha Ann Saunders, M.A., instructor in English; and Betty Sue Tolbert, M.F.A., instructor in music.

Abraham Baldwin Agricultural College

ASSOCIATE PROFESSOR—Ronald E. Jones, Ph.D., assistant professor of agricultural economics; and William Thomas Wheeler, Ph.D., assistant professor of mathematics.

ASSISTANT PROFESSOR—Ronald L. Evans, M.S., instructor in recreation; Gale D. Sitton, M.Ed., instructor in reading; and Ted N. Williams, M.M.E., instructor in humanities.

Albany Junior College

ASSOCIATE PROFESSOR—Marilyn L. Malphurs, M.Acc., assistant professor of accounting; Betty D. Parton, M.Ed., assistant professor of dental hygiene; and McKellar Townes, M.A., assistant professor of English.

ASSISTANT PROFESSOR—Vivian W. Graydon, M.A., instructor in reading; Mary G. Hamilton, M.S., instructor in library science; Anne N. Power, M.Ed., instructor in counseling; Patricia Ann Solomon, M.Ed., instructor in reading; and Anita R. Whiteman, B.S., instructor in dental hygiene.

Brunswick Junior College

ASSOCIATE PROFESSOR—J. Lamar Holloway, M.Ed., assistant professor of technical education.

Clayton Junior College

PROFESSOR—Avery H. Harvill, P.E.D., associate professor of physical education.

ASSOCIATE PROFESSOR—Naoma M. Price, M.A.Ed., assistant professor of psychology and education.

ASSISTANT PROFESSOR—James E. Bright, M.A., instructor in mathematics; Rebecca A. Halyard, M.S., instructor in biology; Doris A. Holloway, M.M., instructor in music; Dennie R. Kelley, Ed.S., instructor in physical education;

Pedro R. Morales, M.A., instructor in Spanish; Brooke M. Pridmore, M.S., instructor in physics; William M. Tomory, Ph.D., instructor in English; and Paul W. Wiens, M.M.E., instructor in music.

Dalton Junior College

ASSOCIATE PROFESSOR—Barbara Ann Cernansky, Ph.D., assistant professor of physics and mathematics.

ASSISTANT PROFESSOR—Lorenz Nathaniel Gregg, M.Ed., instructor in business administration; and Dorothy Lynn Smith, M.Ed., instructor in business administration.

Floyd Junior College

PROFESSOR—Wesley Walraven, Ph.D., associate professor of biology.

ASSOCIATE PROFESSOR—Charles David Cook, A.B., assistant professor of biology; Aline R. Frost, M.A., assistant professor of nursing education; Belen D. Nora, M.A., assistant professor of nursing education; Daniel C. Pantaleo, Ph.D., assistant professor of chemistry;

William George Pullen, Ph.D., assistant professor of history; Jerry W. Shelton, M.A., assistant professor of physical education; and Hubert H. Whitlow, M.A., assistant professor of library science and political science.

ASSISTANT PROFESSOR—Kenneth L. Anderson, M.A., instructor in English; Jeanette C. Bauer, M.Ln., instructor in library science; Thomas R. Berry, M.B.A., instructor in economics; Ruth O. Corlew, M.S., instructor in physical education; Michael L. Holland, M.Acc., instructor in business administration;

Sheila Jean McCoy, M.A., instructor in French; Joseph Mayson, M.A., instructor in English; Michael S. Schuller, M.A., instructor in psychology; and Elsie L. Washington, M.S., instructor in mathematics.

Gainesville Junior College

ASSOCIATE PROFESSOR—Martha T. Hatcher, Ed.D., assistant professor of biology; Glenda B. Michaels, Ph.D., assistant professor of biology; Norma R. Seerley, Ph.D., assistant professor of sociology; and Virginia C. Simpson, M.A., assistant professor of history.

ASSISTANT PROFESSOR—William B. Edmonds, M.Ed., instructor in humanities; and Brenda S. Purvis, M.L.S., instructor in library science.

(Continued on Page 12)

Georgia College Dean Listed Among 12 New Administrators

THE APPOINTMENT OF A DEAN at Georgia College and appointments of 11 other administrators at various institutions of the University System were approved by the Board of Regents at the May 8 meeting.

- Carolyn C. Gettys was named dean of students at Georgia College, effective on July 1, 1974.

Mrs. Gettys, who was born on April 29, 1916, in Mt. Vernon, Georgia, holds the A.B. degree from Limestone College and the M.S.W. degree from Florida State University. She joined the staff of Georgia College in 1965 as dean of students. After the college became coeducational in 1967, she assumed in 1968 the title of associate dean of students—working primarily with female students—and she has held this position since that time.

- Louis J. Davis was named director of the Division of Public Service at Georgia State University, effective on April 15, 1974.

Mr. Davis, who was born on August 13, 1935, in Atlanta, Georgia, holds the B.S. degree from Georgia State University and is scheduled to receive the M.Ed. degree from Georgia State University at the end of the 1974 spring quarter. He joined the staff of Georgia State as a conference coordinator at the Urban Life Center in 1970, and he had served as assistant director of the Division of Public Service at Georgia State since 1971.

- Ethel P. Hall was named coordinator of the Medical College of Georgia School of Nursing at Athens, effective on June 1, 1974.

Mrs. Hall, who was born on October 10, 1921, in Brunswick, Georgia, holds the B.S.N. and M.S.N. degrees from the Medical College of Georgia. She has served as an instructor in maternal and child nursing at the Medical College of Georgia since 1973.

- Linda A. Ellis was named chairman of the Department of Mental Health Nursing at the Medical College of Georgia, effective on June 1, 1974.

Mrs. Ellis, who was born on July 26, 1945, in Statesboro, Georgia, holds the B.S.N. and M.S.N. degrees from the Medical College of Georgia. She joined the faculty of the Medical College as an instructor in mental health nursing in 1972, and she has served as an assistant professor since 1973.

- Mary D. Ware was appointed chairman of the Department of Distributive Nursing at the Medical College of Georgia, effective on June 1, 1974.

Mrs. Ware, who was born on January 6, 1948, in Atlanta, Georgia, holds the B.S. and M.N. degrees from Emory University. She has served as an instructor in distributive nursing at the Medical College of Georgia since 1973.

- Mac A. Callaham was named head of the Department of Biology at North Georgia College, effective in the 1974 fall quarter.

Dr. Callaham, who was born on August 30, 1936, in Fort Payne, Alabama, holds the M.A. and Ed.S. degrees from

George Peabody College and the B.S. and Ph.D. degrees from the University of Georgia. He joined the faculty of North Georgia College as an assistant professor of biology in 1963. He was promoted through the ranks at that institution to assume the position of professor of biology in 1972, his present position.

- Julian J. Schreur was appointed head of the Department of Physics and Astronomy at Valdosta State College, effective in the 1974 fall quarter.

Dr. Schreur, who was born on January 19, 1939, in Kalamazoo, Michigan, holds the B.S. degree from Kalamazoo College and the Ph.D. degree from the University of Arizona. He joined the faculty of Valdosta State College as an assistant professor of physics and astronomy in 1970, and he has served as an associate professor and acting head of the Department of Physics and Astronomy at Valdosta State since 1973.

- Gordon L. Teffeteller was named head of the Department of History at Valdosta State College, effective in the 1974 fall quarter.

Dr. Teffeteller, who was born on September 12, 1931, in Maryville, Tennessee, holds the A.B. degree from Valdosta State College, the M.A. degree from Duke University, and the Ph.D. degree from Florida State University. He joined the faculty of Valdosta State College as an assistant professor of history in 1969, and he has served as an associate professor at Valdosta State since 1972.

- William T. Simons was named chairman of the Department of Sociology/Anthropology at West Georgia College, effective in the 1974 summer quarter.

Dr. Simons, who was born on January 30, 1933, in Miami, Florida, holds the B.S., M.S., and Ph.D. degrees from Florida State University. He has served as an associate professor of sociology at West Georgia College since 1973.

- Rollan Henry, Jr. was named registrar and director of admissions at Atlanta Junior College, effective on July 1, 1974.

Mr. Henry, who was born on December 10, 1928, in Montgomery, Alabama, holds the B.S. and M.Ed. degrees from Tuskegee Institute. He has served as registrar at Savannah State College since 1970.

- Reginald New was named comptroller at Atlanta Junior College, effective on April 1, 1974.

Mr. New, who was born on August 11, 1930, in Harrison, Georgia, holds the B.B.A. degree from Georgia State University. He joined the staff of the Board of Regents as a senior auditor in 1969, and he had served as chief internal auditor for the Board of Regents since 1971.

- Charles David Cook was named chairman of the Division of Natural Science and Mathematics at Floyd Junior College, effective on July 1, 1974.

Mr. Cook, who was born on April 27, 1934, in Cherokee County, Alabama, holds the A.B. degree from Jacksonville State College, and he is scheduled to receive the Ph.D. degree from the University of Georgia in the summer of 1974. He has served as an assistant professor of biology and acting chairman of the Division of Natural Science and Mathematics at Floyd Junior College since 1970. ■

Administrators (Continued from Page 3)

instructor in mathematics. He has served as coordinator of the Higher Education Achievement Program at that institution since 1973.

- George C. Chapman was named dean of students at Gordon Junior College, effective on July 1, 1974.

Dr. Chapman, who was born on November 29, 1943, in Sylvester, Georgia, received the B.S. degree from Valdosta State College and the M.S. and Ph.D. degrees from the University of Georgia. He has served as an assistant professor of biology at Gordon Junior College since 1973.

- Joseph P. Bray, Jr. was named chairman of the Division of Special Studies at Gordon Junior College, effective on July 1, 1974.

Mr. Bray, who was born on May 28, 1925, in Yadkinville, North Carolina, received the B.S. and M.A. degrees from Appalachian State University. He has served as an assistant professor of English and dean of students at Gordon Junior College since 1972.

- John W. Fink was named assistant professor of English and chairman of the Division of Special Studies at South Georgia College, effective on July 15, 1974.

Dr. Fink, who was born on July 29, 1939, in Cincinnati, Ohio, received the B.A. and M.A. (secondary education) degrees from the University of New Mexico and the M.A. (linguistics) and Ed.D. degrees from Ball State University. He has served as an assistant professor of English and linguistics at Rhode Island College since 1973. ■

Plant Funds Allocated

PHYSICAL PLANT REHABILITATION funds totaling \$51,820 were allocated to eight units of the University System by the Board of Regents at the May and June meetings.

These allocations and the projects for which the funds will be used are as follows:

Augusta College—\$950, for change order to contract for the remodeling of Alumni Hall, and \$8,400, for design fee for business operations building; Columbus College—\$2,000, for remodeling of chemistry laboratory; Georgia Southern College—\$2,000, for construction of telephone building, and \$3,888, contingency allowance for telephone building; North Georgia College—\$400, for water purification testing; Savannah State College—\$1,032, for repair of heating system in dining hall and a dormitory, and \$18,250, for Regents' share of a road project; West Georgia College—\$8,900, for demolition of old administration building; Floyd Junior College—\$5,000, for design fee for addition to physical plant building; and Skidaway Institute of Oceanography—\$1,000, for shop construction.

Also approved at the June meeting were reallocations of rehabilitation funds, as follows:

Georgia Southern College—\$27,000, for construction of telephone building; Savannah State College—\$3,827, for repair of heating system in dining hall and a dormitory; and Albany Junior College—\$19,130, for computer center. ■

SEVEN BUILDING PROJECTS WILL COST \$13.5 MILLION

SEVEN NEW CONSTRUCTION PROJECTS, with project budgets totaling \$13,500,000, were authorized in principle by the Board of Regents at the June 11-12 meeting in Atlanta.

Another project was authorized and steps to advance several previously authorized construction projects were also approved at the same meeting.

New Projects Authorized in Principle

The projects, institutions, and project budgets authorized in principle are as follows:

- Addition to Architecture Building, Georgia Institute of Technology; \$2,500,000.

- Remodeling of Murphey Building, Medical College of Georgia; \$1,250,000.

- Radiation Clinic, Medical College of Georgia; \$3,500,000.

- Environmental Design Building, University of Georgia; \$2,500,000.

- Addition to Law Library, University of Georgia; \$1,150,000.

- Auditorium-Fine Arts Building, Bainbridge Junior College; \$1,250,000.

- Library, Gordon Junior College; \$1,350,000.

These projects were authorized by the Regents in principle for planning purposes. "At such time as we have received satisfactory programs from the institutions involved and it appears desirable to proceed further with these projects in consideration of both the availability of design funds and the availability of construction funds, we will recommend to the Board appointment of architects to prepare preliminary plans on the projects," the Regents were told in a report from their Committee on Buildings and Grounds, recommending the approval of these projects. "These projects will not be assigned to a bond issue until appropriate and adequate construction funds are available, and will be subject to review with regard to the relative priorities at the time that funds become available," the Regents were told.

Other New Project Authorized

Authorization was given for the construction, without requirement for further approval, of an Addition to Warehouse Shop Building at Floyd Junior College, with a project budget of \$127,911.

Also authorized was the awarding of a construction contract for this project to Network Building Systems, Inc., Rome, at the low base bid (less two alternates) in the amount of \$115,341.

Under the same authorization, this project will be financed from the Regents' capital outlay cash appropriation for 1973-74.

The present warehouse-shop building at Floyd Junior College contains only 5,055 square feet of space, and "is inadequate for the size of the school," according to the agenda.

recommending the authorization of the project and the awarding of the construction contract.

Preliminary Plans

- Preliminary plans for the Addition to Ecology Building at the University of Georgia, with a project budget of \$458,220, were approved.

The appointment of Morris Hall and Peter Norris, Atlanta, to prepare final plans and specifications for this facility, also was approved.

This project is designed to accommodate the administrative, research, training, and service functions of the Institute of Natural Resources of the University of Georgia. The project, unfunded at present, cannot be executed until the Ecology building, now under construction, is completed, the Regents were told.

- Preliminary plans for the Addition to Gymnasium at Savannah State College, with a project budget of \$225,000, were approved.

The appointment of Nowell and Ritzert, Inc., Savannah, to prepare final plans and specifications for this facility, also was approved.

This project will provide an additional bay on the existing gymnasium for additional seating consisting of 1,040 seats in a folding-bleacher arrangement, the Regents were told. When the bleachers are collapsed, an area of approximately 3,600 square feet of floor space will be added to the building.

Funds for construction of this project are not available at the present time, the Regents were told, but funds have been provided for the preparation of the design in order to have it available at any time that construction funds become available.

Project Budget Increases

- The project budget for the Fine Arts Building Renovation at the University of Georgia was increased \$64,390, to a new total of \$1,064,390.

Authorization was also given for the awarding of the construction contract on this project to Terry Development Corporation, Athens, at the contract amount of \$931,170.

This project, the first phase of the remodeling of the Fine Arts building at the university, was bid on June 11, 1974. Terry Development Corporation submitted the low bid. The contract will be awarded at the low base bid plus two add alternates, and, under the Regents' authorization, will be financed from available funds in the Regents' capital outlay cash appropriation for 1973-74.

- The project budget for the Home Management Houses at Georgia Southern College was increased \$154,865, to a new total of \$488,455.

Authorization was also given to request that the Georgia Education Authority (University) award the construction contract on this project to the low bidder, Stewart and Associates Construction, Inc., Baxley, at the contract amount of \$400,920.

This project, consisting of a series of four individual residential laboratory buildings, a housemother's building, and a commons building for the teaching of actual living conditions to home economics students at Georgia Southern, was bid on May 16, 1974. The increase in the project budget was

requested following the underestimation of construction costs by the architect, the Regents were told.

- The project budget for the Library at Savannah State College was increased \$693,060, to a new total of \$2,627,344.

This project budget increase was requested to enable this project to go to bid.

- The project budget for the Classroom building at Savannah State College was increased \$38,265, to a new total of \$1,422,695, in ratification of administrative action.

This project budget increase was approved administratively by Chancellor George L. Simpson, Jr., following receipt of construction bids on May 21, 1974, so that the contract for the construction of the building could proceed as rapidly as possible, the Regents were told.

- The project budget for the Bookstore at Valdosta State College was increased \$124,435, to a new total of \$811,103.

This project, consisting of an addition to the Student Center and containing a bookstore and activity facilities, was bid on May 28, 1974. The project budget increase will enable the Georgia Education Authority (University) to issue the construction contract on the project.

Construction Contract

The construction contract for the Dairy Cattle Facility at the Coastal Plain Experiment Station, Tifton, of the University of Georgia was authorized to be awarded to Jones Construction Company, Tifton, in the amount of \$646,215.

Under the same authorization, the project will be funded from Regents' capital outlay cash appropriation for 1973-74.

Funding of Project

The requesting of the Georgia Education Authority (University) to insert a project at the University of Georgia into the Series 1969 Bond Issue, Exhibit "A", Group II, was approved.

This project, Main Power Plant Addition, with a project budget of \$409,416, was authorized by the Board of Regents in March, 1973, and has "remained in an unfunded status to date," the Regents were told. "The bidding documents are complete and the legal arrangements are virtually complete so that this project can be bid within a relatively short period of time."

Information Items

Three change orders and an increase in the loose equipment line item of a project budget, approved administratively by the vice chancellor for construction and physical plant, were presented as information to the Board of Regents.

- A change order of \$13,303, for changes in the mechanical design on the Annex to Moore Hall at Fort Valley State College, was approved.

- A change order of \$2,400, for connection of a dormitory project to the underground oil fuel storage and distribution system at North Georgia College, was approved.

- A change order of \$2,200, for the redesign of the sidewalk on the north entrance of the Classroom building project at Clayton Junior College, was approved.

- An increase of \$859 in the loose equipment line item of the project budget for the Physical Education building at Georgia College, to accommodate the increased cost of already specified loose equipment, was approved. ■

THE System Summary

PUBLICATION OF THE UNIVERSITY SYSTEM OF GEORGIA

VOL. 9, NO. 1—JANUARY, 1973

Reorganization Approved; Degrees and Majors Added

THE ESTABLISHMENT OF FOUR SCHOOLS at West Georgia College and the reorganization of the administrative structure of that institution were authorized by the Board of Regents at the January 10 meeting.

The implementation of new degrees and majors at three institutions and the redesignation of an existing major at one institution were also authorized at the same meeting.

New Schools and Reorganization

The authorization for West Georgia College to establish four schools and to implement a new administrative structure will become effective on July 1, 1973.

The new academic units, which will replace six divisions, will be the School of Arts and Sciences, the School of Business, the School of Education, and the Graduate School.

The School of Arts and Sciences will be created from the Humanities, Science and Mathematics, and Social Sciences Divisions. The School of Business will be created from the Business and Economic Studies Division. The School of Education will be created from the Education Division, and the Graduate School will be created from the Graduate Studies Division.

Each of the new Schools will be headed by a dean rather than a chairman, as are the existing divisions.

The new administrative structure approved for the College designates three officers to coordinate administrative functions of the institution.

The vice president of the College, as one of these three officers, will assume the title of vice president and dean of the college and will be the chief academic officer of the College and the chief adviser to the president of the College. All deans will report to the vice president and dean of Faculties.

Two other administrative officers designated in the reorganization action will be the director of Fiscal Affairs, an existing position, and the director of College Relations and Development, a position to be created from that of assistant to the president and director of Public Affairs.

A new position, associate dean of Faculties, for the second academic officer of the College will be created. The associate dean of Faculties will, among other duties, supervise operations of the four new Schools and perform the duties

(Continued on Page 15)

REGENT JAMES D. MADDOX BEGINS SEVEN-YEAR TERM

THE APPOINTMENT of James D. Maddox, Rome, to serve a seven-year term as a member of the Board of Regents from the Seventh District was made by Governor Jimmy Carter on January 16. The term will end on January 1, 1980.

Mr. Maddox, an attorney, was born in Rome on December 8, 1921. He was elected by the Board of Regents in December, 1972, to serve the unexpired portion of the seven-year term for the Seventh District position of James V. Carmichael, Marietta, who died in November, 1972. He was sworn in by Governor Carter on December 21 for the unexpired portion of the Carmichael term, which ended on January 1, 1973.

The election of the Rome attorney to serve the unexpired portion of the Carmichael term occurred after the Regents were told by Chairman W. Lee Burge that Governor Carter had indicated his intention to name Mr. Maddox to serve a full seven-year term as the Seventh District member.

When a vacancy on the Board of Regents occurs before the end of a prescribed term, the Board elects a replacement to serve until a successor is appointed by the Governor as provided by the state constitution. The procedures governing appointments by the Board and by the Governor to fill unexpired terms are set forth in the constitution. ■

Regents Agree to Look Into Need for Wayne County Unit

A STUDY OF THE FEASIBILITY of establishing a University System junior college in Wayne County was authorized by the Board of Regents at the January 10 meeting. The study and the preparation of a report of findings are to be performed by the Regents' staff.

The feasibility study was authorized at the conclusion of a presentation asking that the Regents renew consideration of a December, 1970, request, submitted by the Jesup and Wayne County Chamber of Commerce, that Jesup-Wayne County be selected as a site for a future junior college.

The presentation at the January Regents' meeting was made by a delegation from the Wayne County Junior College Study Commission. The delegation was headed by State Senator Roscoe E. Dean, Jr., Jesup. ■

• Preliminary plans for the construction of the Vocational-Technical Facility at Brunswick Junior College, with a project budget of \$452,865, were approved.

The appointment of Abreu and Robeson, Inc., Brunswick, to prepare final plans and specifications for this project also was authorized.

This project provides for a 15,500-square-foot building designed to house the vocational-technical program in existing and additional similar programs being planned for implementation. The building, to be located on the east side of the campus, will contain four instructional units to provide teaching areas for the existing program in welding and the additional programs in auto mechanics, machine shop, and heating-ventilating-air conditioning. Each of the four units will contain a large laboratory-shop area, a classroom, an office and tool and storage rooms.

Project Budget Increases

Increases in project budgets for five projects were approved and authorized as follows:

• Fine Arts Building, Armstrong State College—increased from \$2,122,000 to a new total of \$2,442,455.

This budget increase was requested following the receipt, for the second time, of construction bids which exceeded the original cost estimate for the project.

• Classroom Building, Augusta College—increased \$40,503, for a new total of \$840,137.

This budget increase, ratified by the Regents, was administratively approved by the Chancellor and the Chairman prior to the January meeting. It will provide for a five percent project cost increase which has resulted from escalation and inflation of prices during the six-month period since design of the project was completed. This six-month delay was necessary to allow for the completion of legal arrangements required in order for the project to comply with federal and state regulations regarding use of the land where the planned building will be located.

• Infirmary, Fort Valley State College—increased \$19,607, for a new total of \$374,913.

This budget increase, ratified by the Regents, was administratively approved by the Chancellor and the Chairman prior to the January meeting in order not to delay start of construction. It was requested following the receipt of construction bids which exceeded the original cost estimate for the project.

• Student Center, Kennesaw Junior College—increased \$17,611, to a new total of \$1,777,065.

This budget increase was requested following the receipt of construction bids which exceeded the original cost estimate for the project.

• Warehouse Building, Kennesaw Junior College—increased \$22,860, to a new total of \$375,374.

This budget increase was requested prior to acceptance of the order to allow for the architect's increase in his estimated cost of the project. The revision in the estimate reflects increasing costs in utility construction. ■

Awards for Building Projects In 1972 Almost \$33 Million

TWENTY-THREE CONTRACTS for construction projects at institutions of the University System were awarded during the 1972 calendar year. The project budgets of these facilities total \$32,967,281.

Two new junior colleges of the University System, Bainbridge Junior College and Emanuel County Junior College, are included in these projects.

The projects include 30 buildings, containing areas totaling 1,341,579 square feet, and two other projects.

The projects, the areas of the buildings, and the project budgets are as follows:

Georgia Institute of Technology—Hemphill Electrical Feeder, \$229,200; and New Chillers in Main Plant, \$1,832,840.

Georgia State University—Parking Deck, 369,554 square feet, \$1,943,060; and Plaza, Phase II, 16,359 square feet, \$505,646.

Medical College of Georgia—Dugas Building Remodeling, 41,288 square feet, \$1,244,697.

University of Georgia—Cattle Feeding Facilities, Coastal Plain Experiment Station, 14,414 square feet, \$694,666; Dairy Science Center, 76,837 square feet, \$1,473,459; Ecology Building, 32,966 square feet, \$1,607,644; General Research Building, 51,417 square feet, \$1,864,300; Mary Lyndon Hall Renovation, 34,887 square feet, \$577,824; Swine Research Center, 15,546 square feet, \$391,412; and Swine Research Center, Coastal Plain Experiment Station, 14,265 square feet, \$411,999.

Columbus College—Lecture Hall, 29,133 square feet, \$1,273,384; and Library, 99,259 square feet, \$2,268,735.

Fort Valley State College—Infirmary, 7,946 square feet, \$376,592.

Georgia Southern College—Library, 141,084 square feet, \$4,137,437.

North Georgia College—Dormitory, 60,952 square feet, \$1,947,957.

West Georgia College—Food Service Building, 45,980 square feet, \$1,632,836.

Bainbridge Junior College—Initial Campus Facilities, 73,000 square feet, \$2,000,000.

Clayton Junior College—Classroom Building, 42,758 square feet, \$1,398,729.

Dalton Junior College—Student Center Addition, 32,523 square feet, \$1,137,563.

Emanuel County Junior College—Initial Campus Facilities, 80,430 square feet, \$2,000,000.

Floyd Junior College—Library and Addition to Classroom and Student Center, 60,981 square feet, \$2,017,301. ■

Change of Address

Prompt notice of address change facilitates continued delivery of *The System Summary*. Please state old and new addresses and ZIP Codes in each notice.

Regents' Meeting (Continued from Page 7)

the Chamber of Commerce on August 22, 1960, with no reversionary clause.

This property was used by the Cooperative Extension Service of the University of Georgia College of Agriculture in its 4-H Club program until the summer of 1968. "It has not been used for this purpose since that time, and the Dublin Chamber of Commerce has requested that ownership of this property revert to them as specified in the initial deed," the Regents were told.

The release of Regents' interest in both tracts of land was recommended by the University of Georgia, "since (neither) the University nor the (University) System has any further plans for use of this property," according to the request for the Regents' action.

All items of personal property and equipment have been removed from the property, the Regents were told.

The property is located adjacent to a 135-acre tract of land deeded to the Regents by E. D. Martin and Roy E. Martin, Jr. in 1953 with the same restriction regarding use of the property and the same provision for reversion. The release of the Regents' interest in the Martin property was authorized at the November, 1972, meeting of the Board of Regents.

- Authorization was given for the sale by public bidding of approximately 52.8 acres of land used by the Georgia Experiment Station, Griffin, of the University of Georgia College of Agriculture.

The land, located in the expanded metropolitan area of Griffin, is no longer suitable for use by the Georgia Experiment Station, the Regents were told.

Funds derived from the sale of this land will permit purchase of property which is more remote from the metropolitan area and, therefore, more useful to the Experiment Station, according to the request for approval. It is anticipated that funds derived from the sale will provide for the purchase of remote property with a total area of four to five times greater than that of the presently owned land, the Regents were told.

- Authorization was given for the demolition of eight wood frame buildings located on property recently purchased for Albany State College.

These vacant residence buildings are located on parcels of land at 300, 302, 305, 307, 310, 311, 319, and 322 Hazard Drive, Albany.

Demolition of the buildings was authorized to be accom-

plished by the best means available—by plant forces, by use of a demolition contractor under a public works contract or by a combination of these methods.

The eight buildings are unsightly fire hazards that believed to be beyond repair and of no salable value, Regents were told.

- Authorization was given for the execution of an Exchange of Occupancy Agreement permitting Fort Valley State College and the Peach County Board of Education to exchange use of two facilities.

The agreement will be between the Regents and the Georgia State Board of Education and the Peach County Board of Education.

It will provide for an exchange of occupancy between the Demonstration School of the Fort Valley State College and the Peach County Training School Addition of the Peach County Board of Education.

Both the Demonstration School and the Training School Addition are located on a ten-acre tract near the Fort Valley State College campus. Both of the facilities were constructed with bond funds and are owned by the Georgia Educational Authorities.

The Demonstration School has been used as a demonstration high school, operated by the Peach County Board of Education jointly with the Fort Valley State College Division of Education, to provide on-the-job experience for Educational students at the College. It was closed when the high school enrollment of the Peach County Board of Education was consolidated into one building. Under the Exchange of Occupancy Agreement, the Demonstration School facilities will be used by the Peach County Board of Education as an elementary school, the Regents were told.

The Training School Addition will be used in the future for the conduct of programs of Fort Valley State College. ■

Extension Office Approved

THE ESTABLISHMENT on the Georgia Southern College campus of a District Office of the Cooperative Extension Service of the University of Georgia College of Agriculture was approved by the Board of Regents at the December meeting.

This office, to be established under an agreement between the University of Georgia and Georgia Southern College, is expected to be in full operation by July 1, 1973. ■

Temporary Facilities Allowed at Floyd Junior College

AUTHORIZATION FOR FLOYD JUNIOR COLLEGE to build, with its own funds, temporary classroom facilities was voted by the Board of Regents at the December meeting.

This was taken with the "express understanding" that these temporary facilities will be demolished and removed from the site upon the completion of a two-building Library and Classroom Addition project, scheduled for the fall of 1974.

The temporary classroom facilities, to be constructed at

the rear of the Physical Education Building, are needed to remedy the "critical" shortage of classrooms to accommodate anticipated student enrollment for the 1973 fall quarter, Regents were told. The present available facilities, consisting of six classrooms and two lecture rooms, are already overtaxed by the current College enrollment of approximately 1,000 students, according to the request for the December action. ■

Promotions (Continued from Page 17)

librarian; and Peggy Smith Steelmon, Ed.D., assistant professor of education.

ASSISTANT PROFESSOR—Richard Michael Haney, M.B.A., instructor in business administration; Dorothy M. Joiner, M.A., instructor in foreign languages; Edward Skinner Krebs, M.A., instructor in history; Max Deane Peterson, M.M., instructor in music; Virginia Ann Ruskell, M.L.S., instructor and assistant librarian; and John Phillip Scott, M.B.A., instructor in business administration.

Abraham Baldwin Agricultural College

PROFESSOR—George W. Powell, Ph.D., associate professor of biology.

ASSOCIATE PROFESSOR—Florence Baxter, M.Ed., assistant professor of English; Nolan R. Gibbons, M.S., assistant professor of agricultural engineering; Vincent A. Keesee, Ph.D., assistant professor of art; and Rosalyn Ray, M.A., assistant professor of English.

ASSISTANT PROFESSOR—David Mitchell Flinchum, M.S., instructor in forestry; and Harold P. Henderson, M.A., instructor in social science.

Albany Junior College

ASSISTANT PROFESSOR—Fred D. Bishop, Jr., M.B.A., instructor in business administration; Nettie M. Bryan, B.S., instructor in nursing; Edward N. Gardner, D.D.S., instructor in dental hygiene and supervising dentist; Roy E. Golden, M.S., instructor in psychology; and James R. Saville, Jr., M.Ed., instructor and coordinator of Instructional Development and Media.

Brunswick Junior College

ASSOCIATE PROFESSOR—Ralph E. Denty, Jr., Ph.D., assistant professor of psychology.

ASSISTANT PROFESSOR—Carlton A. Morrison, M.A., instructor in history; and William F. Watson, M.B.A., instructor in business administration.

Clayton Junior College

ASSISTANT PROFESSOR—Larry Bailey Corse, Ph.D., instructor in English; Kathryn N. Donovan, M.N., instructor in nursing; Oscar C. Lam, III, Ph.D., instructor in biology; Miriam P. Perry, Ph.D., instructor in biology; and Terry D. Vacalis, Ph.D., instructor in physical education.

Dalton Junior College

ASSOCIATE PROFESSOR—Howard Darrel Tate, Ed.S., assistant professor of English and acting chairman of the Humanities Division.

Floyd Junior College

ASSOCIATE PROFESSOR—James F. Cook, Jr., Ph.D., assistant professor of history; and Richard O. Hays, Ph.D., assistant professor of physics.

ASSISTANT PROFESSOR—JoAnne H. Starnes, instructor in English.

Gainesville Junior College

ASSOCIATE PROFESSOR—Mary Ann Hickman, assistant professor of English and acting chairman of the Humanities Division; and Barbara J. Webster, Ed.D., assistant professor of mathematics.

ASSISTANT PROFESSOR—Gay N. Cofer, M.Ed., instructor in distributive education; and James A. H., M.A., instructor in economics.

Kennesaw Junior College

PROFESSOR—George Henry Beggs, Ph.D., associate professor of political science and chairman of the Division of Social Science; Herbert Larkin Davis, Ph.D., associate professor of biology and chairman of the Division of Natural Science and Mathematics; and John Calhoun Greider, Ph.D., associate professor of English and chairman of the Humanities Division.

ASSOCIATE PROFESSOR—Peter Edward Bowles, Ph.D., assistant professor of biology; Virginia C. H., Ph.D., assistant professor of English; Mary Louise I., Ed.D., assistant professor of biology; and William P. Thompson, Ph.D., assistant professor of business administration.

ASSISTANT PROFESSOR—Ronald Lynn Carlisle, Ph.D., instructor in mathematics; Emma Florence C., M.S., instructor in nursing; and June Strohm Walls, M., instructor in nursing.

ASSOCIATE LIBRARIAN—Martha A. Giles, M.L., assistant librarian.

Macon Junior College

PROFESSOR—James O. Richards, Ph.D., associate professor of history.

ASSISTANT PROFESSOR—Rosemary Burgamy, M., instructor in foreign languages; Jimmy F. Lumley, M., instructor in mathematics; and Evelyn Toler, M.A., instructor in mathematics.

Middle Georgia College

ASSOCIATE PROFESSOR—Robert H. Holland, Ed.D., assistant professor of health and physical education.

ASSISTANT PROFESSOR—Leroy Jarvis, M.A., instructor in English; Patsy Ruth Jennings, M.A., instructor in English; Mary H. Standard, M.Ed., instructor in sociology; and Arthur L. Tyson, M.S., instructor in biology.

South Georgia College

ASSOCIATE PROFESSOR—Annie Frances Moorme, M.A., assistant professor of English.

ASSISTANT PROFESSOR—Ronald Dean Lackey, Ph.D., instructor in psychology and assistant dean of Students' Student Activities; James Franklin Prewett, M.B.A., instructor in industrial technology; John Earl Saylor, M.Ed., instructor in social science and director of Testing and Counseling; and Monroe Franklin Swiley, III, M.A., instructor in history. ■

Academic Offerings (Continued from Page 21)

program during its first year of operation and that 50 students will be enrolled by the second year of operation, according to the request for approval.

- The newly approved major in Theatre Arts under the existing Bachelor of Fine Arts degree program, effective in the 1973 fall quarter, is designed to provide study in the fields of theatre arts and broadcasting. It will include studies in acting, directing, technical work, theory, and children's theatre as preparation for employment in the allied fields of radio, television, public relations, and advertising.

Estimates indicate that 50 students will be enrolled in the program during its first year of operation, according to the request for approval.

West Georgia College

West Georgia College received approval to establish a Bachelor of Science in Earth Science degree program, to add a major in Business Education and a major in Educational Administration and Supervision under the existing Specialist in Education degree program, and to establish an Associate of Science in Nursing degree program.

- The new Bachelor of Science in Earth Science degree program, effective in the 1973 fall quarter, is designed to prepare students as teachers of Earth Science in secondary schools in Georgia. It has been planned as a means of alleviating the state's increasing shortage of Earth Science teachers. The program was developed with the consultation of the State Department of Education and will meet that Department's teacher certification requirements, the Regents were told.

Estimates indicate that 15 students will be enrolled in the program during its first year of operation and that 40 students will be enrolled by the second year of operation, according to the request for approval.

- The new majors in Business Education and Educational Administration and Supervision under the existing Specialist in Education degree program, effective in the 1973 summer quarter, are designed to provide advanced graduate education for school administrators and business teachers. They will require one year of full-time study beyond the master's degree.

Estimates indicate that 44 students will be enrolled in the Business Education major program during its first year of operation and that 35 students will be enrolled in the Educational Administration and Supervision program during its first year, according to the request for approval.

- The new Associate of Science in Nursing degree program, effective on March 1, 1974, is designed to prepare graduates to pass the state examination necessary for licensure as a Registered Nurse. It was planned to provide the region served by the College, including the Chattahoochee-Flint area and portions of the Coosa Valley area, with graduates to fill an estimated 1,000 vacant nursing positions in that region.

Estimates indicate that 50 students will be enrolled in the program during its first full year of operation and that 70 students will be enrolled in the two succeeding years of operation, according to the request for approval.

Bainbridge Junior College

Bainbridge Junior College, which will open for enrollment in the 1973 fall quarter, received approval to add majors in Secretarial Studies and in Administrative and Business Development under the previously approved Associate of Science degree program and to establish a one-year certificate program in Secretarial Studies. All of these new programs were authorized to be effective in the 1973 fall quarter.

Brunswick Junior College

Brunswick Junior College received approval to offer one-year certificate programs to train auto mechanics; machine and heating, ventilation, and air conditioning technicians, effective in the 1973 fall quarter.

These programs will be offered by the Vocational-Technical Division of the College, established in 1972 in cooperation with the State Board for Vocational Education. These career programs, as well as previously established programs of the Vocational-Technical Division, are designed to meet the needs for skilled manpower in the area surrounding Brunswick Junior College.

Estimates indicate that 15 students will be enrolled in each of the newly approved programs during the first year of operation, according to the request for approval.

Floyd Junior College

Floyd Junior College received approval to add a major in Medical Laboratory Technology and a major in Mental Health Technology under the existing Associate in Science degree program.

- The newly approved major in Medical Laboratory Technology, effective in the 1973 fall quarter, is designed to prepare students to pass the national examination for certification as Medical Laboratory Technicians and to prepare them for employment in medical laboratories. The curriculum of the program was planned also to prepare students for transfer to a four-year program in Medical Technology if they desire to continue their education beyond junior college.

Estimates indicate that 20 students will be enrolled in the program during its first year of operation and that 44 students and 48 students will be enrolled for the second and third years, respectively, according to the request for approval.

- The newly approved major in Mental Health Technology, effective in the 1973 fall quarter, is designed to prepare students for employment as human service workers or mental health associates in community mental health agencies, as mental health associates or unit workers in psychiatric facilities, and as assistants in care programs for the emotionally disturbed and the mentally retarded.

The new program was planned to help meet a need in the area serviced by the College. It will be similar to career associate degree programs in the field of Mental Health which are offered by Georgia State University, Armstrong State College, Columbus College, and Georgia College.

Estimates indicate that 30 students will be enrolled in the new major program during its first year of operation and that 60 students and 70 students will be enrolled for the second and third years, respectively, according to the request for approval.

THE System Summary

A PUBLICATION OF THE UNIVERSITY SYSTEM OF GEORGIA • VOL. 8, NO. 12—DECEMBER, 1972

Ten Units Get Approval To Add Degrees, Majors

NEW DEGREES AND MAJORS for ten institutions of the University System and changes in academic units for three institutions were authorized by the Board of Regents at the December 13 meeting.

New Degrees and Majors

- Georgia State University was authorized to add a major in Foundations of Education under the existing Master of Education degree program.

This newly approved major, scheduled to become effective in the 1973 winter quarter, is designed to provide students with opportunities to concentrate their studies in one of the following areas: psychological foundations, social foundations, and research measurement and statistics. It will benefit persons interested in teaching, in educational research, and in community service, according to the request for approval of the program.

- Armstrong State College received approval to award the Bachelor of Science in Nursing degree.

(Continued on Page 9)

Recommended Budget Includes Funds for Improved Benefits

FUNDS FOR IMPROVED INSURANCE AND RETIREMENT benefits account for \$3,144,000 of the increase in state appropriation recommended by Governor Jimmy Carter for the University System in the 1973-74 Fiscal Year, members of the Board of Regents were told at the December 13 meeting.

These funds are included in the total increase of \$42,828,123 in state appropriation the Governor is recommending for the University System for 1973-74, according to a report by Shealy E. McCoy, Vice Chancellor for Fiscal Affairs and Treasurer. The adoption of the recommendation by the General Assembly would raise the total state appropriation to the University System from \$200,229,877 in 1972-73 to \$243,058,000 in 1973-74, the report indicated.

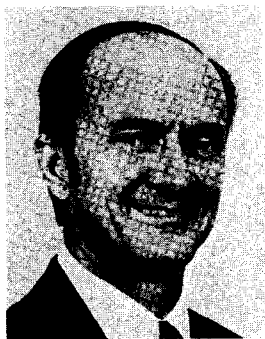

The additional funds recommended for improved fringe benefits include an increase of \$2,694,000 to finance increased contributions by the University System to health and life insurance premium support and an increase of \$450,000 to finance a reduction of vesting time for service and disability retirement.

John W. Hooper, Associate Vice Chancellor, made a

(Continued on Page 11)

ROME ATTORNEY IS NEW REGENT FROM SEVENTH DISTRICT

JAMES D. MADDOX, Rome attorney, has been installed as the new Seventh District member of the Board of Regents of the University System of Georgia. He was sworn in by Governor Jimmy Carter on December 21, to succeed the late James V. Carmichael, Marietta attorney and businessman.

James D. Maddox

Mr. Carmichael, whose seven-year term as a Regent from the Seventh District would have expired on January 1, 1973, died on November 28.

Mr. Maddox was elected by the Board of Regents on December 13 to fill the unexpired portion of the current seven-year term. That action was taken after the Regents were told by Chairman W. Lee Burge that Governor Carter had indi-

cated his intention to appoint Mr. Maddox to a full seven-year term in the Seventh District position.

When a vacancy on the Board of Regents occurs before the end of a prescribed term, the Board elects a replacement to serve until a successor is appointed by the Governor as provided by the state constitution. The procedures governing appointments by the Board and by the Governor to fill unexpired terms are set forth in the constitution.

Mr. Maddox was born in Rome, Georgia, on December 8, 1921. He attended public schools and the Darlington School in Rome. He received the Bachelor of Science in Commerce degree from the University of Georgia and the Juris Doctor degree from the University of Michigan School of Law.

The new Regent is a member of the law firm of Matthews, Walton, Smith, Shaw and Maddox, in Rome.

He served as judge of the City Court of Floyd County

(Continued on Page 11)

Changes in Academic Units

Georgia Institute of Technology received approval to establish an Office of Computing Services, effective January 1,

the newly approved Office will be the supervisory agency centralizing computing facilities and services at Georgia Tech. It will be headed by a director of Computing Services, who will report to the president of Georgia Tech, and who will supervise all centralized computing facilities and services included at the institution, including the Rich Electronic Computer Center and the Management Information System.

Under this new administrative organization, the Rich Electronic Computer Center will become strictly a service organization, and the research activity of the Center will be moved to another department of Georgia Tech, the Regents decided.

Georgia State University received approval to change the name of the Department of Business Education within the School of Education to the Department of Vocational and Business Development, effective in the 1973 winter quarter.

The new name will "more clearly define the purpose of the department," the Regents were told. The major purpose of the Department of Business Education was, until recent years, to prepare business education teachers; however, this purpose was changed, to include the preparation of other types of vocational teachers and administrators, according to the request for approval of the change of the name.

The Medical College of Georgia received approval to establish a Section of Clinical Pharmacology and Hypertension within the Department of Medicine, to change the name of the Renal Section within the Department of Medicine to the Section of Nephrology, and to change the name of the Department of Medical Records Sciences within the School of Health Sciences to the Department of Medical Records Administration.

Each of these steps were authorized to become effective on January 1, 1973.

The establishment of a Section of Clinical Pharmacology and Hypertension will facilitate the expansion of teaching in the School of Clinical Pharmacology and will bring within a single unit both Clinical Pharmacology and Hypertension.

The Regents were told: "There has been a Section of Hypertension in the Department of Medicine for several years. There is a need to expand teaching in clinical pharmacology. There is much overlap in the area of hypertension with clinical pharmacology, a single section is administratively and functionally preferable."

The change in the name of the Renal Section to the Section of Nephrology will bring the name of the Section into "keeping with the name adopted nationally by this sub-specialty group in the field," the request for approval of the change of the name indicated.

The change in the name of the Department of Medical Records Sciences to the Department of Medical Records Administration will bring the name of the Department more in keeping with the functions of those who receive degrees in the field," the request for the Regents' action indicated. ■

... Benefits (Continued from Front Cover)

special report summarizing the fringe benefits recommendations. He said:

"The Governor's budget recommendations in the fringe benefit area are in accord with the University System request with respect to health and life insurance premium support and reflect the System's second preference regarding the reduction of vesting time for service and disability retirement.

"Specifically, the System has requested, and the Governor has recommended, an increase in health insurance contributions from \$3 per month per insurable unit to \$14 per month per insurable unit.

"Life insurance coverage—currently supported at the level of 60 cents per \$1,000 for minimum coverage of \$3,000 and maximum coverage of \$15,000, depending upon salary range—has been requested by the System and recommended by the Governor for increased support sufficient to pay the total premium for minimum coverage of \$4,000 and maximum coverage of \$15,000, depending upon salary range.

"The Governor has recommended that service and disability retirement vesting periods be reduced from their respective present 20-year and 15-year intervals to a uniform 10 years. This recommendation contrasts with the System request for five-year vesting for both service and disability retirement."

The recommendations pertaining to increased contributions to health and life insurance premiums and a reduction in vesting time for retirement would require budgetary action, including the appropriation of funds by the General Assembly. In addition, the recommendation pertaining to a reduction in vesting time for retirement would require a change in the state law governing the State Teachers Retirement System. ■

New Regent (Continued from Front Cover)

(presently the State Court of Floyd County) for nine years, and resigned that position to return to private practice of law. He is a former president of the Rome Bar Association, a former president of the Young Lawyers Section of the Georgia Bar Association, and a former member of the Board of Governors of the Georgia Bar Association.

Mr. Maddox is an elder in the First Presbyterian Church in Rome. He is a veteran of both World War II and the Korean War.

He is a member of Shanklin-Attaway Post 5 of the American Legion in Rome, the Rome Kiwanis Club, the Floyd County Farm Bureau, the Rome Area Chamber of Commerce, the Sons of Confederate Veterans, and the Sons of the American Revolution.

He was the head of a local task force that promoted the location and development of a junior college of the University System in the Floyd County-Rome area. This institution, Floyd Junior College, was opened for enrollment of students in the 1970 fall quarter.

Mr. Maddox is married to the former Rebecca Wall, of Elberton. They have a daughter, Rebecca, 13. ■

Armstrong State and Savannah State. An additional joint program, leading to the Master of Science degree in Elementary Education, was authorized by the Regents in September 1971. The Master of Science degree in Elementary Education had been offered by Savannah State College since 1968.

The joint program approved in June was cooperatively developed and recommended by the faculties of Armstrong State and Savannah State, the officials of local school systems, the personnel of the State Department of Education, the Regents were told.

Augusta College

Augusta College was authorized to offer the Bachelor of Music degree program with majors in Performance and in Music Education, which will become effective in the 1972 fall quarter.

This program is designed to prepare students for careers as performers or Music teachers and for graduate study in Music. It was developed with the assistance of the National Association of Schools of Music and meets the accreditation criteria of the Association, according to the request for approval.

An established program in Music at the College, which leads to the Bachelor of Arts degree with a major in Music, will continue to be offered for students "not desiring such a rigorous program," the Regents were told.

Columbus College

Columbus College received approval to offer a program leading to the Bachelor of Science degree without designation, which will become effective in the 1972 fall quarter.

This program will provide a curriculum in general studies that has a flexibility not available when a major is designated, according to the request for approval. The curriculum will satisfy the requirements of the University System Core Curriculum in the freshman and sophomore years. Study in various emphasis areas during the junior and senior years will provide the desired flexibility within the curriculum, and quarterly seminars during these two years will interrelate a student's academic interests.

Some of the goals of the program, as outlined in the request for the Regents' action, are: "to allow students who are undecided on a major an opportunity to select from various disciplines; to provide minority group students with a general program which allows development of new insights and a broad general knowledge; and to provide women and men who are non-career oriented with a program based on interests."

North Georgia College

North Georgia College received approval to add a major in Health, Physical Education, and Recreation under the existing Bachelor of Science degree program.

This major, which will become effective in the 1972 fall quarter, is designed to prepare students to teach Health and Physical Education in the public schools, to pursue graduate study in these fields, and to work in both public and private recreation agencies. A need for persons educated in these fields is created by "the increasing concern of citizens for the physical well-being of young people and the increase in leisure time," the Regents were told.

Valdosta State College

Valdosta State College received approval to add a major in

Astronomy to the existing Bachelor of Science degree program.

This major, which is effective in the 1972 summer quarter, is designed to prepare students for graduate study in Astronomy and for employment in planetariums, observatories, aerospace laboratories, and in related areas such as science journalism.

Clayton Junior College

Clayton Junior College was authorized to add a major in Water Quality Control Technology to the existing Associate in Arts degree program.

This program, which will become effective in the 1972 fall quarter, is designed to develop skills in the technical aspects of waste water and pure water treatment and to prepare students for employment in the field of water quality control. It will be offered by Clayton Junior College in cooperation with the Atlanta Area Technical School. Students successfully completing the program will receive the Associate in Arts degree from Clayton and a certificate from the Atlanta Area Technical School.

Students enrolled in the program will spend three quarters at Clayton Junior College to acquire a basic academic background; subsequently, they will spend four quarters at the Atlanta Area Technical School to obtain more specialized technical training.

Gordon Junior College

Gordon Junior College was authorized to establish Associate in Arts degree programs and Associate in Science degree programs.

These degree programs, which will become effective July 1, 1972, will provide two-year programs for students who plan to continue in college to seek baccalaureate degrees in the Arts, Humanities, Sciences, Mathematics, Social Sciences, Teacher Education, Business Administration, and in the pre-professional areas of Medicine, Dentistry, Law, and Veterinary Medicine.

Gordon Junior College—presently a privately operated institution, Gordon Military College—will become a unit of the University System on July 1, 1972. As a unit of the University System, the College will enroll its first students in the 1972 fall quarter. The College was accepted by the Board of Regents in September, 1971, at the request of the Gordon Board of Trustees.

NEW DIVISIONS

- Floyd Junior College was authorized to establish a Division of Humanities, which will become effective July 1, 1972.

The Humanities programs at the institution have been offered through the Division of Social Science and Humanities since the College opened in the 1970 fall quarter. The establishment of the new Division of Humanities was recommended by the President of the College in order to "provide a better balanced administrative structure," the Regents were told.

- Gainesville Junior College was authorized to establish a Division of Business, which will become effective in the 1972 fall quarter.

The institution's programs in Business have been offered through the Division of Social Sciences.

The establishment of the new Division was recommended by the President of the College in order to "improve the administration of the College," the Regents were told. ■

Regents Authorize Revisions Affecting Extension Service

THE REORGANIZATION of the administrative structure of the Cooperative Extension Service of the University of Georgia College of Agriculture was approved by the Board of Regents at the June 21 meeting. The action was recommended by Extension Service Director Charles P. Ellington and University of Georgia President Fred C. Davison.

The revised structure includes eight positions of Assistant Director.

The eight positions and the administrators appointed to them or continuing in them are:

Assistant Director-Youth Development, formerly State 4-H Club Leader, T. L. Walton.

Assistant Director-Home Economics, formerly State Home Economics Leader, Nancy Preas.

Assistant Director-Agriculture and Natural Resources, formerly Assistant Director-Programs, Charles R. O'Kelley.

Assistant Director-Fort Valley, a new position, presently vacant.

Assistant Director-Rural Development Center, formerly Associate Dean and Director-Rural Development Center, Darl Snyder.

Assistant Director-Field Operations, a new position, Talmadge C. DuVall.

Assistant Director-Community Resource Development, formerly Assistant Director-Rural Development, Thomas D. Aaron.

Assistant Director-Management Operations, unchanged, G. Y. Duke.

The Extension Education Department and the Information and Publications Department will continue to operate as they did previous to the reorganization. ■

Regents' Scholarships

REGENTS' SCHOLARSHIPS totaling \$33,525, awarded to 75 residents of Georgia for study at institutions of the University System, were approved by the Board of Regents at the June 21 meeting.

The funds were provided for the recently ended 1972 spring quarter, for the 1972 summer quarter, and for the 1972-73 Academic Year of three quarters beginning in the fall of 1972.

The institutions awarding the Scholarships, and the number and the total value of the Scholarships at each institution, are:

Georgia Institute of Technology, 7—\$1,750; Georgia State University, 18—\$11,953; University of Georgia, 14—\$7,450; Armstrong State College, 2—\$300; Columbus College, 5—\$1,367; Georgia Southwestern College, 4—\$780; Savannah State College, 3—\$800; Valdosta State College, 3—\$1,550; West Georgia College, 2—\$850; Albany Junior College, 8—\$3,450; Floyd Junior College, 3—\$1,100; Gainesville Junior College, 5—\$1,675; and Middle Georgia College, 1—\$500. ■

● John L. Stegall was appointed comptroller at Emanuel County Junior College, effective August 15, 1972. Emanuel County Junior College, approved by the Regents in December, 1970, is in the final planning stages prior to construction and is scheduled to open in the 1973 fall quarter.

Mr. Stegall was born on September 9, 1941, in Richmond, Indiana. He holds the B.S. degree from Indiana State University and the M.B.A. degree from the University of Georgia. He has held his present position as internal auditor in the Office of the Board of Regents of the University System of Georgia since 1970.

● Thomas R. Berry was named director of Public Service, in addition to his duties as instructor in Business Administration, at Floyd Junior College, effective July 1, 1972.

Mr. Berry, who was born on August 8, 1945, in Portsmouth, Virginia, received the B.B.A. and M.B.A. degrees from the University of Georgia. He has held his present position as instructor in Business Administration at Floyd Junior College since 1970.

● William George Pullen was appointed chairman of the Division of Social Science, in addition to his duties as assistant professor of History, at Floyd Junior College, effective July 1, 1972.

Dr. Pullen was born on November 8, 1938, in Blakely, Georgia. He holds the A.B. degree from LaGrange College, the B.D. degree from Duke University, the M.A. degree from Florida State University, and the Ph.D. degree from the University of Georgia. He has held his present position as assistant professor of History at Floyd Junior College since 1970.

● Joseph P. Bray, Jr. was appointed dean of Students and assistant professor of English at Gordon Junior College, effective July 1, 1972. The effective date coincides with the conversion of the institution from a private institution, Gordon Military College, to a unit of the University System, Gordon Junior College.

Mr. Bray, who was born on May 28, 1925, in Yadkinville, North Carolina, received the B.S. and M.A. degrees from Appalachian State University. He joined the Gordon Military College faculty as an instructor in English in 1962 and served as registrar and dean in 1964-70. He has held his present position as president of Gordon Military College since 1970.

● Stephen D. Edwards was named director of Community Services and Public Information and assistant professor of Political Science at Gordon Junior College, effective July 1, 1972.

Mr. Edwards, who was born on April 1, 1944, in Pinckneyville, Illinois, received the B.A. and M.A. degrees from Southern Illinois University. He has held his present position as instructor in Political Science at Clayton Junior College since 1969.

● Robert W. Krueger was appointed comptroller and instructor in Business Administration at Gordon Junior College, effective July 1, 1972.

Mr. Krueger, who was born on April 3, 1941, in Hattiesburg, Mississippi, received the B.A. degree from Mississippi State University and the M.B.A. degree from the University of Georgia. He has held his present position as assistant director of Budgets on the staff of the Board of Regents of the University System of Georgia since 1971. ■

Regents' Meeting (Continued from Page 11)

to conduct a study to determine the appropriate role and functions of clinical psychologists to be appointed by the Georgia State Department of Corrections.

The agreement will be between the Regents, on behalf of the University, and the State Department of Corrections for the period of May 16-September 30, 1972. The University will receive \$8,000 for the services rendered in connection with the study.

- Authorization was given for the execution of two agreements for the Legal Aid and Defender Society of the School of Law at the University of Georgia to provide consultant legal services to prisoners under the supervision of the Georgia State Department of Offender Rehabilitation.

Both of the agreements are between the Regents, on behalf of the University of Georgia, and the Department of Offender Rehabilitation. Each agreement became effective upon approval by the Regents. The University will receive \$12,316 under one agreement that ends on July 1, 1972, and \$29,380 under the other agreement that ends on June 30, 1973.

"The Legal Aid and Defender Society is currently providing consultant legal services to prisoners at the Diagnostic and Classification Center at Jackson, Georgia, under a Law Enforcement Assistance Administration grant," the Regents were told. "These agreements (authorized in June) provide for an expansion of such services for inmates in the various institutions within the state that are under the supervision of the Department of Offender Rehabilitation."

- Authorization was given for the execution of an agreement under which the University of Georgia will expand its facilities and resources used in the preparation of persons for employment in public welfare programs.

This agreement will be between the Regents, on behalf of the University of Georgia, and the Georgia Division of Family and Children Services for a period of one year beginning on July 1, 1972. The University will receive a grant of \$27,563 through the Division of Family and Children Services and will provide \$9,431 in cash or kind.

- Authorization was given for the execution of an agreement providing for the University of Georgia Institute of Government to conduct a graduate-study and work program for ten minority-group students.

The agreement will be between the Regents, on behalf of the University, and the Georgia Bureau of State Planning and Community Affairs. It will cover a period of one year beginning on July 1, 1972, and will be renewable for a period of one year. The University of Georgia will be reimbursed in the amount of \$123,670 and will contribute \$61,830 in cash or kind during the two-year period.

"Basically, ten selected minority-group students will be enrolled in the Master of Public Administration program at the University for a two-year period," according to the request for approval of the agreement. These students will work with selected governmental agencies, the request also indicated.

- The execution of an agreement for Albany State College to operate an in-service workshop for teachers and coordinators in Adult Basic Education was approved.

This agreement is between the Regents, on behalf of Albany

State College, and the Georgia State Board of Education. It covers the period of June 21-October 1, 1972. Albany State College will receive \$8,500 for the services rendered.

- The execution of an agreement for Valdosta State College to offer undergraduate-graduate courses to teachers in the Waycross area was authorized.

The agreement is between the Regents, on behalf of Valdosta State College, and the Okefenokee Curriculum Center in Waycross. It covers the period extending from June 12, 1972, through August 15, 1973. The College will be paid \$15,000 for services rendered.

- The execution of an agreement for West Georgia College to conduct an in-service workshop for teachers and coordinators in Adult Education was approved.

This agreement is between the Regents, on behalf of West Georgia College, and the Georgia State Board of Education. It covers the period of June 21-October 1, 1972.

West Georgia College will receive \$13,295 for the services rendered.

- Authorization was voted for the execution of two agreements related to the archaeological program of West Georgia College. Both of these agreements are between the Regents, on behalf of West Georgia College, and the Georgia Historical Commission.

Two projects in which West Georgia College will be involved under terms of the agreements are:

- Summer Field School Experience in Archaeology at Etowah Mounds Archaeological Area. The College will receive \$5,500 and will provide \$5,000 in in-kind contribution for this project.

- Archaeological studies in the Glynn County, Bleckley County, and Pulaski County areas of Georgia. The College will receive \$900 to cover the cost of these studies.

Both of the agreements were to become effective upon execution by all parties, and were to contain provisions for termination by either party by written notice submitted 30 days in advance.

- Authorization was given for the execution of an agreement to provide clinical experiences for Nursing students at Floyd Junior College.

This agreement will be between the Regents, on behalf of Floyd Junior College, and the Redmond Park Hospital in Rome. It will cover a period of one year beginning on July 1, 1972.

- The adoption of an official seal for Gordon Junior College was authorized. The College seal will include the inscription "Constitution, Wisdom, Justice, Moderation, 1972" in the center and the inscriptions "Gordon Junior College" and "University System of Georgia" on a ring forming the outer edge.

The institution will become a junior college of the University System on July 1, 1972. It has been operated as a private institution, Gordon Military College, for many years.

- The acceptance of a gift of \$10,000 for the creation of the Frank A. Constangy Memorial Scholarship Fund at the University of Georgia was authorized.

The money was provided by Mrs. Eleanor S. Constangy.

Estimates indicate that 185 students will be enrolled in the newly approved Specialist in Education degree programs during their first year of operation, the Regents were told.

- The Associate in Education degree program and the one-year certificate program for teacher aides are designed to prepare education paraprofessionals for work as administrative aides, as library assistants and clerks, and as teacher aides and assistants. Both of these programs are designed to prepare students for immediate employment; however, credits earned for the successful completion of some of the courses within the two-year associate degree program will be transferable to apply toward baccalaureate degree programs at University System institutions.

Estimates indicate that 20 students will be enrolled in the two programs during their first year of operation, the Regents were told.

Albany State College

Albany Junior College was authorized to add a major in Drafting and Design Technology under the existing Associate in Arts degree program.

This newly approved program, which was authorized to become effective in the 1972 fall quarter, is designed to prepare students for employment upon completion of two years of study. It will be offered jointly by Albany Junior College and the Albany Area Vocational-Technical School, a unit of the State Department of Education. Students enrolled in the program will complete approximately half of the degree requirements at the College and the other half of the requirements at the Vocational-Technical School. Instruction in academic subjects will be provided by Albany Junior College and instruction in technical subjects will be provided by the Albany Area Vocational-Technical School.

Estimates indicate that 20 students will be enrolled in the new program during its first year of operation, the Regents were told.

Floyd Junior College

Floyd Junior College was authorized to add majors in Mechanical Technology and Electronic Technology under the existing Associate in Science degree program.

These newly approved programs, which were authorized to become effective in the 1972 fall quarter, are designed to provide graduates with the option of seeking employment as mechanical or electronic engineering technologists or of continuing their education by entering baccalaureate degree programs in engineering technology at Southern Technical Institute, a four-year division of the Georgia Institute of Technology.

These new associate degree programs will be offered jointly by Floyd Junior College and the Coosa Valley Area Vocational-Technical School, a unit of the State Department of Education. Students enrolled in the programs will complete approximately half of the degree requirements at the College and the other half of the requirements at the Vocational-Technical School. Instruction in academic subjects will be provided by Floyd Junior College and instruction in technical subjects will be provided by the Coosa Valley Area Vocational-Technical School.

Estimates indicate that 20 students will be enrolled in the Mechanical Technology and Electronic Technology programs during their first year of operation, the Regents were told.

Gordon Junior College

Gordon Junior College, which opened for enrollment as a new unit of the University System in the 1972 fall quarter, was authorized to offer a major in Secretarial Science under the existing Associate in Arts degree program, effective in the 1972 fall quarter.

The secretarial science program, designed to prepare students for employment upon completion of two years of college work, will be offered jointly by Gordon Junior College and the Griffin-Spalding County Area Vocational-Technical School, a unit of the State Department of Education. Students enrolled in the program will complete approximately half of the degree requirements at the College and the other half of the requirements at the Vocational-Technical School. Instruction in general education courses will be provided by Gordon Junior College and instruction in secretarial science courses will be provided by the Griffin-Spalding County Area Vocational-Technical School.

Estimates indicate that 20 students will be enrolled in the Secretarial Science program during its first year of operation, the Regents were told.

Middle Georgia College

Middle Georgia College received approval to add a major in Recreation to the existing Associate in Arts degree program.

This newly approved program, which was authorized to become effective in the 1972 fall quarter, is designed to provide graduates with the option of seeking employment in the various recreation agencies and organizations or of continuing their education through pursuing baccalaureate programs in Recreation.

Estimates indicate that 20 to 25 students will enroll in the new program in Recreation during its first year of operation, the Regents were told.

New Divisions

Emanuel County Junior College, which is scheduled to open in the 1973 fall quarter, was authorized to establish an administrative structure consisting of three academic Divisions, effective in the 1972 fall quarter. The approved Divisions are Humanities, Science and Mathematics, and Social Sciences. These Divisions are comparable to the academic Divisions at existing University System junior colleges, the Regents were told.

In requesting approval for establishment of the three Divisions, the College stated that in the interest of economy the Humanities Division and the Social Sciences Division might initially be combined. Under such a structure, the College would open with two Divisions, a Division of Science and Mathematics and a Division of Humanities and Social Sciences, and later would separate the Division of Humanities and Social Sciences into two Divisions.

Emanuel County Junior College was authorized by the Board of Regents in December, 1970, to be established as a two-year unit of the University System. Planning for construction of the institution is in the final stage. ■

Degrees (Continued from Front Cover)

consulted with Deans of the Schools of Business Administration at the University of Florida, the University of Georgia, and Georgia State University in designing the program to meet the standards of the American Association of Collegiate Schools of Business, the Regents were told.

The Master of Education degree program, with majors in Elementary Education and Special Education, was designed to prepare elementary school teachers and teachers of mentally retarded children.

In 1974, all beginning teachers in public elementary and secondary schools will be required by the State Board of Education to have a master's degree in order to receive a professional teaching certificate; only 16 per cent of the present 2,500 elementary and special education teachers in the seven-county area adjacent to Augusta College hold master's degrees, according to the request for approval of the graduate degree program in Education.

The Bachelor of Science degree program with a major in Medical Technology is designed to prepare medical technologists for work in hospitals and medical facilities in the Augusta area. The first three years of study in this program will be conducted at Augusta College, and the fourth year of study will be an internship conducted in area hospitals accredited by the American Society of Clinical Pathologists. The program was developed in cooperation with personnel from the Medical College of Georgia and the National Council on Medical Technology Education, the Regents were told.

Georgia College

Georgia College (formerly Georgia College at Milledgeville) received authorization to offer a Bachelor of Arts degree program with a major in Political Science, effective in the 1971 fall quarter. The program is designed to prepare students for careers in government or for graduate study in Political Science or Law.

The program has been reviewed by authorities in the field of Political Science, and their suggestions for improvements will be incorporated in the degree program, according to the request for approval.

North Georgia College

North Georgia College was authorized to offer an Associate of Science degree program with a major in Secretarial Science and a one-year Secretarial Science Certificate program, both of which will become effective in the 1971 fall quarter. The College currently offers a baccalaureate degree program in Secretarial Science, and will employ the faculty and facilities of the present degree program to conduct the two new programs, according to the request for approval.

The approved associate degree program and one-year certificate program are designed to prepare students, who do not wish to pursue a baccalaureate degree, for career secretarial positions.

Floyd Junior College

Floyd Junior College received authorization to offer an Associate in Arts degree program with a major in Criminal Justice, effective in the 1971 fall quarter. The College will provide the general education portion of the designated curriculum and will award the Associate in Arts degree, while

RESIDENT GRADUATE UNIT GETS REGENTS' APPROVAL

A RESIDENT GRADUATE CENTER of the University of Georgia to be established at North Georgia College, was authorized by the Board of Regents at the October 12-13 meeting. The Center is to offer graduate work toward a Master of Education degree from the University of Georgia to residents of northeast Georgia, according to the terms of an agreement between the University of Georgia and North Georgia College.

The Center primarily will serve residents of northeast Georgia counties which are closer to the campus of North Georgia College at Dahlonega than to the campus of the University of Georgia at Athens.

The agreement, which became effective in the 1971 fall quarter, outlines procedures for the establishment of the Resident Graduate Center, among which are:

- All students seeking admission to the Center must apply to the Graduate School of the University of Georgia for admission in the same manner as other graduate students and be accepted before registering for course work.

- The faculty of the Center will be composed of present University of Georgia faculty members and other faculty members equally qualified for appointment under regular University standards.

- The curriculum of the Center will include only courses that are of content and level comparable to courses offered at the University of Georgia campus.

- Adequate on-campus and off-campus library and laboratory facilities will be available for graduate study at the Center.

The agreement provides: "Graduate study requires the presence of adequate monograph and journal materials readily accessible to those students enrolled for courses. The library of a Graduate Center institution should provide the titles and sufficient duplication, which are needed to serve the reading and basic research demands of the courses offered at the Center . . .

"The Center institution library should not be expected to provide advanced or specialized research materials the use of which would be limited. Instead, such titles should be borrowed on inter-library loan from the University of Georgia Libraries—or, where regulations prevent lending, should be purchased in photocopy through the same source."

The establishment of a Resident Graduate Center at North Georgia College was recommended by North Georgia President John H. Owen, University of Georgia President Fred C. Davison, and administrators of the Graduate School, College of Education, and Libraries at the University of Georgia. ■

Georgia State University will provide the specialized Criminal Justice courses of the curriculum.

Credits earned under the approved associate degree program will be transferable to Georgia State University's four-year degree program leading to a Bachelor of Science in Urban Life degree with a concentration in the area of Criminal Justice. ■

REGENTS ADOPT MODIFIED POLICY ON MEETINGS

A REVISED POLICY on open meetings and executive sessions of the Board of Regents of the University System of Georgia was adopted by the Regents at the December 8 meeting.

The text of the new policy, which supersedes the policy that had been in effect since July, 1964, is as follows:

"THE PRESS. All sessions of the Board and committees thereof shall be open to the public and the press (including representatives of radio and television) except during executive session.

"EXECUTIVE SESSION. The Board of Regents and the committees thereof may be in executive session to consider and act upon:

"(1) Matters pertaining to the purchase or sale of real property prior to final decision thereon by the Board in open session.

"(2) Personnel matters relating to the discipline of students, the appointment, employment, compensation or dismissal of officers or employees, or professional services of the University System.

"(3) Matters involving litigation when discussion in open session concerning such matters may adversely affect or be detrimental to the public interest.

"(4) Matters relating to complaints or charges brought against officers or employees of the University System, unless such officers or employees request a public hearing. The Board may also exclude from any such public or private meeting, during the examination of a witness, any or all other witnesses in the matter being investigated by the Board.

"(5) After executive sessions of the Board and of committees, the Board shall immediately advise the news media of all actions taken in the executive session, and shall promptly record such actions in the official minutes of the Board which shall be open to the public."

The text of the superseded policy was as follows:

"THE PRESS. Members of the press and representatives of radio and television stations shall be admitted to all sessions

of the Board except where matters are under discussion which, in the Board's judgment, require an executive session. In the event of such an executive session, the Board will immediately advise the representatives of all actions taken in the executive session and promptly record them in the minutes which are open to the public.

"All regular committee meetings of the Board shall be open to the press (including representatives of radio and television without electronic equipment) except during executive session.

"EXECUTIVE SESSION. Committees will be in executive session to consider and act upon:

"(1) Matters pertaining to the purchase or sale of real property prior to final decision thereon by the Board in open session.

"(2) Personnel matters relating to the appointment, employment, compensation or dismissal of officers or employees, or professional services of the University System.

"(3) Matters involving litigation when discussion in open session concerning such matters may adversely affect or be detrimental to the public interest.

"(4) Matters relating to complaints or charges brought against officers or employees of the University System, unless such officers or employees request a public hearing. The Board may also exclude from any such public or private meeting, during the examination of a witness, any or all other witnesses in the matter being investigated by the Board.

"(5) Any matter which in the Committee's judgment requires an executive session."

The new and superseded policies on open meetings and executive sessions were discussed by Regents' Chairman W. Lee Burge at a December 8 meeting of a committee of the Georgia House of Representatives. The committee is officially labeled the Special Interim Study Committee to Consider Legislation Prohibiting Closed Sessions of Any Governmental Body in the State. Representative Larry W. Thomason, DeKalb County, is chairman of the Committee. ■

Goals of Rome Unit Stated in Self-Study Document

A STATEMENT OF PURPOSE of Floyd Junior College was approved by the Board of Regents at the December 8 meeting, as requested by the College, as follows:

"Floyd Junior College, a unit of the University System of Georgia under the jurisdiction of the Board of Regents, was established to provide opportunities for the physical, intellectual, and cultural development of the people in the community it serves. The offerings of the College are determined by available resources and are governed by policies established by the Board of Regents. The College proposes to meet the educational and cultural needs of the community through the following programs:

"The College provides, through the concept of the University System Core Curriculum, the first two years of a four-year degree program. Credits earned during these two years are transferable to senior colleges and universities.

"The College provides, in accordance with demonstrated need,

career programs to prepare students for gainful employment.

"The College provides developmental instruction designed for students who need to strengthen their academic backgrounds before entering college level programs of study.

"The College provides opportunities for members of the community it serves to participate in continuing education. These courses are offered according to demonstrated need and available resources."

The College, which enrolled its first students in the fall quarter of 1970, is undergoing self-study for accreditation by the Southern Association of Colleges and Schools. An approved Statement of Purpose, approved by the Board of Regents, is required of an institution in order to receive accreditation from the Southern Association.

The Statement of Purpose was approved on October 25, 1971, by the faculty of Floyd Junior College. ■

STANFORD DEAN NAMED PRESIDENT OF GEORGIA TECH

JOSEPH M. PETTIT, Dean of the Stanford University School of Engineering, has been named President of the Georgia Institute of Technology.

He was elected to the position by the Board of Regents in a special meeting in Atlanta on October 5. He will assume his new duties no later than the beginning of the 1972 Spring Quarter in March, Chancellor George L. Simpson, Jr. said.

Joseph M. Pettit

In becoming the eighth President of Georgia Tech, Dr. Pettit will succeed Dr. Arthur G. Hansen, who resigned to become President of Purdue University. Dr. James E. Boyd, Vice Chancellor-Academic Development of the University System, has been serving as Acting President since last May.

Advisory Committees of alumni, faculty members, and students of Georgia Tech assisted Chancellor Simpson in the search for the new President. The recommendation of Dr. Pettit for the position was made by the Chancellor to the Board of Regents.

Born in Rochester, Minnesota, on July 15, 1916, Dr. Pettit received the Bachelor of Science degree from the University of California at Berkeley, and the Engineer degree and the Doctor of Philosophy degree from Stanford University.

His major field of study was Electrical Engineering, and his minor field was Physics.

Dr. Pettit has served on the faculty at Stanford since 1947. He is a professor of Electrical Engineering, and has been the Dean of Engineering since 1958.

He served as a teaching and research assistant at Stanford, 1938-40, and as an instructor at the University of California at Berkeley, 1940-42.

Dr. Pettit was engaged in radar countermeasures work on the staff of the Radio Research Laboratory at Harvard University during World War II, and served in India, China, and

England. He was associated with the Airborne Instruments Laboratory, Inc., New York, beginning in 1945, before beginning his present 24-year tenure at Stanford.

The newly elected Georgia Tech President is a member of the National Academy of Engineering, and of the Academy's Commission on Education and Committee on Telecommunications. He is President-elect of the American Society for Engineering Education. He is a Registered Professional Engineer in the State of California.

Dr. Pettit is a Fellow and a former Board member of the Institute of Electrical and Electronic Engineers. He also holds membership in Sigma Xi, Tau Beta Pi, Eta Kappa Nu, California Academy of Sciences, and the Society for the History of Technology.

He is a director of Varian Associates, and has been a director or consultant for several companies in the United States and Europe. He is a consultant on programs in Latin America for the Ford Foundation and for the Organization of American States.

He has written numerous technical articles, and several textbooks including "Electronic Measurements" (with F. E. Terman) in 1952; "Electronic Switching, Timing and Pulse Circuits," in 1959 and (with M. M. McWhorter) in 1970; and "Electronic Amplifier Circuits" (with M. M. McWhorter) in 1961.

Dr. Pettit was not present at the October 5 meeting. He was in Atlanta on October 11, to visit with members of the Board of Regents and with faculty members, officials, and other personnel at Georgia Tech.

In a written statement, he said: "I consider it both an honor and a challenging assignment to assume the presidency of Georgia Tech. The Institute has a fine reputation already, and I sense a strong consensus to reach even higher."

Dr. Pettit is married to the former Florence Rowell West of Fresno, California. They have two daughters: Marjorie Pettit of Palo Alto, California, and Marilyn (Mrs. Michael) Backland of Tahoe City, California; and a son: Roy Pettit of Arch Cape, Oregon. ■

Three Administrative Appointments Approved in October

APPOINTMENTS OF A VICE PRESIDENT and two other administrators at institutions of the University System were approved by the Board of Regents at the October meeting.

Sanford Eugene Younts was appointed vice president for Services, in addition to his duties as professor of Agronomy, at the University of Georgia, effective January 1, 1972. Born August 29, 1930, in Davidson County, North Carolina, Dr. Younts received the B.S. and M.S. degrees from North Carolina State University and the Ph.D. degree from Cornell University. He has held his present position at the University of Georgia as professor of Agronomy, associate dean of the College of Agriculture, and director of the Rural Development Center (at Tifton) since 1969.

Henton Thomas was named coordinator of the Demonstration Development Center at Savannah State College, effective

September 1, 1971. Born June 7, 1932, in Savannah, Mr. Thomas received the B.S. degree from Savannah State College and the M.Ed. degree from Georgia Southern College. He has served as assistant principal of Beach Junior High School in Savannah since 1969.

Belen D. Nora was appointed director of Nursing and assistant professor of Nursing Education at Floyd Junior College for a nine-month period beginning October 1, 1971. Born October 21, 1934, in Aringay, Philippines, Mrs. Nora received the B.S.N. degree from the University of the Philippines and the M.A. degree from the University of Chicago. Her most recent position was assistant director of the Memorial Hospital School of Nursing in Worcester, Massachusetts, in 1969-70. ■

the Medical College as a Respiratory Center Clinic, open five days a week for treatment of outpatients, and as a teaching and research facility for the Medical College, the Regents were told. There is no space available on the campus of the Medical College for housing the activities conducted in the Harper Street facilities, according to the request for approval.

- Condemnation proceedings were authorized for the acquisition of land at 777 McMillan Street, N. W., Atlanta, for use in the expansion of the campus of the Georgia Institute of Technology.

Proceedings for condemnation were approved upon the recommendation of the Attorney General, for the purpose of establishing clear title to this property.

The Regents in June, 1971, authorized the purchase of this property from the heirs of Raymond and Annie Mae Davis. The Attorney General subsequently advised the Regents that examination of the title to the property revealed several defects considered to be "difficult, if not impossible, to cure," the Regents were told at the December meeting.

- Authorization was given for amending a 1970 lease agreement between the Regents, on behalf of Armstrong State College, and Southside Communities Fire Protection, Inc., Savannah.

The initial agreement provided for Southside to lease property on the Armstrong State campus for the purpose of constructing a fire station. The amended agreement provides for Southside to lease an additional 12,500 square feet of land, adjacent to the previously leased property, increasing to 22,500 square feet the entire leased area.

The lease of additional property was requested to enable Southside to comply with Chatham County regulations regarding the amount of land necessary for the construction of a septic tank and field, for use in connection with the fire station.

The property covered by the lease agreement is located in a remote corner of the Armstrong State College campus.

- Authorization was given for the sale, demolition, and removal of a vacant farm laborer's house at the Coastal Plain Experiment Station at Tifton, a facility of the University of Georgia. Further approval was given for the demolition of the building by the plant operations office of the institution, in the event that no bids are received for the sale of the house.

The estimated cost of repairs to the building exceeds the value of the structure, according to University officials, the Regents were told.

- Authorization was given for the demolition of an obsolete shop building at Augusta College, and for the cost of the demolition to be paid from funds on hand at the institution.

This building, which is vacant, is in a state of deterioration that would make rehabilitation or reconstruction uneconomical, and its removal would permit better utilization of the land, according to the request for the Regents' action.

- Authorization was given for the execution of a rental agreement between the Regents, on behalf of Armstrong State College, and Hazel A. Edgerly, for the use by Armstrong State of property at 901 East 67th Street, Savannah, for a one-year period beginning January 1, 1972, at a monthly rental of \$916. The agreement includes an option to renew the rental agreement for five consecutive years. The rental rate will be

renegotiated downward after the first year, to approximately \$300 per month, the Regents were told. The first-year rental rate provides for some necessary renovations.

Facilities located on the property include a two-story building with 1,568 square feet of usable space and a lot with parking space for a maximum of 15 cars. The building and lot will be used in connection with the Armstrong State program for the preparation of students for employment in public welfare programs in Georgia, the Regents were told.

The Armstrong State program to recruit and train qualified staff personnel for the public social services was advanced by an October, 1971, cooperative agreement between the Regents, on behalf of Armstrong State, and the Georgia Department of Family and Children Services. Under terms of that agreement, the Department will use a Federal grant of approximately \$77,000 to provide Armstrong State with 75 percent of the funds necessary to expand its program to train students for employment in public welfare programs and other social services. The College agreed to provide the remaining 25 percent of the cost, "in cash or kind," from institutional funds.

- Authorization was given for the execution of Modification No. 7 to the cooperative agreement, originally approved in July, 1968, between the Regents, on behalf of the University of Georgia, and the Georgia Forest Research Council.

The modification provides for an increase, not to exceed \$13,500, in the Council's share of the cost of forest research projects conducted by the School of Forest Resources of the University during the current fiscal year for the mutual benefit of the University and the Council. The new share to be paid by the Council is not to exceed \$279,228 for the research projects conducted during the fiscal year that began on July 1, 1971. ■

Three Programs Ratified

THREE SECRETARIAL SCIENCE PROGRAMS, offered jointly by junior colleges of the University System and area vocational-technical schools of the State Department of Education, were ratified by the Board of Regents at the December 8 meeting.

These programs are offered as follows: in Gainesville, by the Gainesville Junior College and the Lanier Area Vocational-Technical School; in Marietta, by the Kennesaw Junior College and the Marietta-Cobb Area Vocational-Technical School; and in Rome, by the Floyd Junior College and the Coosa Valley Area Vocational-Technical School.

The Regents in September, 1970, informally approved these programs, which were implemented in the winter quarter of 1971. The purpose of the December, 1971, action was to formalize the previous authorization. ■

January Meeting of Regents

THE NEXT REGULAR MEETING of the Board of Regents of the University System will be held January 11, beginning at 2 p.m., and January 12, beginning at 9:30 a.m., at the Regents' office, 244 Washington Street, S.W., Atlanta. ■

April 1970

SYSTEM INSTITUTIONS FILL 11 ADMINISTRATIVE POSTS

APPOINTMENTS OF A DEAN and 10 other administrators were approved by the Board of Regents at the April 8 meeting.

Donald G. Ahearn was named dean of Graduate Studies and associate dean of the School of Arts and Sciences at Georgia State University, effective September 1. Born February 1, 1934, in Grove City, Pennsylvania, he received the B.S. degree from Mount Union College and the M.S. and Ph.D. degrees from the University of Miami. He has served as associate professor of microbiology at Georgia State since 1967.

Eugen Schoenfeld was appointed professor and chairman of the Department of Sociology at Georgia State University, effective in the fall quarter. Born November 8, 1925, in Mukacevo, Czechoslovakia, he received the B.A. and M.A. degrees from Washington University and the Ph.D. degree from Southern Illinois University. Since 1965, he has served as director of Graduate Studies and associate professor of sociology at Memphis State University.

Melvin B. Drucker was named director of the Program of Mental Health Assistants and associate professor of mental health at Georgia State University, effective July 1. Born May 27, 1927, in Philadelphia, Pennsylvania, Dr. Drucker received the B.S. degree from Western Reserve University, the M.A. degree from Ohio University, and the Ph.D. degree from George Peabody College. He has served as clinical psychologist of the Chaplaincy Training Project, Georgian Clinic, Atlanta, since 1965.

William L. Eddins was appointed comptroller at the Georgia College at Milledgeville, effective July 1. Mr. Eddins was born August 8, 1926, in Welch, West Virginia, and received the B.S. degree from Concord College and the M.A. degree from West Virginia University. He has been serving as business manager at Southeastern Community College since 1965.

James W. Russell was named chairman of the Biology Department at Georgia Southwestern College, effective April 1. Born August 13, 1934, in Dublin, Georgia, he received the B.S., M.Ed., and Ed.D. degrees from the University of Georgia. Since 1967, Dr. Russell has served as associate professor of biology at Georgia Southwestern, a position he will continue to hold.

Prince A. Jackson, Jr. will become chairman of the Division of Natural Sciences at Savannah State College, effective July 1. He will continue to serve as associate professor of mathematics and physics, a position which he has held since 1966. Dr. Jackson was born March 17, 1925, in Savannah, Georgia, and received the B.S. degree from Savannah State College, the M.S. degree from New York University, and the Ph.D. degree from Boston University.

Chatty R. Pittman was appointed head of the Department of Mathematics, in addition to his present duties as associate professor of mathematics, at West Georgia College, effective April 15. Born October 25, 1937, in Blakely, Georgia, Dr. Pittman received the B.S. degree from North Georgia College and the M.A. and Ph.D. degrees from the University of Georgia. He has served as a member of the faculty at West Georgia since 1965, and has been acting head of the Department of Mathematics since 1969.

Mary Emma Henderson was named librarian and assistant

professor at Abraham Baldwin Agricultural College, effective July 1. She was born April 16, 1923, in Ben Hill County, Georgia, and received the A.B. degree from the Georgia College at Milledgeville and the M.S. degree from Florida State University. Since 1967, Mrs. Henderson has served as assistant librarian and assistant professor at Abraham Baldwin.

Edward L. Philbin was appointed librarian at Albany Junior College, effective July 1. Born May 3, 1936, in Philadelphia, Pennsylvania, Mr. Philbin received the A.B. degree from the University of South Carolina and the M.S. degree from Florida State University. He has served as assistant director of the Albany Public Library since 1967.

Henry J. Markey was appointed chairman of the Division of Business Administration, in addition to his teaching duties, at Brunswick Junior College, effective in the fall quarter. Born September 20, 1916, in Waycross, Georgia, Mr. Markey received the B.B.A. and M.B.A. degrees from Georgia State University. Since 1967, he has served as assistant professor of business administration at Brunswick Junior College.

John Iven Jones, Jr. was named comptroller at Middle Georgia College, effective April 1. Mr. Jones was born January 19, 1939, in Lee County, Alabama, and received the B.S.B.A. degree from Auburn University. He has served as assistant comptroller at Middle Georgia since 1969. ■

System College in Rome Area Taking Steps to Open in Fall

NEW TEMPORARY OFFICES of Floyd Junior College in Rome have been established in the Metro Building, 104 East Third Avenue. Formerly, the offices were located at 426 Broad Street.

The College, a two-year unit of the University System, will open in the fall quarter of 1970, with freshman and sophomore programs. Temporary facilities will be used for the opening quarter. Permanent buildings for the College, now under construction on the 233-acre campus site adjacent to U.S. Highway 27 approximately seven miles south of Rome, will be ready for use in January, 1971.

Construction progress is "very satisfactory," according to President David B. McCorkle. The initial facilities, designed to accommodate 700 students, include an academic building-library, an administration building, a student center, a maintenance-shop building, a physical education building, and a central boiler plant.

President McCorkle began his work in organizing and developing the programs of the College in January, 1970. Other professional personnel already working at their jobs are a dean of academic affairs, a comptroller, an assistant comptroller, a director of student affairs, and a public information officer.

Faculty members and students are now being recruited for the opening of the College in the fall. Floyd Junior College, like all other junior colleges established in the University System in recent years, is a nonresidential institution. ■

May 1970

TWELVE ADMINISTRATIVE POSITIONS FILLED

TWELVE ADMINISTRATIVE APPOINTMENTS were approved by the Board of Regents of the University System at the May 12-13 meeting in Tifton.

William M. Suttles was named to the newly established position of executive vice president and provost at Georgia State University, effective July 1. He will continue to serve as professor of speech and professor of educational administration and higher education. Born July 25, 1920, in Ben Hill, Georgia, he received the B.C.S. degree from Georgia State University, the B.D. degree from Yale University, the Th.M. and M.R.E. degrees from Emory University, and the Ed.D. degree from Auburn University. He has served as vice president for academic affairs at Georgia State since 1964. He is pastor of the Haralson (Georgia) Baptist Church. In 1959, he was selected Rural Minister of the Year for the State of Georgia. He is a former vice president for personnel of Rich's, Inc., Atlanta.

Thomas Miller Jenkins was appointed to the newly created post of vice president for administrative services, and was also named professor of business law, at Georgia State University, effective July 1. He was born April 23, 1925, in Hot Springs, Virginia, and received the B.A. degree from West Virginia State College and the LL.B. degree from Boston University. He served as president of Albany State College, 1965-1969, and has served as executive assistant to the president at Georgia State since 1969.

Harold E. Davis was named associate vice president at Georgia State University, effective July 10, 1970. Born March 5, 1927, in Sasser, Georgia, he received the A.B.J. and M.A. degrees from the University of Georgia. He is a candidate for the Ph.D. degree from Emory University. He has been director of Public Relations at Georgia State since 1965.

Henry T. Malone was named dean of the School of General Studies and professor of history at Georgia State University, effective July 1. Born July 4, 1916, in Albany, Georgia, Dr. Malone received the B.S. degree from Clemson College and the M.A. and Ph.D. degrees from Emory University. He has served as director of Institutes and professor of history at Georgia State since 1966.

William T. Blackstone will become chairman of the Division of Social Sciences, in addition to his duties as professor of philosophy and head of the Department of Philosophy and Religion, at the University of Georgia, effective in the fall quarter. Dr. Blackstone was born December 8, 1931, in Augusta, Georgia, and received the B.A. degree from Elon College and the M.A. and Ph.D. degrees from Duke University. Since 1964, he has served as professor of philosophy and head of the Department of Philosophy and Religion at the University of Georgia.

Roger Kinney Warlick was appointed head of the Department of History and Political Science and professor of history at Armstrong State College, effective September 1. Born October 1, 1930, in San Diego, California, he received the B.A. degree from Arizona State University and the Ph.D. degree from Boston University. Since 1965, he has served as associate professor of history at Bentley College.

Thomas W. Dalton, Jr. was named director of Public Rela-

tions at North Georgia College, effective July 1. He was born January 22, 1941, in Athens, Georgia, and received the A.B.J. and M.A. degrees from the University of Georgia. Mr. Dalton has served as assistant to the director and assistant professor, Agricultural Experiment Stations, University of Georgia, since 1969.

William Ray Cleere was appointed professor of education and dean of the School of Education at Valdosta State College, effective July 1. Born February 6, 1936, in Atlanta, Georgia, he received the B.S. degree from Appalachian State University, the M.Ed. degree from the University of Mississippi, and the Ed.D. degree from the University of Georgia. Since 1967, he has served as associate professor and coordinator of Counseling Education and acting head of the Department of Specialized School Personnel at West Georgia College.

Charles Day Masters will become chairman of the Division of Science and Mathematics and associate professor of geology at West Georgia College, effective July 1. Dr. Masters was born August 4, 1929, in Pawhuska, Oklahoma, and received the B.S. and Ph.D. degrees from Yale University and the M.S. degree from the University of Colorado. He has served as staff research scientist at Pan American Petroleum Corporation since 1968.

John L. Baxter was named dean of Students, in addition to his duties as registrar, at Albany Junior College, effective July 1. Born May 25, 1931, in Louisville, Alabama, he received the B.S. degree from Troy State College and the M.Ed. degree from the University of Virginia. Since 1969, he has served as registrar and assistant professor at Albany Junior College.

Jerry W. Shelton was named director of Physical Education and assistant professor at Floyd Junior College, effective July 1. Born August 17, 1936, in Fayetteville, Tennessee, he received the B.A. degree from Berry College and the M.A. degree from Middle Tennessee State University. Since 1968, he has served as graduate assistant at the University of Georgia.

Milton L. Ready was appointed assistant professor and chairman of the Social Science Division at Floyd Junior College, effective July 1. Mr. Ready was born October 8, 1938, in Willis, Texas, and received the B.S. and M.A. degrees from the University of Houston. He has served as teaching assistant at the University of Georgia since 1966. ■

Dean's Office Reorganized

A REORGANIZATION OF THE ADMINISTRATIVE structure of the Dean's Office in the College of Veterinary Medicine at the University of Georgia was approved in May by the Board of Regents. The action authorized the creation of three positions: associate dean for Academic Affairs; associate dean for Research and Graduate Studies and associate director of the Institute of Comparative Medicine; and director of the Instructional Resources Program.

The reorganization, which becomes effective July 1, 1970, is designed to "achieve a clearer definition of responsibilities of administrative officials of the College," the request for the Regents' approval indicated. ■

July 1970

Board Authorizes New Graduate and Two-Year Degree Programs

FIFTEEN NEW DEGREE PROGRAMS to be established at institutions of the University System were authorized in July by the Board of Regents. These include graduate programs for Georgia College at Milledgeville and West Georgia College, and 13 two-year programs for Abraham Baldwin Agricultural College, Floyd Junior College, and Gainesville Junior College.

Graduate Programs

Georgia College at Milledgeville was authorized to offer the Master of Arts degree program in History, effective in the summer quarter of 1971. The program will be designed to concentrate initially in American History. It will provide preparation for teaching positions in junior colleges and for further studies at other graduate schools, the Regents were told.

West Georgia College received approval to offer the Master of Business Administration degree program, effective in the summer quarter of 1971. The program will provide a broad background of advanced professional training in business administration, principally in the areas of management, marketing, and economics.

Two-Year Programs

Abraham Baldwin Agricultural College was given approval to establish a two-year career program leading to the Associate of Science degree program with a major in Ornamental Horticulture Technology, effective in the fall quarter of 1970. The program will be designed to prepare students for employment in a wide range of positions, such as flower shop managers, salesmen of ornamental horticulture supplies and equipment, greenhouse managers, garden center managers, grounds superintendents, and assistant golf course managers.

The request for the degree in Ornamental Horticulture Technology indicated that sales of ornamental horticulture products exceed \$125,000,000 annually, and that there is definite need for personnel in this field. There is no other program of this type in Georgia, the Regents were told.

Floyd Junior College was authorized to establish four two-year career programs leading to Associate of Arts and Associate of Science degrees, effective in the fall quarter of 1970. These are:

- Associate of Science degree with a major in Secretarial Science.
- Associate of Arts degree with a major in General Education, for students who desire to attend college for "professional, social, or personal reasons," but who do not necessarily plan to complete requirements for the baccalaureate degree.
- Associate of Science degree with a major in Business, to prepare students for employment in supervisory, mid-management, and management level positions in business and industry.
- Associate of Science degree with a major in Recreation Leadership, to prepare students to work in supervisory positions in programs of recreation in industry and in local, state, and federal recreational organizations and agencies.

Gainesville Junior College was given authorization to establish five two-year, college-transfer programs and two two-year career programs, all of which will become effective in the fall quarter of 1970.

The college-transfer programs are: Associate of Arts degree in Music, Associate of Arts degree in Music Education, Associate of Science degree in Recreation Leadership, Associate of Science degree in Urban Life, and Associate of Science degree in Police Science.

The career programs are: Associate degree in Poultry Technology, Associate degree in Recreation Leadership, and Associate degree in Fashions Merchandising.

The Associate of Science degrees in Urban Life and Police Science are designed for students who expect to transfer to the baccalaureate degree programs in these fields at Georgia State University. The Georgia State faculty will provide specialized instruction in Urban Life and Police Science.

The three career programs will include work experience as a part of the curriculum.

Two-year college-transfer programs are designed for students who plan to transfer to senior colleges and universities to seek four-year or professional degrees. Two-year career programs are offered to prepare students to begin employment immediately upon completion of junior college work.

Personnel Decisions Upheld

THE BOARD OF REGENTS at the regular monthly meeting July 8 upheld two presidents in decisions on personnel matters that were appealed. The upholding actions, involving four appeals, were recommended by the Education Committee to the Board, following hearings.

President Harry S. Downs of Clayton Junior College was sustained in his decisions not to renew the contracts for three teaching faculty members employed without tenure for the 1969-70 academic year: Mrs. Silvia DeBovis, instructor in mathematics; Mrs. Bonnie Hartwig, assistant professor of English; and Kenneth L. Hey, instructor in English.

President B. R. Tilley of Albany Junior College was sustained in his decision to remove Johnny L. Arnette from the position of dean of Students, effective at the end of the 1970 spring quarter. Dr. Arnette accepted a new contract at Albany Junior College on May 15, 1970, as an associate professor in the Social Sciences Department for 1970-71.

The Committee conducted a hearing for the Clayton Junior College appellants on May 29 and for the Albany Junior College appellant on June 10. ■

Governor's Conference In October

THE EIGHTH ANNUAL Governor's Conference on Education will be held October 7-8 at the Sheraton-Biltmore Hotel in Atlanta. A pageant, "Many a Glorious Morning," depicting the growth of education in Georgia during the last 100 years will be presented at the evening session on opening day. ■

KENNESAW DEAN MOVING TO DALTON PRESIDENCY

Derrell C. Roberts

DERRELL C. ROBERTS, dean of Kennesaw Junior College, Marietta, was named by the Board of Regents in July to become president of Dalton Junior College, Dalton. He will assume his new position on August 1.

Dr. Roberts, who has been dean of the College at Kennesaw since this institution opened in 1966, will succeed retiring President Arthur M. Gignilliat at Dalton.

Born May 24, 1927, at Ocilla, Georgia, Dr. Roberts received the B.S. degree in history from Georgia Southern College, the M.A. degree in history from George Peabody College, and the Ph.D. degree in history from the University of Georgia. He is the author of 17 publications on subjects relating primarily to the South during the post-Civil War period. His book, "Joseph E. Brown and the Politics of Reconstruction," is scheduled to be published by the University of Alabama Press this year.

He began his career as a teacher at Tifton (Georgia) High School in 1949, and subsequently served as assistant principal and counselor there. He held the positions of part-time instructor at the University of Georgia, 1955-57, while he was working toward his doctorate; instructor at Georgia State University, 1957-58; assistant professor and associate professor at Florida Southern College, 1958-63; chairman of the Department of History at Florida Southern College, 1960-63; and professor of history and chairman of the Social Sciences Division at Mobile College, 1963-65.

He served in the Army in 1946-47.

Dr. Roberts is a deacon and a Sunday School teacher at the First Baptist Church of Marietta. He is a member of the Georgia Historical Society, the Florida Historical Society, the Southern Historical Association, and the Rotary Club.

He is married to the former Leta Faye Hammond, a native of Tifton, Georgia. They have three daughters: Ree, 14; Marianna, 12; and Danalee, 10.

Other Administrators Named

Appointments to nine other administrative positions in the University System and its institutions were approved by the Regents in July.

David W. Menzel was named director of the University System Skidaway Institute of Oceanography, effective September 1. Born February 22, 1928, in Bilaspur, India, Dr. Menzel received the B.S. degree from Elmhurst College, the M.S. degree from the University of Illinois, and the Ph.D. degree from the University of Michigan. He has served as assistant department chairman and senior scientist at Woods Hole Oceanographic Institution since 1963.

Joanne Nurss was named chairman of the Department of Early Childhood Education, in addition to her duties as

assistant professor of curriculum and instruction, at Georgia State University, effective in the fall quarter. Born September 13, 1937, in Peoria, Illinois, Dr. Nurss received the B.A. degree from Beloit College, the M.A. degree from Teachers College of Columbia University, and the Ph.D. degree from Columbia University. She has served as assistant professor of curriculum and instruction at Georgia State University since 1969, when she joined the faculty of this institution.

William A. Owens, Jr. was named director of the Social Science Research Institute, in addition to his duties as professor of psychology, at the University of Georgia, effective July 1. Dr. Owens was born June 13, 1914, in Duluth, Minnesota. He received the B.A. degree from Winona State College and the Ph.D. degree from the University of Minnesota. Since 1968, he has served as professor of psychology at the University of Georgia.

Joseph V. Adams was appointed dean of Student Affairs and professor of psychology at Armstrong State College, effective August 10. He was born March 20, 1934, in Gulfport, Mississippi, and received the B.A. degree from Tennessee Temple College, the M.A. degree from Baylor University, and the Ph.D. degree from the University of Alabama. Dr. Adams has served as associate professor of psychology at Stetson University since 1962 and as chairman of the Department of Psychology at Stetson since 1969.

Edwin Thompson Hibbs was appointed head of the Biology Department and professor of biology at Georgia Southern College, effective in the fall quarter. He was born July 12, 1918, in Salem, Ohio, and received the A.B., M.S., and Ph.D. degrees from Ohio State University. Since 1961, Dr. Hibbs has served as professor of applied entomology at Iowa State University.

Henry Iler was named head of the Art Department and associate professor of art at Georgia Southern College, effective in the fall quarter. Born May 9, 1934, in Gainesville, Georgia, Mr. Iler received the B.F.A. and M.F.A. degrees from the University of Georgia. He has served as supervisor of Art and Art Research at the Smoky Mountain Cultural Arts Development Association since 1968.

Hubert Leon Garrett was appointed head of the Department of Physical Education and professor of physical education at West Georgia College, effective in the fall quarter. Dr. Garrett was born June 5, 1926, in Detroit, Michigan. He received the B.S. degree from Austin Peay State University, and the M.A. and Ed.D. degrees from George Peabody College. Since 1967, he has served as chairman of the Department of Health and Physical Education at George Peabody College.

Betty C. Dallas was named coordinator of Dental Hygiene and assistant professor of dental hygiene at Albany Junior College, effective July 1. She was born August 6, 1932, in Wheeling, West Virginia, and received the B.S. degree from West Liberty State College. Mrs. Dallas has served as instructor in dental hygiene at Armstrong State College since 1968.

Hubert H. Whitlow was named librarian at Floyd Junior College, effective July 1. He was born February 16, 1930, in DeKalb County, Georgia, and received the B.A. and M.Ln. degrees from Emory University and the M.A. degree from the University of Florida. Since 1968, he has served as chief circulation librarian and assistant university librarian of the Circulation Department at the Emory University Libraries. ■

Newest Junior College in System Offers Wide Range of Programs

FLOYD JUNIOR COLLEGE, THE NEWEST UNIT of the University System of Georgia, began its first academic year—in the 1970 fall quarter—with 545 students enrolled.

The College became the twenty-seventh institution of the University System. It became the eleventh junior college of the System—the eighth junior college opened since mid-1964.

A preliminary breakdown of the enrollment figures at the new institution shows that the opening-quarter student body includes 496 freshmen; 41 sophomores; and 8 transient students.

The majority of the students are from Floyd County, although there are some students from five nearby counties. An analysis of enrollment figures lists 424 from Floyd County, 68 from Polk County, 32 from Chattooga County, 13 from Bartow County, 5 from Gordon County, and 3 from Haralson County.

Many Transfer Students

Included among the Floyd Junior College students are 232 who previously attended other institutions of higher education. The transferees include 154 from institutions of the University System, 48 from Georgia institutions outside the University System, and 30 from institutions outside Georgia.

Transferees from University System institutions include 82 from the University of Georgia (including those from the University's Rome Extension Center, whose lower-division programs were closed when the Floyd Junior College was activated); 35 from West Georgia College; 19 from Dalton Junior College; 3 from Abraham Baldwin Agricultural College; 3 from North Georgia College; 2 from Georgia College at Milledgeville; 2 from Georgia Institute of Technology; 2 from Georgia State University; and one from each of six other institutions: Brunswick Junior College; Clayton Junior College; Columbus College; Gainesville Junior College; Kennesaw Junior College; and Southern Technical Institute.

Transferees from Georgia institutions outside the University System include 21 from Shorter College; 18 from Berry College; 4 from Reinhardt College; 2 from Gordon Military College; and one from each of three other institutions: DeKalb College; Emory-at-Oxford; and Young Harris College.

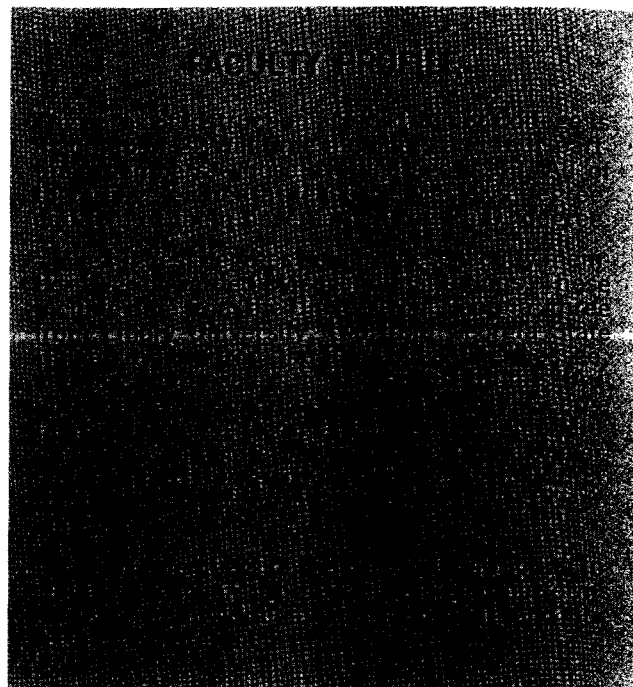

The students who previously attended other institutions include the 8 transient students—4 from the University of Georgia; 3 from Berry College; and 1 from West Georgia College.

A breakdown of the Floyd enrollment figures indicates that there is almost a two to one ratio of men to women.

Floyd Junior College, like all the other junior colleges opened in the University System in the past seven years, is a nonresidential institution which draws its entire student body from an area lying within daily commuting distance.

All Students Commute

The close-to-home feature of the junior college is a particularly strong attraction. Floyd Junior College is only a 10-minute to 20-minute automobile ride away from the homes of most of the students. President David B. McCorkle believes that

“probably a third—possibly half” of the students now enrolled at the new institution would not be attending college anywhere if the Rome area junior college had not been established.

Many of the students hold full-time jobs and attend the Floyd institution in the evenings. Approximately a third of the total enrollment in the 1970 fall quarter is made up of students attending evening classes. The academic programs of the College are offered continuously from 8 a.m. to 10:30 p.m. The evening courses correspond in quality and in orientation to the daytime courses. The average workload of the students working on a full-time basis and attending evening classes is considerably smaller than the average workload of the full-time students.

Classes for the opening quarter are being conducted in downtown Rome, while the construction of permanent facilities for the College is being completed on a 233-acre campus approximately seven miles south of Rome. The permanent facilities are scheduled to be occupied by January 1, 1971.

The Rome facilities being used on a temporary basis are located in the Metro Building, 104 East Third Avenue, and in the Education Building of the First Methodist Church, which also is located on Third Avenue—near the Metro Building.

The College offers four principal types of programs: College Transfer, Career, Developmental, and Public Service. The College Transfer and the Career programs are made up of college-credit work, while the Developmental and the Public Service programs are conducted on a non-credit basis.

College Transfer Programs

College Transfer programs are designed to prepare students

To transfer, after successfully completing two years of college work, to senior colleges and universities to begin upper-division work in pursuit of baccalaureate and professional degrees.

The College Transfer programs lead to Associate in Arts and Associate in Science degrees.

The Core Curriculum for the freshman and sophomore years of College Transfer work is in effect at Floyd Junior College, the same as at all other institutions of the University System. Credit earned under the Core Curriculum at any System institution is transferable to any other System institution.

Major fields of study in the College Transfer programs are agricultural engineering; agriculture; biology; business administration; business education; chemistry; elementary education; forestry; journalism; language and literature; mathematics; physical education; physics; pre-dental hygiene; pre-dentistry; pre-engineering; pre-medical technology; pre-medicine; pre-pharmacy; pre-physical therapy; pre-veterinary medicine; recreation; secondary education; social science; and speech and drama.

The majority of students are believed by College officials to have intentions of seeking two-year degrees in College Transfer programs. The lack of absolute certainty stems from the fact that beginning students at the College do not have to designate—and in many cases may not know—whether they expect to pursue College Transfer study or the more specialized Career study.

Career Programs

Career programs are designed to prepare students for employment after successfully completing the sophomore year of college, and to increase the advancement potential of students who are employed while enrolled in college. These programs

are more extensively oriented in fields of specialization than are the two-year College Transfer programs. Typically, a student in a two-year Career program will receive a year of general education and a year of instruction and internship-type experience in his field of specialization.

Major fields of study in the Career programs are secretarial science, general education, business, and recreation leadership.

Developmental Programs

Developmental programs are designed for students who require remedial instruction, review of subject matter, or other assistance in one or more academic areas before enrolling in College Transfer or Career programs.

A student may take, simultaneously, college-credit work in a College Transfer or a Career program and non-credit work in a Developmental program. A substantial number of the students are doing this.

Included among the 545 students enrolled for the fall quarter are 183 who are taking Developmental courses. The 183 students include 96 enrolled in one Developmental course, 58 enrolled in two Developmental courses, and 29 enrolled in three Developmental courses.

Public Service Program

The College is implementing a Public Service program made up of a wide variety of activities designed to meet special needs of the people in the entire area served by the institution. These activities are designed primarily to serve the adults of the area who are interested in continuing their education on a non-credit basis. They will include conferences, seminars, short courses, exhibits, special lectures, and other cultural and educational offerings. ■

HISTORY OF COLLEGE

The Board of Regents of the University System of Georgia voted in April, 1968, to authorize the establishment of the Floyd Junior College. That action stipulated that, in accordance with long-standing Regents' policy, the local community would provide a campus site and funds for the construction of the buildings required for opening the institution.

Voters of Floyd County on November 5, 1968, approved, by a vote of 13,096 to 4,087, a bond issue of \$3,215,000 to provide local funds for the establishment of the College.

The Regents at a meeting on November 12-13, 1968, approved a contract between the Regents and the Floyd County Commissioners, providing for the development of the College. That contract represented terms worked out over the previous several months.

In December, 1969, David B. McCorkle was named president of the College, effective January 1, 1970. Dr. McCorkle, 48, a native of Buena Vista, Georgia, and the holder of the Ed.D. degree from Oregon State University, was director of Student Affairs at the Medical College of Georgia for eight years before becoming president at Floyd Junior College.

The construction contract for the initial buildings of the College was awarded by the Board of Regents in January, 1970. Construction work was begun in February. Van Winkle and Company, Atlanta, is the general contractor. The campus designing and the architectural work for the buildings were done by Aeck Associates, Inc., Atlanta. The designation of the Aeck firm was approved by the Regents in June, 1968.

Making up the initial complex of buildings will be an academic building-library; an administration building-food service facility; a maintenance-shop building; and a physical education building. These buildings, which will provide a total of approximately 73,000 square feet of floor space, are being built on a 233-acre tract located approximately seven miles south of Rome, fronting on the east side of U.S. Highway 27. The tract contains a 70-acre lake.

The entire operation of the College is scheduled to be moved from its temporary location in downtown Rome during the Christmas holidays. Classes and other activities are expected to be held on the permanent campus beginning in January, 1971, when the winter quarter opens.

March 1969

VICE PRESIDENT AMONG ADMINISTRATORS APPOINTED

A VICE PRESIDENT, TWO DEANS, and five other administrative appointees were approved by the Board of Regents in March.

George W. Walker was named vice president of West Georgia College, effective July 1. Born in Canada in 1914, he received the Ph.D. degree from the University of North Carolina. He joined the faculty of West Georgia in 1957 as professor of English and head of the Department of English and has been dean there since 1960.

The new position of vice president of West Georgia was approved by the Regents at the March meeting. The vice president will serve as deputy to the president, and will be responsible for organizing and supervising the work of the administrative staff of the institution.

Nicholas Quick was named professor of English and dean of the recently authorized School of Arts and Sciences at Georgia Southern College, effective June 1. Born in Indiana in 1920, he received the Ph.D. degree from the University of Texas. He has served as professor of English at Arkansas State University for the past year.

Hasell T. LaBorde was named dean of academic affairs at Macon Junior College, effective March 12. Born in South Carolina in 1921, he received the Ph.D. degree from the University of North Carolina. He joined the faculty at Macon Junior College in 1968 as professor of mathematics and head of the Department of Mathematics. He will continue to perform his duties as professor of mathematics.

Edward E. Gilbert was appointed professor of biology and head of the Department of Biology at West Georgia College, effective in the 1969 fall quarter. Born in New York in 1925, he received the Ph.D. degree from the University of California at Berkeley. He has served as professor of biology at Northeast Missouri State College since 1965.

William W. Wright, Jr. was appointed professor of business and economics and chairman of the Division of Business and

Economics at Macon Junior College, effective August 1. Born in Georgia in 1931, he received the Ph.D. degree from the University of Alabama. He has served as chairman of the Department of Economics and Business at Wofford College since 1962.

Dr. Wright will teach one graduate course per quarter in the Macon area for the University of Georgia. In joint-staffing, he will serve as a University professor of economics.

John R. Timmerman was appointed professor of English and chairman of the Department of English and Speech at the Georgia College at Milledgeville, effective in the 1969 fall quarter. Born in South Carolina in 1910, he received the Ph.D. degree from the University of Texas. He has served as academic dean at Berry College since 1960.

Rudolph A. White was named professor of economics and director of instruction in the College of Business Administration at the University of Georgia, effective July 1. Born in Alabama in 1924, he received the Ph.D. degree from the University of Alabama. He joined the faculty of Mississippi State University in 1958, and has been director of academic affairs (business) since 1967.

The directorship to be filled by Dr. White is new, having been approved by the Regents at the March meeting. The director of instruction will have primary responsibility for assisting the dean of the College of Business Administration in the areas of curriculum development, faculty recruitment, teaching methods and media, academic advising, and evaluation of instruction.

James R. Robertson was named comptroller of Clayton Junior College, effective March 16. A native Georgian, he received the B.B.A. degree from Georgia State College. Mr. Robertson, 38, has been senior auditor of the University System of Georgia since March, 1968. ■

Three Projects (Continued from Front Cover)

and Peter Norris, Atlanta.

Redesignated Projects

Redesignated projects and project budgets are as follows:

— Library, Valdosta State College, \$2,250,000, which was formerly designated as an addition to the library with a project budget of \$800,000; Ellis Ingram and Associates, Valdosta, previously received tentative appointment as architects.

— Married student housing, University of Georgia, \$4,700,000, which was formerly designated as a dormitory for 1,000 students with the same budget; Aeck Associates, Inc., Atlanta, previously received tentative appointment as architects.

Preliminary Plans

Preliminary plans for initial buildings at Floyd Junior College, Floyd County, and the campus master plan for the institution were approved. The appointment of Aeck Associates, Inc., Atlanta, to prepare final plans and specifications for the initial buildings was approved. Library, student

center, administration, physical education, and warehouse-shop buildings are included, with a project budget of \$2,800,000.

Floyd Junior College will open in the fall of 1970.

Preliminary plans for a bookstore facility at the Georgia Institute of Technology were approved. Also approved was the appointment of Jova-Daniels-Busby, Inc., Atlanta, to prepare final plans and specifications for the project. The facility has a project budget of \$536,382.

Increased Budgets

Budget increases totaling \$247,998 were approved for four previously authorized construction projects, as follows:

— Addition to chemistry building, University of Georgia, increased \$139,379—from \$2,300,000 to \$2,439,379.

— Student services building, Georgia College at Milledgeville, increased \$66,691—from \$1,457,694 to \$1,524,385.

— Classroom-science building, Albany Junior College, increased \$27,325—from \$612,967 to \$640,292.

— Dormitory, Fort Valley State College, increased \$14,603—from \$903,841 to \$918,444. ■

- Authorization was voted for the sale of University System Building Authority revenue bonds that the Board of Regents has held in trust for the Georgia Institute of Technology.

The bonds have a par value totaling \$225,000 and an interest rate of 4½ percent. Funds derived from the sale of these securities will be used as a supplemental loan authorized to be used in the construction of a bookstore facility at Georgia Tech. Bookstore earnings will be used to repay the loan.

- Authorization was given for the public sale of the real property in the Porter Trust on the first Tuesday in October or November, 1969, to the highest bidder, with 25 percent of the purchase price down and the balance payable over a period of three years at 8½ percent interest.

Assets of the Porter Trust, including approximately 123 acres of land in Macon, were left to the Board of Regents in the will of the late James H. Porter. These assets are to be used for educational purposes.

- The establishment of a trust fund, the I. A. Solomons, Jr. Memorial Pharmacy Loan Fund, at the University of Georgia was given approval.

Phillip Solomons, Chatham County, Georgia, is the donor of the trust fund. The original gift will amount to approximately \$1,008.

Both the principal and the interest are to be used for short-term emergency loans to students in the School of Pharmacy at the University.

- An official seal for Macon Junior College was approved. The seal shows the seal of the State of Georgia, the date of the founding of the institution, surrounded by "Macon Junior College, University System of Georgia."

- Appointments and leaves of absence of faculty members in the University System institutions and institution-related programs were approved as recommended by the presidents and Chancellor Simpson.

- Budget amendments of institutions were approved as recommended by the presidents and Chancellor Simpson. ■

\$65,455 Regents' Scholarships Awarded to Georgia Students

REGENTS' SCHOLARSHIPS were approved by the Board of Regents in September for 158 Georgia residents who will attend institutions of the University System during the 1969-70 academic year and in the 1970 summer quarter.

These scholarships amount to \$65,455.

The universities and colleges to be attended by the recipients, and the number of scholarships and total amount of the awards for each institution, are as follows:

Georgia State University, 5—\$3,359; University of Georgia, 42—\$20,685; Medical College of Georgia, 2—\$1,100; Albany State College, 9—\$3,410; Armstrong State College, 1—\$400; Augusta College, 2—\$1,038; Columbus College, 2—\$600; Fort Valley State College, 20—\$7,000; Savannah State College, 9—\$3,950; Valdosta State College, 19—\$6,225; West Georgia College, 20—\$8,000; Abraham Baldwin Agricultural College, 9—\$2,470; Dalton Junior College, 6—\$2,600; Kennesaw Junior College, 4—\$1,700; Macon Junior College, 1—\$350; and Southern Technical Institute, a division of the Georgia Institute of Technology, 7—\$2,568.

For the 1969-70 fiscal year, the Board of Regents allocated \$200,000 in state appropriations for Regents' Scholarships. Each institution in the University System received a proportionate share of these allocations, based on its share of total enrollment of students qualifying as Georgia residents under the policy of the Board.

Each institution determines when its allocation will be used during the year, subject to Board approval. The institutions committed most of the funds in the three or four months prior to the beginning of the academic year in September.

Regents' Scholarships have been awarded annually since 1961-62. The amount for the System has been \$200,000 a year since 1964-65. ■

Rome Area College of System Close to Construction Start

FINAL PLANS FOR THE DEVELOPMENT of Floyd Junior College have been completed, and construction of initial buildings of the two-year institution is expected to begin early in the fall.

The College, situated seven miles south of Rome on a 233-acre tract adjacent to U.S. Highway 27, will open in September, 1970, as the twenty-seventh unit of the University System.

Initial facilities will include six structures: an administration building; a classroom-laboratory building; a library; a student services building, with a food service area, lounges, and meeting rooms; a physical education building; and a maintenance building. These facilities—one-story in design and air conditioned—will contain a total of approximately 90,000 square feet of floor space, and will accommodate an enrollment of up to 700 students.

The contract for precast and prestressed concrete materials, including columns, beams, and roof slabs, was awarded August 28 to Macon Prestressed Concrete Company, Inc., Macon. Bids for construction of the buildings and development of the campus site are scheduled to be opened October 16.

Grading of the site has been completed, and construction work can begin within a few days after the contract is awarded.

The structures will have brick exteriors and concrete block interiors. Air conditioning and heating will be provided from a central mechanical system, which can be expanded to accommodate additional buildings that may be required for future expansion of the College.

Parking areas to accommodate approximately 400 cars and other outside facilities are included in the plans for initial development of the campus.

Like seven of the other 10 junior colleges of the University System already in operation, the Floyd Junior College will have a student body made up entirely of commuters.

Aeck Associates, Inc., Atlanta, is the designer and architect of the campus site and buildings.

The project budget for the six buildings and other facilities is \$2,800,000. This amount includes costs of construction, architectural services, and equipment and furnishings. ■

THE System Summary

A PUBLICATION OF THE UNIVERSITY SYSTEM OF GEORGIA • VOL. 5, NO. 11—NOVEMBER, 1969

New School, Center, Degrees Approved by Regents

A NEW SCHOOL, A BIOENGINEERING CENTER, and four new degrees and programs were approved in November by the Board of Regents.

A School of Geophysical Sciences was authorized for the Georgia Institute of Technology, effective January 1, 1970. Existing programs in geophysical sciences will be transferred from the School of Ceramic Engineering in the College of Engineering to the new School in the General College.

The new arrangement will aid recruiting of students and faculty members, the Regents were told. "Geophysical science is a basic field, geophysical scientists are in demand, studies of the geophysical environment are becoming of increasing importance to society, and the Georgia Institute of Technology needs to be in the best position to contribute significantly in this area," according to the request for approval to establish the School.

The Georgia Institute of Technology also was given approval to establish a Bioengineering Center, effective December 1, 1969. Operated under an executive committee and a

director, the new Center will be charged with the responsibility of "promoting and coordinating research directed toward the goal of maintaining the health of the populace and promoting the expansion of health-related industries in Georgia," according to the proposal submitted to the Regents.

It is anticipated that the research program in bioengineering will be sustained by active research and education programs in the basic scientific and engineering disciplines.

Georgia Tech already has in existence more than 40 major research projects in bioengineering, and these will be coordinated by the new Center.

Degrees and Programs

Georgia Tech received approval to establish the Ph.D. degree in psychology, effective in the winter quarter of 1970. Engineering psychology, industrial psychology, and general experimental psychology will be emphasized in the new offering.

The offering of the 3-2 Program between Georgia Tech and

(Continued on Page 3)

Modified Design for College Will be Used in New Bidding

THE FLOYD JUNIOR COLLEGE PROJECT, in the Rome area, is being redesigned, following the rejection by the University System of all construction bids opened on October 16.

Three bids were submitted, and the lowest of these—\$3,732,415—was \$1,313,277 above the construction budget of \$2,419,138.

The project will be readvertised for construction bids approximately December 1, and it is expected that new bids will be received immediately after the Christmas holidays, says Frank C. Dunham, University System director of construction and physical plant.

"There were a number of bid alternates in the original design which would have reduced the contract price to \$3,376,626," still \$957,488 more than the construction budget, Mr. Dunham said. "However, an analysis of the bids indicated that the unit cost of the project as bid was greatly in excess of comparable other junior colleges, and that there was in all

DECEMBER MEETING AT DUBLIN

The next regular monthly meeting of the Board of Regents of the University System of Georgia will be held December 10 at Dublin, Chairman H. G. Pattillo has announced.

The business session, scheduled to be held at Holiday Inn, Interstate Highway 16 and U.S. Highway 441-South, will begin at 11 a.m. ■

likelihood insufficient competition in the bidding which influenced the results."

Chancellor George L. Simpson, Jr. said that if it is not possible to complete the campus buildings by September, 1970, the college, the twenty-seventh unit of the University System, will be opened in other facilities in Rome for the fall quarter of 1970. Both Kennesaw Junior College, at Marietta, and Gainesville Junior College were opened under similar circumstances.

"It is anticipated that the new plant will be available by January, 1971, at the latest," the Chancellor stated. ■

THE System Summary

A PUBLICATION OF THE UNIVERSITY SYSTEM OF GEORGIA

VOL. 5, NO. 12—DECEMBER, 1969

Owen, McCorkle Named Presidents by Regents

PRESIDENTS FOR TWO COLLEGES of the University System were elected by the Board of Regents on December 10 at a meeting in Dublin, Chancellor George L. Simpson, Jr. announced.

John H. Owen, director of Agricultural Experiment Stations at the University of Georgia, was named president of North Georgia College, Dahlonega, effective July 1. He will succeed Merritt E. Hoag, who will be associated with the Chancellor's office as a consultant after June 30.

David B. McCorkle, director of student affairs at the Medical College of Georgia, was named to become the first president of Floyd Junior College, which will open in the Rome area next fall. His appointment becomes effective January 1.

North Georgia College President

Dr. Owen has been director of Agricultural Experiment Stations of the University of Georgia College of Agriculture since March, 1966. Before assuming this position, he was professor of plant pathology and chairman of the Plant Pathology Division at the University of Georgia, 1959-66. He served as assistant professor, associate professor, and professor of plant pathology at the University of Florida, 1949-59.

He received the B.S.A. degree in plant pathology in 1943

(Continued on Page 6)

West Georgia Receives Approval To Launch New Degree Programs

TWO NEW MASTER'S DEGREE PROGRAMS and one bachelor's degree program for West Georgia College were authorized by the Board of Regents at the December 10 meeting. All of these will be established during 1970.

A program leading to the Master of Education degree with a major in business education will be initiated in the summer quarter. It will provide opportunities for teachers in the Carrollton area to seek the advanced degree, and will help meet a need for additional secondary and post-secondary business teachers and for supervisory and other management personnel for business.

A program leading to the Master of Science degree with a major in physics will be established in the fall quarter. It will provide an introduction to research in physics for personnel who plan to seek doctorates, as well as for those who will go into employment in industry. The program is also expected to help fill the need for qualified teachers of physics in high schools and junior colleges.

A program leading to the Bachelor of Arts degree with a major in geography will be implemented in the fall quarter. The objectives of this program include the preparation of students to become teachers of geography and to do graduate work. Also, the new program will supplement other offerings at the institution. ■

Need for Additional Junior Colleges Will be Explored in New Study

A NEW SURVEY OF THE JUNIOR COLLEGE NEEDS of the State was authorized in December by the Board of Regents of the University System. It will be conducted by the staff of the Chancellor's office, and will get underway as soon as feasible, the announcement indicated.

The Regents' action stipulated that the survey will include, but will not be limited to, the Swainsboro-Soperton-Dublin area; southeast Georgia; southwest Georgia; the Athens area; and Griffin.

The most recent comprehensive survey of junior college needs of Georgia was conducted under the direction of the Chancellor's office over a period of approximately 12 months in 1964-65.

The 1964-65 survey resulted in recommendations for the

establishment of junior colleges in the Bibb County-Houston County area, in south metropolitan Atlanta, and in west metropolitan Atlanta. Junior colleges subsequently were established in the first two areas—Macon Junior College, Bibb County, Macon; and Clayton Junior College, Clayton County, south metropolitan Atlanta. A junior college also was authorized for Fulton County, west metropolitan Atlanta, and is in the planning stage.

Also, the 1964-65 survey report recommended that further consideration be given to the Floyd County-Rome area, Spalding County-Griffin, and Thomas County-Thomasville as possible sites for junior colleges. Subsequently, the Regents authorized the establishment of Floyd Junior College, Rome area, which is in the planning stage. ■

New Presidents (Continued from Front Cover)

from the University of Florida, and the M.S. degree in plant pathology and biochemistry in 1948 and the Ph.D. degree in plant pathology in 1949 from the University of Wisconsin.

Dr. Owen is the author and co-author of more than 40 scientific publications. A member of the American Phytopathological Society, he is a former associate editor of the *Journal of Phytopathology*. He is a member of the Committee of Nine, a national committee on regional research in agriculture, and is secretary of the national organization of the State Agricultural Experiment Station Directors. He was president of the University of Georgia chapter of Sigma Xi, research fraternity, in 1968-69.

Dr. Owen was born June 22, 1922, in Savannah, Georgia, and grew up in Quincy, Florida.

He is a member of Phi Kappa Phi, Alpha Zeta, and a number of other honorary organizations.

In 1958, Dr. Owen was named Professor of the Year in the College of Agriculture of the University of Florida.

He served in the Navy during World War II, and held the rank of Lieutenant Commander.

Dr. Owen is married to the former Margaret Wilson, of Chicago. They have two daughters: Cathy, 15, and Karen, 11.

In announcing the change in the office of president at North Georgia College, Chancellor Simpson said:

"Dr. Owen has done an outstanding job as an administrator at the University of Georgia, continuing a notably successful career. Before coming into the University System of Georgia, he achieved enviable recognition as a college professor in Florida.

"We are happy that he has accepted higher responsibility as a college president in his native State of Georgia.

"Dr. Owen will continue the present momentum of progress at North Georgia College, and will add his own dimension of effective leadership.

"Dr. Hoag has been a remarkably dedicated and successful president, and has led the College in its greatest period of development. While it is with a feeling of great loss that we accept his decision to leave the office of president, we are delighted and grateful that the University System will continue to have his counsel in several important areas of higher education."

Dr. Hoag has been president at North Georgia since July 1, 1949. Born May 25, 1909, in New Castle, Pennsylvania, he received the B.S. degree in education from Edinboro State College, the M.Ed. degree in administration from Duke University, and the LL.D. degree (honorary) from Norwich University.

Floyd Junior College President

A native of Buena Vista, Georgia, Dr. McCorkle is 47 years of age. He will assume the office of president of the Floyd Junior College following eight years of service as director of student affairs at the Medical College of Georgia. He is also chairman of the institutional student recruitment committee of the Medical College and executive secretary of the admissions committee of the School of Medicine and the School of Dentistry. He is a member of the committee on planning and development of new physical facilities at the institution.

John H. Owen

David B. McCorkle

"Dr. McCorkle has an impressive background in college teaching and administration, as well as other rich and broad experience in the field of education," Chancellor Simpson said. "These assets will be of great value in his leadership in the development and operation of this important new unit of the University System."

Dr. McCorkle attended Georgia Southwestern College. He received the B.S.Ed. degree in social studies in 1947 and the M.Ed. degree in counseling and guidance in 1948 from the University of Georgia, and the Ed.D. degree in educational psychology and general education in 1953 from Oregon State University.

In 1942-46, he was engaged in medical administration with the U. S. Army Medical Corps.

His other positions, prior to his association with the Medical College of Georgia beginning in 1961, included the following:

1948-50, University of Georgia, assistant professor of education; 1950-51, General Extension Division of the Oregon State System of Higher Education, part-time instructor; 1951-52, Oregon State University, instructor in psychology; 1952-54, University of Mississippi, Oxford, director of student activities and assistant professor of education; 1954-55, University of Mississippi, Oxford, director of personnel (academic and non-academic), director of student activities, and assistant professor of education; and 1955-61, University of Mississippi Medical Center, Jackson, director of student personnel and associate, School of Nursing.

Dr. McCorkle is married to the former George Hice, Cherry Log, Georgia. They have four sons and daughters: Mary Lynn, 19, a student at the University of Georgia; David, Jr., 15; Sari Ann, 13; and Kenneth, 7. ■

Dean at Southern Tech

LEWIS G. VAN GORDER has been named dean of Students at Southern Technical Institute, a division of the Georgia Institute of Technology, effective November 1, 1969.

Born in Wellsboro, Pennsylvania, on April 26, 1920, Mr. Van Gorder has served as director of the School of Special Studies at Georgia State University, 1964-69.

He received the B.S. degree from Mansfield State College and the M.A. degree from George Washington University.

The appointment was confirmed in December by the Board of Regents. ■

THE System Summary

A PUBLICATION OF THE UNIVERSITY SYSTEM OF GEORGIA

VOL. 4, NO. 4—APRIL, 1968

Board Makes Allocations Of State Appropriations

ALLOCATIONS TOTALING \$126,223,949 to institutions and programs of the University System for the 1968-69 fiscal year beginning July 1 were approved by the Board of Regents in April. This amount includes all but \$210,025 of the state funds appropriated for the University System for 1968-69.

The total appropriation of \$126,433,974 for the year includes \$9,642,974 for the employer's contribution to the Teachers Retirement System. Funds for this contribution were previously appropriated directly to the Teachers Retirement System; therefore, the 1968-69 appropriation is an actual increase of \$14,782,000 over the \$102,009,000 appropriated for the same purposes in 1967-68.

The allocations approved in April for 1968-69 include \$112,523,949 for general operations, an increase from \$86,918,000 for 1967-68, and \$13,700,000 for capital outlay, a decrease from \$14,640,000.

GENERAL OPERATIONS

Amounts allocated for 1968-69 compared with amounts budgeted for 1967-68 are as follows:

Teaching Institutions—\$83,467,000, an increase from \$68,753,000.

Extension, Research, and Hospital—\$16,767,100, an increase from \$15,634,000. These funds will be used for

the University of Georgia's Continuing Education Center, Cooperative Extension Service, and Agricultural Experiment Stations; the Georgia Institute of Technology's Engineering Experiment Station and Engineering Experiment Division; and the Medical College of Georgia's Eugene Talmadge Memorial Hospital.

Other Programs—\$12,289,849, an increase from \$2,531,000. The principal item in this category is the \$9,642,974 for the employer's contribution to the Teachers Retirement System, which was appropriated through the Board of Regents for the first time.

Other items in this last category are the office of the Board of Regents; the State Technical Services Program; graduate scholarships; Regional Education payments; Regents' Scholarships; grants to DeKalb College; funds for the University System's new junior colleges in planning and developmental stages; and interest on constitutional debt.

CAPITAL OUTLAY

All of the funds for capital outlay were allocated to lease payments to the Georgia Education Authority (University) for the amortization of bonds for construction projects. The increase of \$540,000—from \$13,140,000 in 1967-68 to \$13,700,000 in 1968-69—will be used for a bond issue for new building projects.

In 1967-68, the budget included \$1,500,000 for improvements and additions to existing physical facilities.

Detailed budgets based on the allocations were scheduled to be presented for action by the Board of Regents at the May and June meetings.

NEW JUNIOR COLLEGE APPROVED FOR FLOYD COUNTY

A NEW JUNIOR COLLEGE to be located in Floyd County was authorized by the Board of Regents in April. The institution, which will be the twenty-eighth unit of the University System, is expected to open in the fall quarter of 1970.

The development of the college is contingent upon the agreement of the local community to provide a fully developed campus of not less than 150 acres and funds for the initial buildings, in accordance with a long-standing policy of the Board of Regents for the establishment of junior colleges. The initial buildings will cost \$2,000,000.

The financial and other support of the local community

is usually provided by the city or county government, the city or county school board, or a combination of political subdivisions.

The area including Floyd, Chattooga, and Polk Counties was designated as a potential future junior college site by the Regents' Study on Community Junior Colleges, conducted in 1965. It is not within a reasonable commuting distance of other public institutions of higher learning. The nearest institution of the University System, Dalton Junior College, is approximately 42 miles from Rome, the county seat of Floyd County.

THE System Summary

A PUBLICATION OF THE UNIVERSITY SYSTEM OF GEORGIA

VOL. 4, NO. 10—OCTOBER, 1968

Foundation Funds Give Extra Faculty Support

FIFTEEN INSTITUTIONS of the University System of Georgia are included among 33 public and private colleges and universities in the state designated as beneficiaries of a \$10 million trust fund established by the Callaway Foundation, Inc., LaGrange.

Initial plans provide for the creation of 40 Fuller E. Callaway Professorial Chairs at the designated colleges and universities. Provisions are made for expansion of the program through the establishment of additional Chairs at the initially designated institutions, or Chairs at other institutions.

The creation of the trust fund, described as the largest private contribution ever given to education in Georgia, was announced in September by Fuller E. Callaway, Jr., a trustee of the Callaway Foundation. The Chairs are named in honor of the Foundation spokesman's father, the late Fuller E. Callaway, LaGrange, a founder of textile mills, a leader in industry, and a strong supporter of educational and religious organizations.

Institutions designated as beneficiaries of the trust fund will enter into agreements with the Foundation to establish the Chairs. The trust fund will then provide a salary supplement of up to 50 percent of the compensation paid by the institutions to professors who occupy the Chairs. Payments will be advanced quarterly, starting September 1, 1969.

University System institutions included are Albany State College, Armstrong State College, Augusta College, Fort Valley State College, Georgia College at Milledgeville, Georgia Institute of Technology (three Chairs), Georgia Southern College, Georgia Southwestern College, Georgia State College (two Chairs), Medical College of Georgia, North Georgia College, Savannah State College, University of Georgia (three Chairs, including one designated for the Law School), Valdosta State College, and West Georgia College.

Private colleges and universities included are Agnes Scott College, Atlanta University, Berry College, Brenau College, Clark College, Emory University (two Chairs), LaGrange College, Mercer University (two Chairs), Morehouse College, Morris Brown College, Oglethorpe College, Paine College, Piedmont College, Shorter College, Spelman College, Tift College, Toccoa Falls Institute, and Wesleyan College.

NEW ACADEMIC PROGRAMS APPROVED FOR COLLEGES

THREE NEW DEGREE PROGRAMS and one new department for institutions of the University System were authorized by the Board of Regents in October.

The new degree programs are as follows:

Armstrong State College—Bachelor of Science in Education degree, with a major in speech correction, effective in the fall quarter of 1969.

Georgia College at Milledgeville—Master of Business Administration degree, effective in the winter quarter of 1969.

Georgia Southern College—Master of Business Administration degree, effective in the fall quarter of 1968.

West Georgia College was authorized to establish a Department of Philosophy within the Division of Humanities, effective in the fall quarter of 1968.

Construction, Site Selection Bring Progress for Colleges

MAJOR STEPS IN THE DEVELOPMENT of two new colleges of the University System were taken in October. Construction of the Clayton Junior College in south metropolitan Atlanta began, and a site for the new junior college in Floyd County was approved by the Board of Regents.

The construction contract in the amount of \$3,170,798 for Clayton Junior College was awarded to T. & B. Builders, Inc., Decatur, in September and work began early in October. The total project budget is \$3,600,000.

Six buildings with areas totaling 165,501 square feet are included in the project. These are administration, library-student center, classroom-laboratory, lecture, physical education, and warehouse-maintenance.

Clayton Junior College is scheduled to open in the fall quarter of 1969.

The site chosen for the junior college in Floyd County is a 233-acre tract located approximately seven miles south of Rome, on the east side of U. S. Highway 27.

It is expected that the Floyd County college will open in the fall quarter of 1970.

THE System Summary

A PUBLICATION OF THE UNIVERSITY SYSTEM OF GEORGIA

VOL. 4, NO. 11—NOVEMBER, 1968

New Schools, Departments, Degrees Approved

THREE NEW SCHOOLS, TWO NEW DEPARTMENTS, and two new degree programs at institutions of the University System were authorized in November by the Board of Regents.

Georgia Southern College was given approval to establish a Graduate School, a School of Education, and a School of Arts and Sciences, effective in the fall quarter of 1968.

The Graduate School is expected to facilitate the expanded development of graduate programs at the institution. In 1967-68, 113 graduate degrees were awarded—3 Master of Arts, 41 Master of Science, and 69 Master of Education. It is anticipated that in 1968-69 the number will increase to approximately 150.

The School of Education will include programs that account for more than half of the degrees awarded by Georgia Southern. In 1967-68, the total of 856 degrees awarded included 456 Bachelor of Science in Education degrees. Teacher education has been emphasized at Georgia Southern from the beginning of the institution.

The School of Arts and Sciences is expected to strengthen the programs in the various fields of Arts and Sciences, which

have been growing for several years, and in other fields. It will provide expanded support for programs in teacher education and for all fields of graduate work offered at the institution.

Departments and Degrees

Georgia State College received approval to establish a Department of Curriculum and Instruction and a Department of Educational Administration within the School of Education, effective July 1, 1969.

Valdosta State College was authorized to offer a Master of Arts degree program in English, effective in the summer quarter of 1969.

Kennesaw Junior College was authorized to establish a program for the awarding of the Associate in Arts degree with a major in police administration, effective in the winter quarter of 1969. Kennesaw will enroll the students, provide the general-education portion of the curriculum, and confer the degree. Georgia State College will provide the police administration portion of the degree program.

1968 Fall Quarter Enrollment Growth of 13 Percent Reported

THE 1968 FALL QUARTER REGULAR ENROLLMENT in the 25 colleges and universities of the University System of Georgia totals 76,231 students, a consolidated report compiled in the office of the Board of Regents shows.

This number is an increase of 8,544 students or 13 percent over the 67,687 students enrolled in the 1967 fall quarter. The increase is a new record gain in fall quarter enrollment. In comparison, other fall quarter increases in this decade, over the enrollment for the previous year in each instance, were 2,302 in 1961; 2,289 in 1962; 3,307 in 1963; 5,968 in 1964; 7,812 in 1965; 7,868 in 1966; and 7,455 in 1967.

Since 1960, the number of students enrolled in the fall quarter in the University System has increased 45,545 or 148 percent—from 30,686 to the 76,231 recorded for the current fall quarter. The number of students is expected to reach at

(Continued on Page 3)

Junior College for Rome Area Advanced by November Actions

A CONTRACT WITH THE FLOYD COUNTY COMMISSIONERS for the establishment of a junior college of the University System in the Rome area was approved on November 13 by the Board of Regents. The action formalized agreements that resulted from planning by the Regents and the Commissioners during the past several months.

In April, 1968, the Regents voted to establish the college, provided local funds were made available for the purchase and development of a campus site and for the construction of initial buildings. Voters of Floyd County on November 5 approved a \$3,215,000 bond issue to meet these requirements.

Floyd County will furnish an undeveloped campus site containing 233 acres, located on the east side of U. S. Highway 27 approximately seven miles south of Rome. The County also will pay to the Regents the amount of \$2,800,000 for the development of the campus site and for the construction of initial buildings.

Opening of the institution is scheduled for September, 1970.

THE System Summary

24278

A PUBLICATION OF THE UNIVERSITY SYSTEM OF GEORGIA

VOL. 5, NO. 1—JANUARY, 1969

Six New Degree Programs Voted at January Meeting

SIX NEW DEGREE PROGRAMS for two institutions of the University System were authorized in January by the Board of Regents.

Georgia Southwestern College was given approval to award the Bachelor of Arts degree with a major in psychology, effective in the 1969 spring quarter.

West Georgia College received approval to award five new degrees. These are the Bachelor of Arts degree with a major in German, effective in the 1969 summer quarter; the Bachelor of Arts degree with a major in philosophy, effective in the 1969 fall quarter; the Bachelor of Business Administration degree with a major in economics, effective in the 1969 fall quarter; the Bachelor of Business Administration degree with a major in office administration, effective in the 1969 fall quarter; and the Bachelor of Science in Business Administration degree with a major in industrial management, effective in the 1969 fall quarter.

The Bachelor of Science in Business Administration degree with a major in industrial management is a cooperative effort between West Georgia College and Southern Technical Institute, a two-year division of the Georgia Institute of Technology. It is designed to enable students who receive the two-year associate degree in industrial management technology from Southern Technical Institute to transfer to West Georgia College and complete the requirements for the bachelor's degree, with little or no loss of credit or time.

The students from Southern Technical Institute will be taking courses presently offered in the Division of Business and Economic Studies at West Georgia College, and the College does not contemplate any new course offerings in connection with the cooperative program.

The Board of Regents recently has approved a number of plans for cooperation between institutions in offering courses required for a degree. While most of these cooperative programs are conducted by University System institutions, one adopted in December authorizes the Georgia Institute of Technology to offer degree work jointly with four private colleges. ■

VALDOSTA STATE OFFICIAL MOVES TO SYSTEM OFFICE

SHEALY E. MCCOY, LONGTIME COMPTROLLER of Valdosta State College, has been named vice chancellor for fiscal affairs of the University System and treasurer of the Board of Regents, effective January 15.

He will be the first holder of the dual-title position, which was created by the consolidation of a number of functions in the broad field of fiscal affairs. University System Chancellor George L. Simpson, Jr., who announced the appointment made by the Board of Regents in January, said that Mr. McCoy will work with the personnel in the comptroller's office at Valdosta State College in effectuating an orderly transfer of his services to the University System office in Atlanta.

(Continued on Back Cover)

Name Authorized for College Under Development in Floyd

THE BOARD OF REGENTS in January approved an official name, Floyd Junior College, for the University System's two-year college that will open in Floyd County in 1970.

In taking the action, the Regents followed a recommendation adopted by Floyd County Commissioners at a meeting in December.

Floyd County is providing a campus site of 233 acres located on the east side of U.S. Highway 27 approximately seven miles south of Rome, and \$2,800,000 for development of the site and construction of the initial buildings. The Board of Regents will handle site development and construction. The Board will operate the institution from the beginning, and will provide additional buildings required for expansion after opening.

Floyd Junior College will open as the twenty-seventh institution and the eleventh junior college of the University System.

The Board voted in April, 1968, to develop the junior college in cooperation with Floyd County, in accordance with a long-standing policy requiring local financing of initial facilities for new institutions. Voters of Floyd County in November approved a bond issue of \$3,215,000 to meet the requirements. ■

A monthly report of the Georgia Board of Regents

DECEMBER 1990

Vol. 26

2-1

Floyd President McCorkle to retire

Saying simply that "it's time," Floyd College President David McCorkle this month announced his retirement after nearly 50

years in education.

In a brief letter to Chancellor H. Dean Propst dated December 10, Dr. McCorkle wrote, "I request permission to

retire as of the end of June, 1991. I appreciate everything you have done for me and, most of all, I appreciate what you have done for the University System and the state of Georgia."

Later, Dr. McCorkle, 68, said the decision to retire came about because the timing felt appropriate. "I started as an elementary school principal at the age of 19, and I've been plugging away ever since," he said.

Dr. McCorkle was appointed the first president of Floyd College in December 1969 and took office the following month. He is second only to Clayton State's Harry Downs in seniority among System presidents.

In his years as president, he saw the college grow from 500 students to a record enrollment of more than 2,000 students this fall. He also helped bring about numerous cooperative programs with technical institutes in the

PLEASE SEE PAGE 3...

A Common Vision

The three boards outline broad goals

If the state's top three education officials have their way, ten years from now every adult in Georgia will be able to read.

Nine out ten will have graduated from high school or passed the GED. Three out of four will go on to some kind of postsecondary education.

These astoundingly ambitious goals are part of a 66-page report presented this month to the Board of Regents. Titled *Target 2000*, the report outlines a number of broad objectives involving the University System, the state Board of Education and the state Board of Adult and Technical Education.

While some of the goals are shared among the three agencies

— as a group and between each other — most of them are statements of what each would like to accomplish individually over the next decade.

For the System, that essentially translates into ten objectives, each one an offshoot from the chancellor's State of the System address made to the

System budget cut again

Because "the situation is worse than even the most pessimistic budget analysts have believed," Governor-elect Zell Miller has told the Board of Regents to pare another 1 percent from the University System's FY91 budget.

The \$9.1 million reduction, which comes on the heels of a \$31.5 million cut in the System's budget this fall, will apply to all institutions and nearly all activities except for the MCG Hospital and Clinics, a "life-safety institution."

All state agencies except for "life-safety institutions" will sustain cuts.

At the December 11 meeting of the Regents, Chancellor H. Dean Propst reviewed with the Board a memo from Miller detailing the cuts. The memo said the System must present its reductions by Dec. 14.

With the new cuts, the System's total FY91 budget reduction totals \$40.6 million — a figure that amounts to a 4 percent reduction at the institutions and a 6 percent cut at the central office. □

Report: Review, reform teacher ed

The System's colleges and universities should forge stronger relationships with the state's school systems to improve teacher education, the head of a study committee told the Board of Regents this month.

Frank Lowery, an education professor at Georgia Southwestern College and head of the Study Committee on Initial Teacher Preparation Requirements, presented a report by the committee that also indicated the amount of professional education coursework should be improved and increased.

"In [some] cases," the report said, "it was suggested that courses specifically designed to meet the needs of the classroom teacher be developed and substituted rather than the net number of teacher education courses reduced. If anything, the inference was that more

rather than less professional education coursework may be required."

At the Board's Wednesday session, Dr. Lowery noted that the committee listed 31 broad recommendations for improving teacher education. The document also contained four conclusions, one of which was a suggestion to apply a \$5,000 grant from the Education Commission of the States to conduct an 18-month study of teacher ed and to develop a "blueprint for action."

Teacher education in the University System was studied twice in the 1980s. A 1983 task force report titled *Necessary Change* cited 20 recommendations for bettering education programs, and a 1986 external review committee issued 43 recommendations for improvement.

The catalyst for the study committee came last February, when lawmakers introduced a bill that would have limited teacher preparation requirements to 30 credit hours. The legislation was tabled so that a University System/Department of Education committee could evaluate the System's teacher

education methods and courses and determine a proper balance between area coursework and professional education requirements.

In October, Chancellor H. Dean Propst and State School Superintendent Werner Rogers named the committee, which reviewed oral and written testimony from 19 educators. □

McCorkle retiring

(CONTINUED FROM FRONT PAGE)

area and developed the state's premier educational program for the hearing impaired.

Reaction on the Floyd College campus was not one of great surprise. "There was no tremendous shock," said Scott Whitaker, the college's director of public relations. "Really the only question or degree of surprise was whether it would be this coming year or the following year."

Dr. McCorkle's career is one of many firsts. In addition to being Floyd's founding president, he was appointed the first director of student activities at the University of Mississippi; the first director of student personnel at that university's medical school; and the first director of student affairs at the Medical College of Georgia. □

December Appointments

Dorothy Brown knew her retirement date was coming. But the English professor at Macon College had one last piece of business to finish before her exit.

That business was writing a grant proposal to expand the Morgan Adopt-a-School program, a college-wide effort that has helped improve the language and math skills of students at Morgan Elementary School in Bibb County.

The proposal, which would broaden the program to boost cultural literacy among Morgan students, is now in the hands of the U.S. Department of Education, and whether it will be funded is anyone's guess. Regardless, Dr. Brown, who retires on December

31, has left her mark. And this month the Regents rewarded her with the title professor emerita for her 22 years at Macon College and eight years at the University of Georgia.

Dr. Brown is one of five faculty in the System to receive emeritus appointments in December. The others include three at the University of Georgia — **Billie Wickliffe**, **William McKinney** and **Robert Miles** — as well as one at Georgia College. There, **Robert Wolfersteig** is retiring after 25 years.

The December appointments included three administrators. At Kennesaw State College, **Elaine McAllister** was named head of the foreign languages depart-

ment after serving as an associate professor there for the past four years. At Augusta College, **Bill Bompert** was appointed to a second term as acting vice president for academic affairs, effective next July. And at UGA, **Fred Bateman** was named head of the economics department.

Among the new faculty appointed this month are: **Dennis Backus** at Georgia Tech; **Frederick Kuhn** at Medical College; **John Willis** at the University of Georgia; **Milly Kennedy** at Georgia Southern University; **George Lucktenberg** at Clayton State; **Mordu Serry-Kamal** at Savannah State; **Linda Speaks** at DeKalb College; and **Mark Belcik** at Valdosta State. □

The Boom of '88

Board policies and social factors send fall enrollment to a record high.

If only for a moment, fall quarter 1988 was suddenly the 1960s all over again. The circumstances this time around were different, but the numbers brought to mind that time 20 years ago, when enrollment in the University System was booming and it seemed that each autumn brought a new record, each one more surprising than the last.

The System's record enrollment this fall — 161,783 students, a 5.2 percent increase over last year — bears more than a passing resemblance to the steady growth of the 1960s. Like then, the boom of 1988 is both a reflection of the times and the result of new policies. A combination of societal forces and actions by the Board of Regents made it happen. Once again, it is that combination which poses a thoughtful question for the University System: Can Georgia's public colleges and universities expect more of the same in the near future?

The enrollment picture, any way you look at it, shows more of everything. Thirty-one of the 34 institutions report more students. Equivalent full-time (EFT) enrollment is up almost 5 percent. Freshman enrollment climbed 6.2 percent. More blacks enrolled this

Teach Your Children Well

Kids have been busy in Valdosta the past couple of weeks, thanks to a continuing education program sponsored by Valdosta State College.

The six-week program, called "Scope," has been running on Saturday mornings at the school, and features guests ranging from the local prosecutor to Dr. Zug Standing Bear, a North American Indian who teaches anthropology at Valdosta State.

The program is divided into two age groups, with seminars for students in grades 3-5 and 6-8. Classes continue until Feb. 14.

According to Edith Shepherd, the college's public information director, the seminars are diverse. Dr. Standing Bear's features two discussions, "Where Are the Buffalo?" and "Yesterday, Today and Tomorrow." Another, titled "Pigeons, Snakes, Puppies and Kittens," teaches participants how to care for pets.

One of the most popular lessons has been "Whodunit?," a fun and informative program with H. Lamar Cole, Valdosta's district attorney. Participants learn how criminals are caught and convicted, as well as methods of investigation—fingerprinting, witness interviewing, tire tracking, and the like.

Kids can also learn about ham radio in "Tune in the World" and tiny organisms in "Microscopes" and study rock-ets and puppets or French and Spanish.

Georgia Public Television was scheduled to film a story about Valdosta State's program.

Georgia College

The Far East

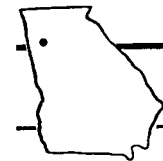

A series of seminars of another kind

has been underway at Georgia College, and when it's over the Milledgeville business community will have a better understanding of its industrial counterparts in the Far East.

On Jan. 12, visiting lecturers began telling audiences just about everything they wanted to know about Japan. The lectures run every other Monday evening until Feb. 23, and are open to the general public.

According to spokeswoman Sara Beauchamp, local business leaders sparked the idea for the series. Guest speakers include professors from Emory University and Oglethorpe University, as well as Georgia College.

The seminar slated for Feb. 9 features Emory's Dr. Irwin Hyatt, who will outline Japanese history; on Feb. 23, members from the business community will present an overview of Japanese business.

College*

Floyd Honors

An honors program was last summer's brainchild of a handful of Floyd Junior College faculty members, and the group wasted no time getting one started. Now, six months later, the program has been launched with 20 students enrolled for winter quarter.

Participants have signed up for mostly humanities and history classes, and will enjoy field trips, a new honors student lounge and extra library privileges. To qualify for such amenities, the students must have a 3.5 cumulative grade point average, or a 3.0 with two faculty recommendations.

Columbus College

Note Swapping

Columbus College has been involved in some interesting maneuvers with Honduras—though they involve concerts, not contras.

The college's exchange program with Escuela Musica, a Honduran high school of performing arts, soon will get a boost from a benefit musical gig sponsored by the Columbus College School of Music.

The benefit, billed as "Musical Extravaganza V," will be held February 9-10 and will feature an evening of "Boston Pops-style music" at the city's Iron Works Trade Center.

Four musical groups—the Civic Chorale, a jazz ensemble, a symphony wind ensemble and a chamber music trio—will entertain guests from four separate stages.

The entire affair is being underwritten by the American Family Life Insurance Company, with proceeds going to Escuela Musica. Columbus college has been involved with the Honduran school for two years, swapping students to study music.

"It began when we sent the Columbus Trio to Honduras in 1985," says college spokesman Dale Crail. "Right now, we've got seven string majors studying with us."

Crail says Musical Extravaganza is already sold out for both nights—"and that's without any advertising." All of the music will be performed by students, faculty and local townspeople.

*Georgia Southern
College*

Headhunting

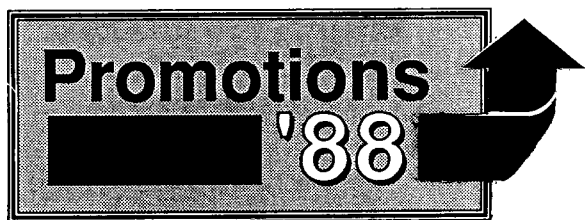

Somewhere in the stack of 114 envelopes postmarked from cities coast to coast is the name and description of Georgia Southern College's next president.

Presidential Search Committee Chairman Dr. Richard Osburn has announced that a national search yielded 114 applications for the position held by Dr. Dale Lick for eight years. Lick, who left last year to assume the presidency of the University of Maine, was replaced temporarily by Harry Carter.

Osburn says the 20-member search and screen committee is wading into the

Board Action

(continued from page 7)

of study. An agreement is usually executed by the college president and the head of a business or agency.

The table on page 7 shows the number of programs and participants for each institution in the University System.

* * *

In other Board action, the Regents approved a new master's degree in management information systems (MIS) at Georgia College, effective next fall.

The new program will focus on teaching students to apply information technology to business problems and preparing these students for business careers in information systems.

A recent survey of 136 Georgia College graduate students showed that 29 percent "would have entered this master's program had it been available when they began their graduate work." The study also said 12 percent would transfer immediately and another 29 percent would switch to the program, depending on the amount of completed coursework that would transfer.

Currently, the only other MIS program in the University System is at Georgia State University, and Georgia College officials pointed to the high number of high-tech opportunities in the Macon area as evidence of the need for a graduate program in information systems.

A healthy first-year enrollment in the program is anticipated—45 students, with a minority participation rate of 18 percent.

* * *

Other items approved by the Regents in April included:

- an amendment to the *Bylaws* of the Board that says the president of each institution would approve certain rules for regulating certain student activities. The change was recommended by University of Georgia Interim President Henry King Stanford, and simply makes that section of the policy consistent with the rest of the policy. The proposed amendment will now "lie on the table" for 30 days.
- the renaming of a building at **Dalton Junior College**. Memorial Hall will now be named "Elizabeth Kennedy Gignilliat Memorial Hall," after the late wife of Regent Arthur Gignilliat. Regent Gignilliat served as president of Dalton Junior College when the building was constructed, and DJC's faculty and staff wanted the building named after Mrs. Gignilliat in honor of the spouses of the original faculty and staff.
- the naming of two buildings at **Fort Valley State College**. The new administration building will be recognized as the Cornelius V. Troup Building in honor of the second president of the college. Dr. Troup presided from 1945 to 1966, a period of major growth for Fort Valley State. Another structure, the farm and community life center, will be named for Cleveland W. Pettigrew. Dr. Pettigrew was the fourth man to serve as president of Fort Valley State before his untimely death in 1982. ■

BOARD ACTION

Junior Colleges Set for Major Changes

New names, admissions requirements approved in June

Last November, three junior college presidents composing a special study committee reported to the Board on some of the concerns and suggestions of their colleagues at other two-year institutions. The committee's study included, among other things, several recommendations designed to clarify the mission and upgrade the image of public junior colleges in Georgia.

After months of deliberation and further study, the Regents acted on some of those proposals in June. As a matter of fact, most of the education committee's work at this month's meeting centered on junior colleges, and in the end the junior colleges found themselves facing some positive changes—changes that, hopefully, will help boost sagging enrollments at the schools.

One of the items that received much attention was a name change for junior colleges. On July 1, 1988, the words "junior" and "community" will be dropped from the titles of those colleges—a cosmetic change suggested by the study committee last fall. To distinguish these colleges from their senior counterparts, all signs, literature and

stationery will be marked with the phrase, "A Two-Year Unit of the University System of Georgia."

"There are those who believe that the term 'junior college' implies something less than a college," Vice Chancellor for Academic Affairs Ray Cleere told the Board. "Some students apparently believe they're not going to a real college. Some of the junior college presidents say the word 'junior' has had an

"This (pre-college) curriculum is one of the most aggressive in any state."

—Dr. Ray Cleere

impact on their enrollment."

In three instances—Emanuel County Junior College, Atlanta Junior College and Albany Junior College—the dropping of "junior" will likely bring some confusion. In those cases, each college president will ask the chancellor to approve an alternative name.

Although the elimination of "junior" from the names of two-year colleges made headlines, the biggest news

involved some big changes in admissions policies at the schools. Beginning fall quarter 1988—the time when the University System's "College Preparatory Curriculum" requirements go into effect—junior colleges will have admissions standards that distinguish between two types of students.

The pre-college curriculum requirements were created in 1984, after the Board decided a uniform admissions policy was needed for all 34 schools in the System. "This curriculum is one of the most aggressive in any state," Dr. Cleere told the Board's education committee. "A lot of states have passed admissions standards such as these and have had to back off of them because the students were arriving at colleges unprepared."

Now, however, the Board has adopted separate admissions requirements for junior college students seeking an education for job training rather than transferring later to a four-year school. Because the needs of those students are different, other requirements in pursuing an associate degree were amended as well.

Junior Colleges

(continued from previous page)

The new requirements came with the establishment of a uniform definition of associate degrees. Now, all Associate of Arts and Associate of Science degrees are transferable to senior institutions, and are subject to all policies applying to baccalaureate degrees. In other words, those enrolling in junior colleges to pursue A.A. or A.S. degrees must meet the admissions standards established in 1984, must take the core curriculum, and must take the Regents Test.

Associate degrees for career programs will be categorized under Associate of Applied Sciences (A.A.S.) and Associate of Science in a designated career field. The Regents approved five specific guidelines for these degrees, which are non-transferable because they are career-oriented instead of academic-oriented.

With the distinction between degree programs and career programs came the need for new admissions requirements—appropriate standards to match the mission of each program. At the June meeting, the Board authorized separate requirements for the following kinds of students:

1. *Non-degree students and students seeking career associate degrees.* College Placement Examination (CPE) scores, instead of Scholastic Aptitude Test (SAT) scores, are required for admission.

2. *Freshman international students.* Those graduating from a high school outside the United States are exempt from the SAT or the ACT if their native language isn't English. English proficiency and an equivalent of a 2.0 high school grade point average are required, however.

3. *Students seeking vocational-technical certificates.*

Seven other admissions policy changes for potential junior college students also won Board approval, including an amendment to the "provisional admissions" policy. Under the new guidelines, students out of high school for at least five years (instead of eight years) can gain provisional admission—provided they take the CPE. The

Continued on page 10...

FY88 Operating Budgets Authorized for 22 Schools

Fiscal Year 1988 operating budgets for 22 System institutions were approved and the budgets of two other schools were granted "provisional approval" at the June Board meeting.

Also tentatively approved in June was the FY88 operating budget for the University System's Central Office Staff. Operating budgets for the other 12 schools in the System passed the Board last month.

The chart below details the dollar amount each school will be working with next year—a combination of state appropriation and internal revenue. The amount for the Central Office Staff was not yet available.

Two changes in *The Policy Manual* and the *Business Procedures Manual* were authorized by the Regents in June upon the recommendation of the Committee on Finance and Business.

Both changes increase the number of days of military leave with pay from 15

to 18 in one calendar year. This year, the Georgia General Assembly passed legislation increasing the number of days as such, and the Board's action brought the manuals into compliance with the new law.

Specifically, Section 802.0804 of *The Policy Manual* was amended. In the *Business Procedures Manual*, Volume 3A, Section III—J.4. was changed.

A food service agreement between **DeKalb Community College** and American Food Service Management also won Board approval in June.

Following a standard competitive process, AFSM emerged as the company that could best provide food service at all three of DeKalb's campuses. The agreement will be executed by Levy Youmans, the college's chief business officer. ■

Fall Quarter Enrollment Sets Record

Enrollment figures for fall quarter 1987 have been released, and the news is good: A record number of students signed up for classes this fall at the 34 public colleges and universities in the University System.

The headcount enrollment of 153,562 signified a 4.1 percent increase over fall quarter 1986, and higher figures were reported in every category.

"It appears that the increase of new students in the freshman class is largely responsible for the enrollment increase," said Dr. Haskin Pounds, vice chancellor for research and planning. "New developmental studies and freshman enrollment increased by 2,320, or 9.8 percent."

Some highlights from the report:

- Equivalent full-time enrollment increased 4.4 percent.
- Black enrollment increased 4.8 percent.
- Thirteen institutions reported record enrollments.
- Twenty-six schools showed increases; eight reported decreases.
- Developmental studies enrollment increased 14.5 percent.
- Freshman enrollment increased 4.8 percent.

Female students continue to outnumber male students in the System by a substantial margin. The University System student population is 53.7 percent female.

The report also stated that the average undergraduate age is 23 and the average graduate/professional age is 31.2. ■

UGA Presidential Committee Named

A presidential selection advisory committee which will participate in the search for a replacement for Fred C. Davison at the University of Georgia was appointed June 26 by Chancellor H. Dean Propst.

Made up of seven faculty and staff members and one student, along with five community and alumni representatives, the committee will work with a Regents' presidential selection committee composed of Regents Sidney O. Smith Jr., chairman; Arthur M. Gignilliat Jr.; Joseph D. Greene; John W. Robinson Jr.; Jackie M. Ward; and Propst and Board Chairman Elridge W. McMillan as *ex officio* members.

"I believe that the members of this presidential selection advisory committee are representative of the University of Georgia community," said Propst. "Not only are they concerned with the interests of the university itself, but also with its statewide impact as our flagship

institution. Their work will be of enormous significance as we seek the most highly qualified candidates from whom will be chosen the next president of the university."

Members of the advisory committee are:

Faculty and staff: Dr. Mary M. Frasier, associate professor of educational psychology, College of Education; Ellen R. Jordan, associate dean School of Law; Dr. States M. McCarter, professor of plant pathology and genetics, College of Agriculture; Dr. John Neter, professor of management sciences, College of Business Administration; Dr. Annie K. Prestwood, professor of parasitology, School of Veterinary Medicine; Dr. Emory N. Thomas, professor of history, Franklin College of Arts and Sciences; and Dr. Allan Barber, vice president for business and finance.

Les Simpson of Tifton, who is a senior majoring in journalism, is the student member.

Alumni and members of the community serving on the committee are Tom G. Cousins (Atlanta), chairman of the University of Georgia Foundation Trustees and chairman of the board and chief executive officer of Cousins Properties, Inc.; Kirby R. Moore (Macon), president of the University of Georgia Alumni Society and partner in the law firm of Westmoreland, Patterson, and Moseley; John L. Clendenin (Atlanta), chairman of the board and CEO of Bell-South Corporation; James M. Piette (Savannah), senior executive vice president, Union Camp Corporation; and Jane Willson (Albany), co-owner of Sunnyland Farms. Chancellor Propst is also an *ex officio* member. ■

Deaf Education Recommendations Approved

Recommendations from the University System Study Committee on Deaf Education were approved by the Board of Regents in June.

The committee had recommended that Floyd Junior College be designated as a Center for Excellence in Deaf Education in Georgia. With a budget of approximately \$221,000 for fiscal year 1987, the center will continue its two-year transfer program and will prepare a detailed proposal for the development of a program of technical assistance to other System institutions serving deaf students; for the development and maintenance of a data base on the deaf population in the state; and for technical assistance in establishing continuing education and public service programs in Georgia relating to deaf education.

DeKalb Community College will continue to operate its program for deaf students with a budget of \$200,000 in fiscal year '87, including \$41,000 in

federal funds. DeKalb will continue its two-year transfer program and its interpreter training program and will conduct a study to determine need and location for additional interpreter training programs in Georgia. The college will also provide continuing education and public service programs for the deaf population in the Atlanta area, including deaf awareness programs for the hearing population. ■

Clayton Junior Granted Name Change

Clayton Junior College received approval from the Board of Regents in June to change its name to Clayton State College, effective July 1, as a result of an earlier decision by the Board to make the institution a senior college.

In the process of consideration of the name for the institution as a senior college, President Harry S. Downs solicited the input of his faculty and students, as well as members of the community and local and state legislators. Downs' goal in the selection process was to choose a name that retains the positive aspects of the present identity of the institution and, at the same time, establishes the institution as a state senior institution.

The college has been authorized to convert to its new structure as a senior college, effective July 1. Beginning in the fall of this year, the college will market itself as a four-year institution among area high schools, since entering freshman will be potential baccalaureate degree candidates. ■

Action Rescinded

Action taken at the May meeting regarding DeKalb Community College student fees was rescinded by the Board of Regents in June in order to specify the distribution of funds collected through the fees.

The Regents specified that the \$20 fee for students taking nine or fewer hours will be split as follows: \$6 for student activities, \$4 for athletics, and \$10 for general institutional revenues. Students taking 10 or more hours will be paying \$25, with the additional \$5 going toward general institutional revenues. The fees were effective with the beginning of the summer '86 quarter.

The Board also approved an increase in Georgia College's student athletic fee from \$19 to \$22, which results in a total combined student activity/athletic fee of \$44 per quarter. ■

REPORT TO THE BOARD

Georgia's Junior Colleges Ready for Changes

Committee issues report outlining presidents' concerns, suggestions

It began in 1958, when the Georgia General Assembly decided that community education in this state needed a blueprint for the future. And so the Junior College Act was drawn up and passed, clearing the way for more cities and counties to build schools and make higher education a new priority for their communities.

Today, nearly 30 years later, Georgia's junior colleges may be on the threshold of change. A report filed with the Chancellor in late October detailed the findings of the Junior College Study Committee, a group comprised of three junior college presidents identifying the concerns of their 12 colleagues in the University System. Brunswick Junior College President John Teel—along with Derrell Roberts, president of

Dalton Junior College, and Edward Jackson, president of South Georgia College—presented the 14-page report to the Regents at the November meeting.

The report, however, was not limited to an identification of presidential concerns; it also contained several tentative suggestions on how to eliminate some of the problems that exist at the System's two-year schools.

Foremost on the presidents' minds is the overall "mission" of the junior colleges—that is, what role each school should play in higher education. Are the schools supposed to serve as job training institutions? Do they exist solely to serve their locales? Or are they "launching pads" for state colleges and universities?

According to the report, much of the anxiety is rooted in the perceived role of junior colleges over the years. The fact that many of today's senior colleges began as junior colleges has caused some consternation among presidents as to the very purpose of two-year schools in this state. "This history of conversion," the report states, "has helped to perpetuate the belief that Georgia's junior colleges are institutions waiting to grow up and that they cannot and will not come into their own until they have matured into 'adulthood.'"

Further clouding the picture are apparent contradictions between what is and what should be. The report cites a 1982 observation of the Governor

continued next page

Junior Colleges

(continued)

Committee on Postsecondary Education ("...there is no clear difference between the mission statements of public junior and senior colleges...") and a recently completed survey of University System freshman admissions standards. The latter notes that "some junior colleges have higher requirements than some senior colleges and some senior colleges have higher requirements than universities."

Of course, no simple solution exists to such concerns, but the leaders of junior colleges would like to see the Board of Regents establish a committee to look into the matter. From that committee, they would like a "mission statement" to be drawn up outlining the responsibilities of two-year public schools—responsibilities that include freshman and sophomore instruction, developmental studies and continuing education. Such a statement, they contend, would at least give them a stronger sense of purpose.

Which brings them to their second major concern: the place of junior colleges in a progressive Georgia educational environment. Where do junior colleges fit in with regard to vocational/technical schools? Should more recognition be afforded to two-year degrees? Can something be done to eradicate an image that they feel borders on inferiority?

These are just some of the questions about the place of junior colleges in Georgia that came to the presidents' minds. They also posed some possible answers:

- Study the relationship between the Board of Regents and the State Board of Postsecondary Vocational Education, and clarify that relationship on a state, not institutional level.
- Have the University System take responsibility for programs not specified in the Quality Basic Education Bill of 1985.
- Study the transferability of vo-tech school credits to University System schools, and clarify developmental studies and Regents' testing requirements.
- Have the Board of Regents affirm the place of junior colleges as transfer institutions in the System.

- Encourage junior colleges to improve their college transfer programs in the areas of cost, academic quality and transferability.
- Have the University System look into ways to help high school general education graduates go to college after changing their minds.
- Establish a regular meeting schedule between junior college presidents and the Chancellor's staff.

Another concern voiced in the report involved the present degree structure at two-year colleges in the System. For many years, students have earned associate degrees after completing two years of study at junior colleges; however, vo-tech schools have also begun awarding associate degrees for certain programs.

Because all associate degrees are not equal, the presidents of Georgia's junior colleges would like to see some uniform

"In order to upgrade the image of their institutions, college presidents would like to drop the word 'junior.' "

guidelines set. And the guidelines proposed in the report outline four basic two-year degrees:

1. *Associate of Arts (A.A.)*—For students who intend to transfer to a senior college or university.
2. *Associate of Science (A.S.)*—For students who complete college level programs designed to prepare them for jobs after college. Includes a good amount of general education and liberal arts coursework.
3. *Associate of Applied Science (A.A.S.)*—For students who complete a combination of college level and vo-tech coursework.
4. *Associate of Applied Technology (A.A.T.)*—For students who finish two years of vo-tech education where most of the work is noncollegiate.

The proposed degree structure will, to be sure, draw its share of critics. "I'm certain that not all of the gentlemen in this room will agree with these categories," Jackson said at the meeting. "However, our committee feels very strongly that we do need to establish some clear-cut categories."

Junior college leaders would also like to work out some kinks in the process of transferring credit—especially core curriculum credit. Supposedly, a core course taken at one University System school is accepted for credit at any other school in the System. However, junior college presidents say that isn't always the case, because differences of opinion often arise about which courses count for what credit.

"We are very concerned about the transferring of core courses," Teel said. "Not that it's a severe problem, but it is a problem that needs to be corrected."

Campus registrars usually handle such conflicts but, as the report says, "there are instances when mutual agreement is not reached on a given problem." Thus, a student may lose credit if the school for some reason chooses not to accept it as a transfer.

The presidents would like students having difficulty with transferring credits to be able to turn to a central authority for appeal. That authority, they say, should be the System Committee on the Transfer of Credit, and the junior college leaders would like the committee to be responsible for reviewing any unsolvable problems with transferring.

Finally, there is the business of institutional designations. In order to upgrade the image of their institutions, college presidents would like to change their schools' names. The word "community" might be a substitute for "junior," but the report points out that the change might not be entirely appropriate "since they are neither locally governed nor are they directly supported by local tax revenues."

So why not just drop the word "junior" altogether? Middle Georgia College, South Georgia College and Abraham Baldwin Agricultural College don't use it, so why should the other two-year institutions?

Such a change, the report notes, would force Albany Junior College and Emanuel County Junior College to adopt new names. But the proposal merits consideration, as do the remainder of the suggestions, and that's what the Regents are giving at this point. The junior colleges hope that the findings and observations of the Junior College Study Committee will keep them on board at a time when higher education in Georgia is in forward locomotion. ■

DEMOLITION, RENOVATION, AND CONSTRUCTION PROJECTS WERE
approved by the Board of Regents at its January meeting. The
Regents also approved two lease agreements and a non-exclusive
agreement.

1394

University of Georgia

The Board approved a request from the University of Georgia to
execute a lease agreement between the Board and the U.S. Postal
Service. The agreement will allow the Postal Service to use 1,600
square feet of floor space and 133 square feet of platform space
located in the Tate Student Center for the use and benefit of the
students, faculty, and staff of the university. The agreement is for
one year period beginning January 11, 1984, with the right to
renew on a year-to-year basis.

April 1,
Georgia.
from 1945
en served
serves as

The Board also authorized the execution of a non-exclusive
agreement between the Board and the Griffin-Spalding County
School System. The easement covers 0.03 of one acre of land at
the university's Georgia Experiment Station for use in the installa-
tion and maintenance of a sanitary sewer line which will serve the
Griffin High School.

construction, operation, and maintenance of an automated teller
machine for the use and benefit of the college's students, faculty,
and staff. The lease agreement with Great Southern Federal begins
on February 1, 1984 and ends January 31, 2004.■

German Major Is Discontinued; Computer Science Major Created

THE CREATION OF A MAJOR IN COMPUTER SCIENCE at Georgia State
University and the discontinuation of a major in German at West
Georgia College were approved by the Board of Regents at its
January meeting.

Georgia State University

The Board approved a request that Georgia State University be
authorized to offer the computer science major under the existing
bachelor of science degree and the existing master of science degree,
effective with the beginning of the 1984 spring quarter.

To be conducted through the Department of Mathematics, both
the B.S. and M.S. degrees are designed to prepare computer scien-
tists who are highly qualified for employment in business, industry,
and government and who are prepared for advanced study.

The university has indicated that the curriculum and faculty
resources necessary for a quality program have been developed
and that the special computer facilities needed for such a program
are already in place and are provided by the university's computer
center. No additional funding was requested for the implementa-
tion and operation of the two programs.

West Georgia College

West Georgia College was authorized to discontinue offering a
major in German under the bachelor of arts degree, effective the
winter quarter of 1984.

Within the past five years only three West Georgia College
students have majored in German, necessitating one-on-one instruc-
tional efforts. No new students will be accepted into the program
with the beginning of the 1984 winter quarter. The college will
continue to offer a minor in German and teach German at the
freshman/sophomore level.■

Revised Statutes Approved

THE REVISED STATUTES OF FLOYD JUNIOR COLLEGE were ap-
proved by the Board of Regents at its January meeting.

Recommended by President David B. McCorkle, the statutes
were approved by the faculty before being submitted in final form
in December 1983. The Statutes have been reviewed by Board of
Regents staff members and revised in accordance with suggestions
resulting from that review.

The Statutes are in conformity with the policies of the Board.■

Total, EFT Fall Quarter Enrollment Declined from Last Year

UNIVERSITY SYSTEM ENROLLMENT for the 1984 fall quarter declined in the two reported categories — Total and Equivalent Full-time (EFT) — from the 1983 fall quarter.

Total Enrollment

Total enrollment at the 33 institutions was 135,141 in the 1984 fall quarter, down 2,602 students, or 1.8 percent, from the 1983 fall quarter enrollment of 137,743. Total enrollment includes the number of students enrolled at the 33 institutions, without regard for workloads.

Seven institutions reported increases in Total enrollment, ranging from 0.2 percent to 8.1 percent. Twenty-five institutions reported declines of from 0.5 percent to 23.6 percent.

The breakdown of Total enrollment by classification of institutions for the 1984 fall quarter, with comparisons with the 1983 fall quarter is:

Four universities: 59,874 in the 1984 fall quarter, compared with 59,853 students in the 1983 fall quarter.

Fourteen senior colleges: 52,815 for the 1984 fall quarter, down 1.1 percent from the 1983 fall quarter figure of 53,405.

Fifteen junior colleges: 22,452 students in the 1984 fall quarter, down 8.3 percent from the 1983 fall quarter figure of 24,485.

Equivalent Full-time Enrollment

EFT enrollment of 113,085 students at the 33 universities and colleges for the 1984 fall quarter reflects a decrease of 2,826 students (2.4 percent) from the EFT enrollment of 115,911 for the 1983 fall quarter.

EFT enrollment is computed by dividing the total number of quarter credit hours of all students enrolled by the number 15, which is the accepted quarterly workload for a full-time student. ■

Comparisons of Total and EFT enrollment for the fall quarters of 1983 and 1984 are included in the table below. The total enrollment for the fall quarters of the past 10 years is illustrated in the graph on the opposite page.
